QUESTION NO: 1

Provides distributed monitoring solutions, including monitoring events and monitoring performance. The former is used to detect the causes of abnormal IIS running, and the latter is used to establish the user system performance benchmark. Which of the following software is used to monitor the system?

- A. Zabbix
- B. Python
- C. Cobbler
- D. SaltStack

ANSWER: D**QUESTION NO: 2**

Which of the following statement about SmartVirtualization heterogeneous software is used to identify and handle compatibility issues between heterogeneous storage devices in a timely manner?

- A. The physical space required by the eDevLUN data volume occupies the space of the local system
- B. LUNs in the SmartVirtualization heterogeneous storage systems are mapped to the local system. Therefore, you can discover the LUNs in the local storage system. However, the data is not managed by the local storage system.
- C. An eDevLUN data volume is a logical abstraction of external LUN data
- D. In the SmartVirtualization, feature heterogeneous storage systems include only storage systems of other mainstream vendors.

ANSWER: B**QUESTION NO: 3**

ITIL best practices refer to the advanced ITSM methodology to understand enterprise requirements and implement sustainable management during IT service management.

Which of the following is the IT service operation process in the ITIL best practice system?

- A. Event management, incident management, problem management, request fulfillment, and access management
- B. Incident management, problem management, service desk, request fulfillment, and event management
- C. Incident management, service desk, request fulfillment, access management, and event management

D. Event management, incident management, change management, and access management

ANSWER: A

Explanation:

QUESTION NO: 4

Which of the following are the precautions for network O&M in the Simpana backup solution?

- A. Avoid hosts with the same name or IP address
- B. Avoid multiple network adapter fault
- C. Avoid port conflicts. By default, Simpana uses ports 8400 and 8402 at least
- D. Avoid inconsistency between DNS/HOSTS files.

ANSWER: A

QUESTION NO: 5

In the Huawei FusionCloud solution, what are the relationships between the CCS and peripheral services?

- A. The CCS provides the computing capability service
- B. The DNS maps the CCS domain name to the CCS floating IP address
- C. ELK Collect CCS Logs
- D. EVS queries the volume type label in a specified AZ

ANSWER: A

QUESTION NO: 6

Which of the following statements about the VM package OVF and OVA is correct?

- A. The OVA file can be abstracted as a file package composed of several different types of files
- B. The two encapsulation formats are defined by DMTF (Distributed Management Task Force)
- C. Only the OVF image package can be used in FusionCompute

D. The image package in OVF format must be decompressed first

ANSWER: A

QUESTION NO: 7

In the server migration scenario, the ERP application system on a UNIX server is migrated to another UNIX server without recompilation or development. The hardware platform of the target server can be different from that of the source server.

- A. True
- B. False

ANSWER: B

QUESTION NO: 8

In the cloud data center migration scenario, which of the following statements about configuring eDevLUNs for heterogeneous virtualization is correct?

- A. The read/write policy of eDevLUNs “write-back” applies to random access services, ensuring that data in the cache is cached as long as possible to improve the read hit ratio.
- B. The default read/write policy of eDevLUNs is applicable to common services to balance the hit ratio and disk access performance.
- C. The read/write policy “Pairing” of eDevLUNs applies to sequential access services to release cache resources for other services as soon as possible.
- D. When the eDevLUN reads data, it reads the data to be read from the hard disk in advance based on the specified policy.

ANSWER: A

QUESTION NO: 9

Which of the following statements about Huawei FusionCloud 6.x solution is incorrect?

- A. OpenStack in Region TypeII can contain multiple AZs. It could contain Multiple AZs with KVM and VRM. However, it only support one BMS AZ.
- B. Single-OpenStack architecture under Region TypeII.
- C. OpenStack control nodes under Region TypeII can be deployed on VMs.

D. Each AZ in the Region Typell can have only one virtualization type.

ANSWER: C

QUESTION NO: 10

It Q&M management refers to the comprehensive management of IT software and hardware operating environments (such as software environment and network environment), IT service systems, and IT Q&M personnel by using related methods, methods, technologies, systems, processes, and documents, in IT O&M, which of the following events needs to be handled immediately?

- A. Prompt event
- B. Debugs events
- C. Incident event
- D. Early warning Event

ANSWER: C
