QUESTION NO: 1

Which two of the following statements about SIP response code handling on the Net-Net 4000 are TRUE?

- A. The Net-Net 4000 will originate a 403 Forbidden response when bandwidth allocated to a realm has been exhausted.
- B. The Net-Net 4000 cannot originate 3xx class redirect responses.
- C. The Net-Net 4000 egress realm selection may be affected by received third party 3xx class redirect responses
- D. The Net-Net 4000 can transmit a different SIP response code than it received.

ANSWER: C D

QUESTION NO: 2

Which one of the following statements about the Net-Net 4000 is TRUE?

- A. When the status LED, which is located on the front of the chassis control panel is lit yellow, it is an indication that the Net-Net system is experiencing a major malfunction such as a power supply failure.
- B. You can have up to two simultaneous console connections.
- C. By default, you can only Telnet to the wancom0 interface on the Net-Net 4000.
- D. By default, the Net-Net 4000 media interfaces will respond to PING.

ANSWER: C

QUESTION NO: 3

Which two the following statements about access to the Net-Net 4000 file system are TRUE?

- A. The Net-Net 4000 supports SFTP.
- B. You change the Net-Net 4000 internal FTP passwords by changing the User and Superuser mode passwords.
- C. The SD OS has a built in mechanism to prevent file system corruption.
- D. You should FTP software to the /code directory of the Net-Net 4000 flash memory when booting from /tffs0.

ANSWER: A B

QUESTION NO: 4

_____ is the percentage of a Net-Net 4000 peer advertisement time for the other peer in the high availability (HA) cluster to wait before considering the peer out of service.

- A. 200%
- B. percent-drift
- C. 310%
- D. standard-deviation-score

ANSWER: B

QUESTION NO: 5

Which two of the following statements about H.323 on the Net-Net 4000 are TRUE?

- A. When functioning as a back-to-back gateway, the Net-Net 4000 appears as just one H.323 gateway to a single network.
- B. The Net-Net 4000 supports H.323 versions 1-6.
- C. Multiple virtual gateways or gatekeepers can exist on a single Net-Net 4000.
- D. There is a feature that allows an H.323 terminal that is unable to support Fast Start to receive a Slow Start call from a Fast Start source through the Net-Net 4000.

ANSWER: C D

QUESTION NO: 6

When installing a Net-Net Operating System named sd400p9.gz on your

Net-Net 4000, you should FTP the OS to the Net-Net 4000 internal bootWhen installing a Net-Net Operating System named sd400p9.gz on your Net-Net 4000, you should FTP the OS to the Net-Net 4000?

Internal boot flash memory and use which of the strings below in the file name field of the boot parameters?

- A. sd400p9.gz
- B. /tffs0/sd400p9.gz
- C. /boot/sd400p9
- D. /boot/sd400p9.gz

ANSWER: B

QUESTION NO: 7

Which of the following is not a potential cause for a switchover in a high availability (HA) scenario?

- A. The notify berpd force command was issued.
- B. The standby Net-Net 4000 did not receive a heartbeat packet within the configured advertisement time.
- C. A failure decremented the health score below a configured threshold.
- D. The CPU utilization exceeded 90%.

ANSWER: D

QUESTION NO: 8

How does the Net-Net 4000 ensure that the pinholes are kept open for persistent communication to SIP endpoints behind a NAT device?

- A. By sending OPTIONS messages at a defined frequency
- B. By sending ARP requests at a defined frequency
- C. By changing the expires= parameter to a defined value in 200 OK responses to REGISTERs
- D. By changing the expires= parameter to a defined value in 200 OK responses to INVITEs

ANSWER: C

QUESTION NO: 9

Which two of the following statements about realms are TRUE?

- A. You must have a minimum of three realms in any configuration as one realm must be designated as the home realm.
- B. All endpoints within a realm must reside within the same subnet as the Net-Net 4000.
- C. Although you can use both TCP and UDP concurrently as the transport protocol, you can only have one SIP-interface per realm.
- D. You can associate multiple realms with a single network interface.

ANSWER: C D

QUESTION NO: 10

Which two of the following statements regarding SIP processing are FALSE?

- A. An initial INVITE will contain a From header tag and a To header tag as a globally unique identifier for the dialog.
- B. To avoid retransmissions, User Agents must forward received 100 Trying messages to their next hop.

C. Calls Per Second are typically measured using a 7-10 message SIP call flow including call set-up and tear down.

D. The combination of the To tag, From tag, and Call-ID completely defines a peer-to-peer SIP relationship and is referred to as a dialog.

ANSWER: A B
