**QUESTION NO: 1**

An administrator needs to increase the amount of startup delay there so that they can edit the BIOS of the virtual machine. Which option tab will allow them to configure the setting?

- A. Boot Options
- B. VM Options
- C. Virtual Hardware
- D. Power Management

**ANSWER: B****QUESTION NO: 2**

. In which two situations should data collection level 4 be used for performance monitoring within vcenter server ? (choose two ).

- A. For short term performance monitoring
- B. For long term performance monitoring
- C. when collecting all available metrics
- D. when collecting the least number of metrics

**ANSWER: A C****QUESTION NO: 3**

Which three of these statements are true about vRealize Suite? (Choose three)

- A. provides availability for unplanned downtime for mission-critical application
- B. provides availability for planned live migration using long-distance vMotion
- C. provides a self-service provisioning portal to make infrastructure costs transparent to users before consumption
- D. Enables desktop virtualization using Workstation
- E. Enables administrator to migrate operating system

**ANSWER: C D E**

**QUESTION NO: 4**

What does storage virtualization (VSAN) provide a company's data center?

- A. unified interface for managing storage arrays across various locations
- B. physical storage arrays that can be used across ESXi hosts
- C. abstraction layer for physical storage resources to be managed and optimized for virtualization deployments
- D. virtualization software that rapidly relocates applications and information on-demand within and across data centers

**ANSWER: D**

**QUESTION NO: 5**

An operator installs an OS to a new virtual machine (VM) using a DVD inserted into the ESXi host. Later, the operator notices that a vMotion migration on the new VM fails.

What action needs to be taken in order for the vMotion migration to succeed?

- A. Remove the DVD from the ESXi host
- B. Add a virtual CD/DVD drive to the VM.
- C. Add a virtual CD/DVD drive to the target ESXi.
- D. Disconnect the CD/DVD drive from the VM.

**ANSWER: D**

**QUESTION NO: 6**

When powering off a vApp, in which order are the virtual machines powered off?

- A. in the order in which they were powered on
- B. in alphabetical order by virtual machine name.
- C. From highest to lowest startup order.
- D. From highest to lowest network bandwidth consumption

**ANSWER: C**

**QUESTION NO: 7**

Which two statements are true regarding disaster recovery when using data center virtualization. (Choose two.)

- A. vSphere includes a file-level backup and restore solution with application level support for Microsoft Exchange.
- B. vSphere can restart virtual machines on available resources if host hardware fails.
- C. vSphere includes an automated replication solution.
- D. vSphere includes a live migration solution that maintains virtual machine uptime in the event of unplanned downtime.

**ANSWER: A D**

#### QUESTION NO: 8

An administrator needs gracefully reboot a virtual machine that has VMware Tools installed.

Which available power state control allows the administrator to perform the action?

- A. Reset
- B. Suspend
- C. Restart Guest OS
- D. Shut Down Guest Os

**ANSWER: C**

#### QUESTION NO: 9

Which two statements are true regarding Tags? (Choose two.)

- A. Different Tag scan be organized into Tag Categories
- B. Previously used Custom Attribute scan be migrated to Tags
- C. All functionality supported by Custom Attributes is supported by Tags
- D. Individual Tag scan be associated with one or more object types.

**ANSWER: A B**

#### QUESTION NO: 10

A beverage company has a critical virtual machine running on vsphere . The virtual machine runs an application that controls the customer automatic botting line. An outage of this virtual machines stops the line and results in enormous costs for the business. The application is extremely old and does not support application level clustering .

Which two vsphere features help reduce downtime for this critical virtual machine in case of esxi host failure? choose two )

- A. Vshield endpoint
- B. Fault tolerance
- B. High availability
- C. Cross-v center vmotion

**ANSWER: B**
