**QUESTION NO: 1**

For which users is the Avaya SBC Remote Worker configuration typically implemented?

- A. Users administered with the same Communication Manager Network Region
- B. Remote users, travelling employees, remote offices
- C. Users administered with the same Server Flow
- D. Analog and DCP users only

**ANSWER: B**

**QUESTION NO: 2**

In which two flows are Media Interfaces administered in SIP trunking?

- A. Dell server and HP server
- B. NTP server and DNS server
- C. Call server and TFTP server
- D. Trunk server and call server

**ANSWER: D**

**QUESTION NO: 3**

How many networks or subnets are required to commission the SBC and implement SIP trunking on an SBC located in the DMZ?

- A. 1
- B. 2
- C. 3
- D. 4

**ANSWER: D**

**QUESTION NO: 4**

In addition to logging in to the SBCE GUI (Dashboard), what is another way to verify a standalone SBC installation?

- A. Ping the call server
- B. Ping the trunk server
- C. Log into the EMS CLI
- D. Log into the SBC CLI

**ANSWER: D****QUESTION NO: 5**

Where can the Avaya Session Border Controller be deployed?

- A. Inside the enterprise core only
- B. Outside the enterprise core only
- C. Inside the DMZ
- D. Both inside the enterprise core or in the DMZ

**ANSWER: D****QUESTION NO: 6**

Which installation type should you choose for a High Availability (duplicated) SBC?

- A. EMS + UC-Sec
- B. UC-Sec
- C. EMS
- D. NTP + EMS

**ANSWER: B****QUESTION NO: 7**

What is the primary reason for implementing a session border controller?

- A. Faster, more reliable network bandwidth
- B. Secure enterprise communications
- C. Reliable failover management
- D. Remote access and alarming

**ANSWER: B**

#### **QUESTION NO: 8**

In which two flows are Server Flows administered in SIP trunking?

- A. Call server and TFTP server
- B. NTP server and DNS server
- C. Dell server and HP server
- D. Trunk server and call server

**ANSWER: D**

#### **QUESTION NO: 9**

Which pair of elements are configured in a Server Profile?

- A. The IP address, the transport protocols
- B. The QoS and auto-negotiation settings
- C. The Time of Day rules and server FQDN
- D. The default gateway and NTP IP addresses

**ANSWER: A**

#### **QUESTION NO: 10**

Which troubleshooting capability is useful for monitoring a single telephone (URI)?

- A. Trace > Packet Capture?
- B. Diagnostics > Ping Test

C. Trace > Call Trace

D. Statistics > Server Flow

**ANSWER: C**
