- D. A technical tone for online shoppers of furniture

**ANSWER: C**

#### QUESTION NO: 6

Processes that take client input, perform functions on the Web server and then return content to the Web browser are known as:

- A. client-side technologies.
- B. server-side technologies.

- C. scripting languages.
- D. hyperthreading technologies.

**ANSWER: B**

#### **QUESTION NO: 7**

Homer has been asked to create a monthly advertising message and send it by bulk e-mail to all e-mail addresses collected from customers who have purchased products from the company. What should Homer include in the bulk e-mail message to ensure customer privacy?

- A. The customer's e-mail address in the body of the message
- B. A section in which recipients can provide feedback about the company
- C. An opt-out option for recipients to stop receiving future advertising messages from the company
- D. An opt-in option to receive additional similar messages from related companies

**ANSWER: C**

#### **QUESTION NO: 8**

User feedback can be evaluated in many ways. Which of the following methods is more quantitative than direct user feedback, and will provide indirect feedback from the majority of users who do not respond?

- A. Site server logs
- B. Online e-mail links
- C. User surveys
- D. Opt-in bulk mail services

**ANSWER: A**

#### **QUESTION NO: 9**

Denny is designing a Web site for his school's sporting events. This Web site will list event results for the school. When site visitors click a hyperlink for a specific event, a new page containing information about the sporting event will appear, including the teams involved, the location of the event, scores, key plays and specific accomplishments by contestants. Which of the following should Denny do to build this site?

- A. Create static pages for each event.

- B.** Use one page and modify it after each event.
- C.** Copy and paste Web pages from other schools' sites.
- D.** Use database integration.

**ANSWER: D**

**QUESTION NO: 10**
