**QUESTION NO: 1**

An administrator is cloning and configuring five new web server virtual machines.

What would be the benefit of configuring resource shares for the new VMs?

- A. To prioritize access to a resource during contention.
- B. To guarantee access to a resource during contention.
- C. To prioritize access to a resource before contention occurs.
- D. To guarantee access to a resource before contention occurs.

**ANSWER: A****QUESTION NO: 2**

Which two allow for the disabling of Network Rollback operations? (Choose two.)

- A. Modifying the vpxd advanced configuration options and adding the config.vpxd.network.rollback key
- B. Modifying the C:\ProgramData\VMware\CIS\cfg\vmware-vpx\vpzd.cfg file and adjusting the xml tag
- C. Modifying the C:\ProgramData\VMware\CIS\cfg\vmware-vpx\vpzd.cfg file and adjusting the xml tag
- D. Modifying the C:\ProgramData\VMware\CIS\cfg\vmware-vpx\firstboot\vpzd-service-spec.prop file and adjusting the xml tag

**ANSWER: A B****QUESTION NO: 3**

You are editing the management network configuration of an ESXi 6.x Host from the vSphere Web Client. You mistakenly put the incorrect VLAN in place for the management network.

What action do you need to take to correct this?

- A. You need to manually edit the configuration on the host with command line utilities.
- B. No action is required. By default ESXi rolls back configuration changes that disconnect the host.
- C. The ESXi host system configuration will need to be restored to the factory configuration to fix the issue.
- D. The change can be reverted in the vSphere Web Client by simply editing the switch again.

**ANSWER: B**

**QUESTION NO: 4**

A user is trying to retrieve objects from a SharePoint server and finds the request is taking an excessive amount of time. An administrator tries to isolate the issue and notes the following:

What conclusion can be reached regarding the performance issues for this virtual machine?

- A. Host Power Management is directly impacting virtual machine performance.
- B. The virtual machine has a large number of snapshots.
- C. The Path Selection Policy for the storage device is set differently on the affected host.
- D. Network I/O control is configured for the portgroup.

**ANSWER: A****QUESTION NO: 5**

An administrator is unable to create the first group in a new vRealize Operations environment.

What is the likely cause of the problem?

- A. There are no group types defined.
- B. The group is not defined in SSO.
- C. There are more than 32 group types defined.
- D. The description for the group is not provided.

**ANSWER: A****QUESTION NO: 6**

What is a benefit of vCenter Linked-Mode?

- A. Allows the vCenter Server Virtual Appliance (vCSA) to manage multiple sites
- B. Pools vRAM entitlement
- C. Increases vCenter security
- D. Increases vCenter reliability

**ANSWER: B**

**Explanation:**

**QUESTION NO: 7**

Which two statements are true about VMFS5 datastores on ESXi 6.x? (Choose two.)

- A. Virtual Disk (VMDK) size can be larger than 2TB.
- B. Datastore extent size can be larger than 2TB.
- C. Only Physical Mode Raw Device Map (Passthrough-RDM) can be larger than 2TB.
- D. 2MB block size is required to support larger than 2TB file size.

**ANSWER: A B****QUESTION NO: 8**

An administrator logs into the vSphere Web Client, but is unable to see any hosts and clusters.

Which two options could fix the problem? (Choose two.)

- A. Verify that the client web browser and vCenter Server are in the same broadcast domain.
- B. Verify that the vCenter Server system is registered with the same Platform Services Controller as the vSphere Web Client.
- C. Log in to the vCenter Server as a user within the Active Directory domain.
- D. Log in to the vSphere Web Client as a user with permissions on the vCenter Server system.

**ANSWER: B D****QUESTION NO: 9**

An administrator has a virtual machine that requires four times the compute resources than other virtual machines on the same ESXi 6.x host.

How should the administrator configure the virtual machine settings, in order to be prepared for any resource contention?

- A. Set the shares of the priority virtual machine to High and the rest to Low.
- B. Set the shares of the priority virtual machine to High.
- C. Set the shares of the priority virtual machine to High and the rest to Normal.
- D. Set the shares of the priority virtual machine to Normal and the rest to Low.

**ANSWER: A****QUESTION NO: 10**

An administrator has unsuccessfully attempted several times to install an Operating System inside a virtual machine. The administrator finds that the installation fails at random intervals.

Which two actions can be taken to resolve this issue? (Choose two.)

- A. Verify the md5sum and if invalid, download the installation files again.
- B. Attempt the installation an additional time.
- C. Attempt to use a different installation media or installation method.
- D. Create a new virtual machine and attempt the installation with the existing media.

**ANSWER: A C**

#### QUESTION NO: 11

VMware tools is failing to install on a Microsoft Windows virtual machine.

What are two possible situations that would prevent the installation? (Choose two.)

- A. The VMware tools installation media is corrupt.
- B. The incorrect Operating System was selected in the virtual machine options.
- C. The software prerequisites have not been installed.
- D. The prerequisite services have not been started.

**ANSWER: A B**

#### QUESTION NO: 12

An administrator wants to monitor the health status of an ESXi 6.x host. However, when the administrator clicks the Hardware Status tab the following error is displayed.

This program cannot display the webpage

What might cause this problem?

- A. The VMware VirtualCenter Management Webservices Service is not started.
- B. The required plug-in is not enabled.
- C. The VMware ESXi Management Webservices Service is not started
- D. The name of the vCenter Server system could not be resolved.

**ANSWER: A**

**Explanation:**

Verify that the VMware VirtualCenter Management Webservices service is running on the vCenter Server system. Navigate to the vCenter Server system in the inventory and select Monitor > Service Health. The page displays the following message if the VMware VirtualCenter Management Webservices service is not started.

Could not get vCenter Health status

If you see this error message, start the VMware VirtualCenter Management Webservices service.

**QUESTION NO: 13**

Which two events happen when Distributed Resource Scheduler (DRS) is disabled? (Choose two.)

- A. The cluster's resource pool heirarchy and affinity rules are re-established when DRS is turned back on.
- B. The cluster's resource pool hierarchy and affinity rules are not re-established when DRS is turned back on.
- C. The cluster's resource pools are removed from the cluster.
- D. The cluster's resource pools are removed from the cluster and assigned to the hosts.

**ANSWER: B C****QUESTION NO: 14**

A physical Windows 2008 R2 Server is converted to a virtual machine using VMware vCenter Converter. Upon completion of the conversion and subsequent power on operation, the virtual machine fails to boot and the message below is observed in the Console of the virtual machine:

```
STOP 0x0000007B INACCESSIBLE_BOOT_DEVICE
```

Which two potential issues may be causing this boot failure? (Choose two.)

- A. An incorrect SCSI controller was selected during conversion.
- B. Incompatible software drivers were migrated into the virtual machine from the source machine.
- C. The vmdk file backing the virtual machine was thick provisioned.
- D. A snapshot was taken immediately after the conversion completed.

**ANSWER: A B****QUESTION NO: 15**

You want to deploy a vApp and dynamically assign IP addresses without a DHCP server on the network.

Which action would you take to accomplish this task?

- A. Enable IP pools.

- B.** Configure a local DHCP server in the vApp.
- C.** Enable NAT on the vApp router.
- D.** Configure the guest OS for workgroup and WINS.

**ANSWER: A**
