**QUESTION NO: 1**

When delivering a Scality Ring object storage solution, the customer has a legal compliance requirement for long term data retention and will require iTernity iCAS integration.

Is this a Scality Ring Connector that will meet their requirements?

Solution:Sproxid Connector

A. Yes

B. No

**ANSWER: A**

**QUESTION NO: 2**

Is this a supported Scality RING File Connector?

Solution:FUSE

A. Yes

B. No

**ANSWER: B**

**QUESTION NO: 3**

A customer in the logistics industry has several warehouses across the city. They have implemented a new CCTV deployment and need to store and archive thousands of video files for at least one year. Their existing storage infrastructure is a SAN which is quickly running out of capacity. The customer is interested in scalable object storage from HPE, but is concerned about the complexity of the solution given their limited IT staff.

Is this a response the IT professional should provide?

Solution:HPE Scalable Object Storage with Scality RING can be deployed on industry standard x86 servers and Linux.

A. Yes

B. No

**ANSWER: A**

**QUESTION NO: 4**

Is this a capability HPE object storage solutions can provide over other types of storage within the HPE portfolio?

Solution:software-defined platform to collapse storage and hypervisors silos into simple, easy-to-scale building blocks

- A. Yes
- B. No

**ANSWER: A**

**Explanation:**

---

**QUESTION NO: 5**

A customer needs a solution that provides the highest availability with the lowest overhead. They have a single availability zone and twelve servers in their RING and want to be able to continue data access from the Scalify RING even when three storage servers are unavailable.

Is this an Erasure Coding schema that will meet their requirements?

Solution:Erasure Coding (6,3)

- A. Yes
- B. No

**ANSWER: A**

**QUESTION NO: 6**

A customer needs to monitor a Scalify RING and S3 storage environment. Is this an additional feature above Standard service?

Solution:24/7 Remote Alerting

- A. Yes

B. No

**ANSWER: B**

**QUESTION NO: 7**

Is this statement true regarding Stretched RING solutions?

Solution:File Namespaces are only active on one site.

A. Yes

B. No

**ANSWER: B**

**QUESTION NO: 8**

A customer is discussing the use of object storage for backup and recovery using Scality.

Does this statement describe a best practice?

Solution:Most recent data is written to a storage pool of the backup vendor and all other backup data is migrated to the Scality Ring.

A. Yes

B. No

**ANSWER: B**

**QUESTION NO: 9**

A company is planning to launch a web-based application that requires petabytes of storage. Their current storage infrastructure is a NAS storage array with limited scalability. HPE scalable object storage based on Scality RING powered by HPE Apollo servers is positioned. They need a fast deployment to meet a tight timeframe and are concerned about the limited technical expertise to deploy and maintain a new storage infrastructure.

Is this advice the IT professional should provide?

Solution:Scality RING offers the same feature set as their existing NAS array.

A. Yes

B. No

**ANSWER: A**

**QUESTION NO: 10**

A customer currently stores 200 TB of unstructured data that is estimated to grow to 2 PB within 12 months. They are interested in an object storage solution, but they have a limited budget.

Is this a recommendation the IT professional should provide?

Solution:HPE Scalable object storage is built to achieve cloud economics with on-premises deployments.

A. Yes

B. No

**ANSWER: A**
