Explanation:

ASAS Security NGFW and NGIPS SE Module 4

QUESTION NO: 3

Which are two features of Cisco FirePOWER NGFW? (Choose two.)

A. Next generation IPS to detect intrusions and prevent threats

B. URL filtering to restrict access to specific sites and sub-sites

C. Data Loss Prevention

D. Increased IT management needs

ANSWER: A B

QUESTION NO: 4

Which of AMP's File capabilities deals with the problem of files passing through perimeter defenses that are later discovered to be a threat?

A. Dynamic Analytics

B. Trajectory

C. Malware Security

D. File Retrospection

ANSWER: D

Explanation:

Tracks the spread of any file within your network and continuously monitors file reputation over time. If a file reputation changes to malicious or is found by file sandboxing to be malicious, AMP provides retrospective alerting in the after phase. AMP identifies every instance of the file within your network to address the problem of malicious files passing through perimeter defenses that are later deemed a threat.
