QUESTION NO: 1

If the UE fails to switch, it is mostly characterized by dropped calls, RRC reestablishment, and so on.

- A. True
- B. False

ANSWER: A**QUESTION NO: 2**

Which of the following are the design principles of LTE tracking area? (Multiple choice)

- A. A base station can only belong to one tracking area
- B. The concept of keeping the same tracking area for the LTE access network and core network
- C. When the UE is in an idle state, the core network can know the tracking area where the UE is located
- D. When a UE in an idle state needs to be paged, it must be paged in all cells in the tracking area where the UE is registered
- E. In the LTE system, the location update signaling caused by the location change should be minimized

ANSWER: B C D**QUESTION NO: 3**

Which of the following adjustment measures has the highest priority?

- A. Antenna height
- B. Antenna direction angle antenna downtilt angle
- C. Antenna type

ANSWER: C

QUESTION NO: 4

The insertion loss of the cavity power divider is larger than that of the microstrip power divider.

- A. True
- B. False

ANSWER: B**QUESTION NO: 5**

Which of the following statements about LTE tools is correct? (Multiple Choice)

- A. Probe can be used for road test and playback
- B. OMStar can be used for network verification
- C. M2000 can be used to configure the network and check the message system.
- D. PRS can be used for simulation and base station selection

ANSWER: A B C**QUESTION NO: 6**

When doing PCI planning, what principles need to be met? (multiple choice)

- A. Avoid cells with overlapping coverage areas
- B. Of all the districts PCI All different
- C. Cells that meet the reuse degree PCI Can be the same
- D. Need for cells with overlapping coverage areas

ANSWER: A C**QUESTION NO: 7**

Which of the following events is the basis for LTE synchronous frequency switching?

- A. A1
- B. A2
- C. A3
- D. B1

ANSWER: C

QUESTION NO: 8

Which of the following carrier bandwidths does LTE support? (multiple choice)

- A. 40M
- B. 5M
- C. 15M
- D. 20M

ANSWER: B C D

QUESTION NO: 9

Regarding TA planning, which of the following statements is incorrect?

- A. LTE of TA Planning should be consistent with 2G/3G of LA Plan to be consistent
- B. Currently LTE of TA Can contain at most 16 Piece TA
- C. LTE of TA Number of cells in Should be better than the corresponding 2G/3G LA Small number of medium cells
- D. Each A single-operator cell can belong to multiple TA

ANSWER: D

QUESTION NO: 10

Which of the following factors affect the theoretical peak of LTE cells? (multiple choice)

- A. Community bandwidth

B. Modulation(MCS)

C. MIMOmodel

D. UEability

ANSWER: A B C
