QUESTION NO: 2 - (DRAG DROP)

DRAG DROP

You are designing a website for Margie's Travel. The website uses external stylesheets.

You need to create a style that centers all h1 elements on the page.

How should you complete the code? To answer, drag the appropriate code segment to the correct location in the code. Each code segment may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content. text-align center h1 = : ; .h1

Select and Place:

ANSWER:

Answer Area

Yes

No

A relative link requires that you use a protocol and server path

You can link requires to a document in a subdirectory of the current webpage by specifying only the subdirectory name and the filename

You can use a relative link to reference images files from a repository on a different server

The following example of how you format an absolute link:
`https: / /www.contoso.com/products.html`
