- C. availability
- D. accessibility

ANSWER: A**QUESTION NO: 4 - (HOTSPOT)**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

Answer Area

- | | Yes | No |
|--|-----------------------|-----------------------|
| UAC reduces your permissions to that of a standard user unless higher permissions are necessary. | <input type="radio"/> | <input type="radio"/> |
| UAC notifies you when additional permissions are required and asks if you wish to continue. | <input type="radio"/> | <input type="radio"/> |
| UAC cannot be disabled. | <input type="radio"/> | <input type="radio"/> |

ANSWER:

Answer Area

- | | Yes | No |
|--|----------------------------------|----------------------------------|
| UAC reduces your permissions to that of a standard user unless higher permissions are necessary. | <input checked="" type="radio"/> | <input type="radio"/> |
| UAC notifies you when additional permissions are required and asks if you wish to continue. | <input checked="" type="radio"/> | <input type="radio"/> |
| UAC cannot be disabled. | <input type="radio"/> | <input checked="" type="radio"/> |

Explanation:

QUESTION NO: 5

Cookies impact security by enabling: (Choose two.)

- A. Storage of Web site passwords.
- B. Higher security Web site protections.
- C. Secure Sockets Layer (SSL).

D. Web sites to track browsing habits.

ANSWER: A D

Explanation:

Reference: http://en.wikipedia.org/wiki/HTTP_cookie

QUESTION NO: 6

What are two reasons to implement VLANs? (Choose two.)

- A. Manage traffic flow between the Internet and the network
- B. Create the most secure path between two hosts
- C. Enable grouping of hosts regardless of physical location
- D. Separate hosts on the same network

ANSWER: B C

QUESTION NO: 7

Which two characteristics should you recommend for a user's domain password? (Choose two.)

- A. Hard to guess
- B. Includes Unicode characters
- C. Easy to remember
- D. Easy to increment

ANSWER: A C

Explanation:

QUESTION NO: 8

A malicious user who intercepts and modifies communications is known as a:

- A. red hat hacker

- B. white hat hacker
- C. network sniffer
- D. man-in-the-middle

ANSWER: D

QUESTION NO: 9 - (DRAG DROP)

DRAG DROP

Match the authentication protocol with its description.

Instructions: To answer, drag the appropriate authentication protocol from the column on the left to its description on the right. Each authentication protocol may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Authentication Protocols	Answer Area	
SMB	an authentication protocol used by Windows stand-alone systems	protocol
NTLM	an authentication protocol widely used in 802.11 environments	protocol
NetBIOS	a strong authentication protocol preferred by Windows Server 2012 R2	protocol
EAP		
Kerberos		

ANSWER:

Authentication Protocols**Answer Area**

an authentication protocol used by Windows stand-alone systems

an authentication protocol widely used in 802.11 environments

a strong authentication protocol preferred by Windows Server 2012 R2

Explanation:**QUESTION NO: 10**

The Active Directory controls, enforces, and assigns security policies and access rights for all users.

Select the correct answer if the underlined text does not make the statement correct. Select "No change is needed" if the underlined text makes the statement correct.

- A. NTFS permissions
- B. User Account Control
- C. Registry
- D. No change is needed

ANSWER: D
