## Topic Break Down

Topic	No. of Questions
Topic 1, Topic 0, A	53
Topic 2, B	61
<b>Total</b>	<b>114</b>

**QUESTION NO: 1**

A FileMaker Pro 8 database has three separate windows open, each with its own found set and sort order. If a new window is opened, what will the new window inherit from the previously active window?

- A. only the current window's found set
- B. only the current window's found set and sort order
- C. only the current window's found set, sort order, and layout
- D. the current window's found set, sort order, layout, and current record

**ANSWER: D****QUESTION NO: 2**

Which type of file results from converting a CDML format file using the FileMaker CDML

Converter?

- A. XSL style sheet
- B. CSS style sheet
- C. HTML document
- D. XHTML document

**ANSWER: A****QUESTION NO: 3**

Consider a FileMaker Pro 8 database hosted by FileMaker Server 8. Two users, A and B, are accessing the database at the same time, and both are viewing records with the same layout. User A runs a script that loops through a found set, changing data in each record.

Which statement is true?

- A. User B may see changes to record data resulting from User A's script before the script completes.
- B. User B will not see any changes to record data resulting from User A's script until the loop in the script ends.
- C. User B will not see any changes to record data resulting from User A's script until the script completes in its entirety.

D. User B will only see changes to data resulting from User A's script if the script contains a Commit Records/Requests [ ] script step.

**ANSWER: A**

#### QUESTION NO: 4

In FileMaker Pro 8 which two statements about portals are true? (Choose two.)

- A. Container fields can be placed in portals.
- B. The initial row setting of a portal can be set by a script.
- C. A sort order applied to a portal overrides any sort order set up for the relationship.
- D. If there are multiple portals on a layout, the Go to Portal Row [First] script step will activate the portal closest to the top, left corner of the layout.

**ANSWER: A C**

#### QUESTION NO: 5

A layout contains a portal that allows creation of related records. What are two techniques that can be used to navigate to the empty row at the bottom of the portal? (Choose two.)

- A. use the script step Go to Portal Row [Select; Last]
- B. use the script step Go to NthRecord [fieldName; Last]
- C. assuming a field in the portal is in the tab order, click or tab to the first portal row then arrow down to the last row
- D. assuming a field in the portal is in the tab order, click or tab to the first portal row and continue to tab to the last row

**ANSWER: A D**

#### QUESTION NO: 6

Given the following formula:

Let ( myCalc = "6 \* 3" ; Evaluate (myCalc))

Which value will be returned?

- A. 0

- B. 1
- C. 18
- D. 6 \* 3
- E. myCalc

**ANSWER: C**

#### QUESTION NO: 7

What two statements are true for FileMaker Pro 8 Advanced? (Choose two.)

- A. The Data Viewer can only be used while debugging scripts.  
. The Script Debugger allows you to view any currently running script.
- B. Using the Active Scripts pane in the Script Debugger, you can temporarily disable subscripts.
- C. Using the Set Next Script Step function in the Script Debugger, you can alter the order in which sub-scripts execute.
- D. Using the Halt Script function in the Script Debugger, you can stop the execution of a sub-script and return to the script that called it.

**ANSWER: C**

#### QUESTION NO: 8
