QUESTION NO: 1

After a material has been included in a NETCH material requirements planning run you change its BOM (bill of materials).

Which of the following planning file entries for this material are set by the system?

- A. The BOM explosion and the NETPL planning indicator
- B. The BOM explosion indicator
- C. The BOM explosion, the NETCH, and the NETPL planning indicators
- D. The NETCH and NETPL planning indicators

ANSWER: C

QUESTION NO: 2

What are the names of the objects for process integration of production orders? (Choose two)

- A. Control recipes
- B. Work instructions
- C. PI sheets
- D. Control instructions

ANSWER: B D

QUESTION NO: 3

The company you advise wants to carry out the material availability check automatically in the production order at various points in time. Which of the following options would you recommend? (Choose two.)

- A. Goods receipt for the product produced with the order
- B. Creation of the production order
- C. Confirmation of the operation that the materials being checked are assigned to
- D. Release of the production order

E. Goods receipt for a missing part

ANSWER: B D

QUESTION NO: 4

Which property applies for consumption with planning strategy 40 (planning with final assembly)?

- A. Consumption creates a static and binding assignment between the planned independent requirements and the customer requirements for the entire procurement process.
- B. Consumption takes place with the planning material.
- C. Consumption can reduce the total originally planned production quantity.
- D. Consumption can increase the total originally planned production quantity.

ANSWER: D

QUESTION NO: 5

You have maintained planning strategy group 10 (make-to-stock production) in the material master (SAP ECC) of a material. For the coming months, you have planned requirements with requirement type LSF (derived from main strategy 10). Now, you want to change the requirement type from LSF to VSF (in accordance with planning strategy 40, planning with final assembly) for requirements in the existing production plan.

Which of the following scenarios are applicable in this case? (Choose two)

- A. You can enter the strategy group 40 in the material master, but the requirement type is not changed automatically for existing requirements.
- B. You must change the requirement type for planning strategy 10 to VSF in Customizing. The requirement type for all existing requirements is then changed by the next planning run.
- C. You can change the strategy group from 10 to 40 for the existing production plan in the material master, and the requirement type for all requirements is changed automatically.
- D. You can enter the strategy group 40 in the material master and change the present requirement for the product manually in the production plan.

ANSWER: A D

QUESTION NO: 6

What is a feature of the simulation mode for material requirements planning in SAP ECC?

- A. It calculates the delay time which may occur in planning.
- B. It triggers multilevel bottom-up scheduling.
- C. It propagates exception messages from a component to the finished product.
- D. It posts planning results to the database automatically.

ANSWER: A**QUESTION NO: 7**

Which activity can trigger an automatic availability check for the components of a production order?

- A. Material staging
- B. Order rescheduling
- C. Order release
- D. Goods receipt for a missing part

ANSWER: C**QUESTION NO: 8**

Which of the following items of master data are needed for repetitive manufacturing? (Choose three)

- A. Production supply area
- B. Repetitive manufacturing profile
- C. Production version
- D. Master record for serial numbers
- E. Product cost collector

ANSWER: B C E

QUESTION NO: 9

You want to produce a finished product only when it is requested by a customer order in make-to-order production. However, all assemblies need to be procured beforehand.

How can you fulfill these requirements in SAP ECC? (Choose two)

- A.** Use strategy 50 (planning without final assembly) for the finished product and no strategy for all assemblies in the bill of material.
- B.** Use strategy 30 (production by lots) for the finished product and strategy 70 (planning at the assembly level) for all assemblies in the bill of material.
- C.** Use strategy 20 (make-to-order production) for the finished product and strategy 70 (planning at the assembly level) for all assemblies in the bill of material.
- D.** Use strategy 40 (planning with final assembly) for the finished product and strategy 70 (planning at the assembly level) for all assemblies in the bill of material.

ANSWER: A C

QUESTION NO: 10

In which scenario will the error message shown in the attached screenshot occur?

Exhibit:

Exhibit

- A.** A valid routing exists, but the material master is set to manual routing selection.
- B.** A valid routing exists, but the Customizing for the order type is set to manual routing selection.
- C.** The routing is not valid at the explosion date.
- D.** The selection method is set to "selection only by production version" in the material master.

ANSWER: C
