QUESTION NO: 1

The 'Business' retention category has a retention period of one year. This retention category and the 'Default Exchange Mailbox policy' are applied to the All Users Provisioning Group.

What happens after the scheduled archiving task runs?

- A. "One year" will be assigned as the retention period for the archived items
- B. "Business" will be assigned as the retention category for the archived items
- C. "All Users" will be assigned as the Provisioning Group for the archived items
- D. "Default user" will be assigned as the Mailbox policy for the archived items

ANSWER: B**QUESTION NO: 2**

Which High Availability solution will support an active/active configuration for a Symantec Enterprise Vault 11.x for Exchange installation?

- A. XEN Server Cluster
- B. Microsoft Clustering
- C. Building Blocks
- D. VMware VMotion

ANSWER: C**QUESTION NO: 3**

An organization uses three Exchange servers in a single domain and two Symantec Enterprise Vault 11.x for Exchange (EV) servers.

How many Provisioning tasks are required?

- A. one per target domain
- B. one per EV server
- C. one per Exchange server
- D. one per EV Directory

ANSWER: A

QUESTION NO: 4

Which two methods can be used to populate the Vault Administration Console's Personal Store Management Files container? (Select two.)

- A. the SQL Add-PSTFile Procedure script
- B. the Add-EVPstFile Powershell commmand
- C. the Add > Single PST file wizard
- D. the Add-PSTComputer Powershell command
- E. the Add > From File wizard

ANSWER: B C

QUESTION NO: 5

Which two actions should the administrator consider when adding new Vault Store Partitions to an existing Symantec Enterprise Vault 11.x (EV) environment? (Select two.)

- A. Configure the retention settings on WORM devices if applicable
- B. Install appropriate device software on the EV server to enable the device to use the streamer API
- C. Select the root path to hold files and folders other than those that EV creates
- D. Use overlapping partition folders when using network shares or mount points
- E. Enable the location path of an already existing partition

ANSWER: A B

QUESTION NO: 6

Which two Exchange server roles require installation of Symantec Enterprise Vault 11.x for Exchange extensions to provide users access to their archived content via Outlook Web Access (OWA) in a mixed Microsoft Exchange 2003 and 2007 environment? (Select two.)

- A. Hub Transport Server
- B. Front-end Server
- C. Back-end Server
- D. Mailbox Server

E. Client Access Server

ANSWER: C E

QUESTION NO: 7

A Symantec Enterprise Vault 11.x for Exchange (EV) administrator activated Auditing at the Directory level. During this process, the administrator created the audit database and can log on the SQL server without errors. The administrator checks the content of the audit database and notices that nothing is being audited.

How should the administrator resolve this issue?

- A. after enabling auditing on the EV Directory, restart the EV Admin Service level
- B. enable Auditing in the Exchange Server properties in the VAC and select the auditing options
- C. enable Auditing in the EV Server properties in the VAC and select the auditing options
- D. enable Auditing in the EV Site properties in the VAC and select the auditing options

ANSWER: C

QUESTION NO: 8

An administrator notices the number of messages being archived per hour by the Exchange Journal Task is significantly lower than normal when compared to the baseline archiving rate.

Which two explanations could be the cause of the performance reduction? (Select two.)

- A. SQL database fragmentation has occurred
- B. the journal task's archiving schedule window is too small
- C. one of the two journal tasks targeting the journal mailbox is failing to run
- D. the version of MAPISVC.inf is incompatible
- E. there is an intermittent connectivity problem between the Enterprise Vault and Exchange servers

ANSWER: A E

QUESTION NO: 9

Which two components comprise the Symantec Enterprise Vault 11.x for Exchange Directory? (Select two.)

- A. Directory Fingerprint database
- B. Directory Service

- C. Directory SQL database
- D. Directory Administration Role
- E. Directory Provisioning Task

ANSWER: B C

QUESTION NO: 10

What is an advantage of using Building Blocks in a Symantec Enterprise Vault 11.x environment?

- A. Building Blocks can be used in a VCS or MCS clustered configuration
- B. the SQL server and Microsoft Exchange may be configured with Building Blocks
- C. Building Blocks automatically creates the tasks and index locations which are missing on the working node
- D. reconfiguration is unnecessary after a failover and users are unaffected

ANSWER: D
