Topic Break Down

Topic	No. of Questions
Topic 1, New Update	170
Topic 2, Case Study 1	5
Topic 3, Case Study 2	4
Topic 4, Case Study 3	2
Topic 5, Case Study 4	3
Topic 6, Case Study 5	6
Topic 7, Case Study 6	5
Topic 8, Mixed Questions	294
Total	489

QUESTION NO: 1

You need to ensure that feature and quality updates install automatically on a Windows to compute during a maintenance window.

Solution: in Group Policy. from the Windows Update settings, you enable Configure Automatic Updates, select 4 - Auto download and schedule the Install, and then enter a time.

Does this meet the goal?

- A. Yes
- B. No

ANSWER: B**QUESTION NO: 2**

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace.

Which three types of data can you collect from the computers by using Log Analytics? Each correct answer a complete solution.

NOTE: Each correct selection is worth one point.

- A. error events from the System log
- B. failure events from the Security log
- C. third-party application logs stored as text files
- D. the list of processes and their execution times
- E. the average processor utilization

ANSWER: A D E**Explanation:**

Log Analytics is a tool in the Azure portal to edit and run log queries from data collected by Azure Monitor logs, such as the system log, and interactively analyze their results.

Reference: <https://docs.microsoft.com/en-us/azure/azure-monitor/logs/log-analytics-tutorial><https://docs.microsoft.com/en-us/azure/azure-monitor/logs/log-analytics-tutorial>

QUESTION NO: 3

Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business.

You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

Setting	State	Comment
 Phone Sign-in		
 Allow enumeration of emulated smart card for all users	Not configured	No
 Turn off smart card emulation	Not configured	No
 Use PIN Recovery	Not configured	No
 Use a hardware security device	Not configured	No
 Use biometrics	Enabled	No
 Configure device unlock factors	Not configured	No
 Configure dynamic lock factors	Enabled	No
 Use Windows Hello for Business	Enabled	No
 Use certificate on-premises authentication	Not configured	No

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Facial recognition
- B. A smartwatch that is Bluetooth-enabled
- C. A PIN
- D. A USB key

ANSWER: A C

Explanation:

Reference: <https://community.windows.com/en-us/stories/windows-sign-in-options> <https://fossbytes.com/how-to-unlock-windows-10/>

QUESTION NO: 4

You have an Azure Active Directory (Azure AD) tenant that contains the named locations shown in the following table.

Name	Location type	Configuration
Location1	IP ranges	40.77.182.32/27
Location2	Countries (IP)	Canada
Location3	IP ranges	2a01:111::/32
Location4	Countries (IP)	Australia Include unknown countries/regions
Location5	Countries (GPS)	United States

You need to create a Conditional Access policy that will have a condition to include only trusted locations.

Which two named locations can be marked as trusted? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Location1
- B. Location2
- C. Location3
- D. Location4
- E. Location5

ANSWER: A C

Explanation:

Location 1 and Location 3, both the ones I had as well as they include the IP Ranges Subnet as Trusted locations

QUESTION NO: 5 - (DRAG DROP)

DRAG DROP

You have 100 computers that run Windows 8.1.

You plan to deploy Windows 10 to the computers by performing a wipe and load installation.

You need to recommend a method to retain the user settings and the user data.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

Configure known folder redirection in Microsoft OneDrive.

Create a system image backup.

Enable Enterprise State Roaming.

Deploy Windows 10.

Run loadstate.exe.

Run scanstate.exe.

Restore a system image backup

ANSWER:

Actions

Configure known folder redirection in Microsoft OneDrive.

Create a system image backup.

Enable Enterprise State Roaming.

Restore a system image backup

Answer Area

Run `scanstate.exe`.

Deploy Windows 10.

Run `loadstate.exe`.

Explanation:

<http://itproguru.com/expert/2016/01/step-by-step-how-to-migrate-users-and-user-data-from-xp-vista-windows-7-or-8-to-windows-10-using-microsoft-tool-usmt-user-state-migration-toolkit/>

QUESTION NO: 6

You have a Microsoft 365 subscription.

You plan to use Conditional Access policies.

You need to identify which scenarios the policies will support.

Which two scenarios should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Enforce multi-factor authentication (MFA) when users access a Microsoft Office 365 service.
- B. Force users to renew an expired SSL certificate.
- C. Force users to update Windows Defender definition files before they sign in to Microsoft Office 365.

- D. Block users from using legacy authentication when signing in to Microsoft Exchange Online.
- E. Force users to install the latest Windows and Microsoft Office updates before they sign in to Office 365.

ANSWER: A D

Explanation:

A: Conditional Access allows administrators to control what Office 365 apps users can gain access to based on if they pass/fail certain conditions. These conditions are enforced by building a policy (or multiple policies) to control how users access your Office 365 resources.

Cloud Apps- What apps do you want to control? Conditional Access does not need to apply to all of Office 365, you can be more granular and just control access to specific apps – E.g. Exchange Online.

Access can be allowed to Office 365 with the following conditions:

- * Require multi-factor authentication – User is allowed in but will need to complete additional security to log in.
- * Etc.

D: The easiest way to block legacy authentication across your entire organization is by configuring a Conditional Access policy that applies specifically to legacy authentication clients and blocks access.

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/block-legacy-authentication>

QUESTION NO: 7

You have computers that run Windows 10 and are managed by using Microsoft Intune.

Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1.

What should you configure in the device configuration profile?

- A. Microsoft Defender SmartScreen
- B. Microsoft Defender Exploit Guard
- C. Microsoft Defender Application Guard
- D. Microsoft Defender Application Control

ANSWER: B

Explanation:

Reference:

<https://www.microsoft.com/security/blog/2017/10/23/windows-defender-exploit-guard-reduce-the-attacksurface-against-next-generation-malware/>

QUESTION NO: 8

Your company has computers that run Windows 10. The company uses Microsoft Intune to manage the computers.

You have an app protection policy for Microsoft Edge. You assign the policy to a group.

On a computer named Computer1, you open Microsoft Edge.

You need to verify whether Microsoft Edge on Computer1 is protected by the app protection policy.

Which column should you add in Task Manager?

- A. Operating system context
- B. UAC virtualization
- C. Enterprise Context
- D. Data Execution Prevention

ANSWER: C**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/wip-app-enterprise-context> <https://www.itpromentor.com/win10-mam-wip/>

QUESTION NO: 9

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

Your company has a number of Windows 10 Microsoft Azure Active Directory (Azure AD) joined workstations. These workstations have been enrolled in Microsoft Intune.

You have been tasked with making sure that the workstations are only able to run applications that you have explicitly permitted.

Solution: You make use of Windows Defender Antivirus.

Does the solution meet the goal?

- A. Yes
- B. No

ANSWER: B

QUESTION NO: 10 - (DRAG DROP)

DRAG DROP

You have a Microsoft Deployment Toolkit (MDT) deployment share that has a path of D:\MDTShare.

You need to add a feature pack to the boot image.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Modify the Windows PE properties of the deployment share.

Modify the General properties of the deployment share.

Copy the feature pack to D:\MDTShare\Packages.

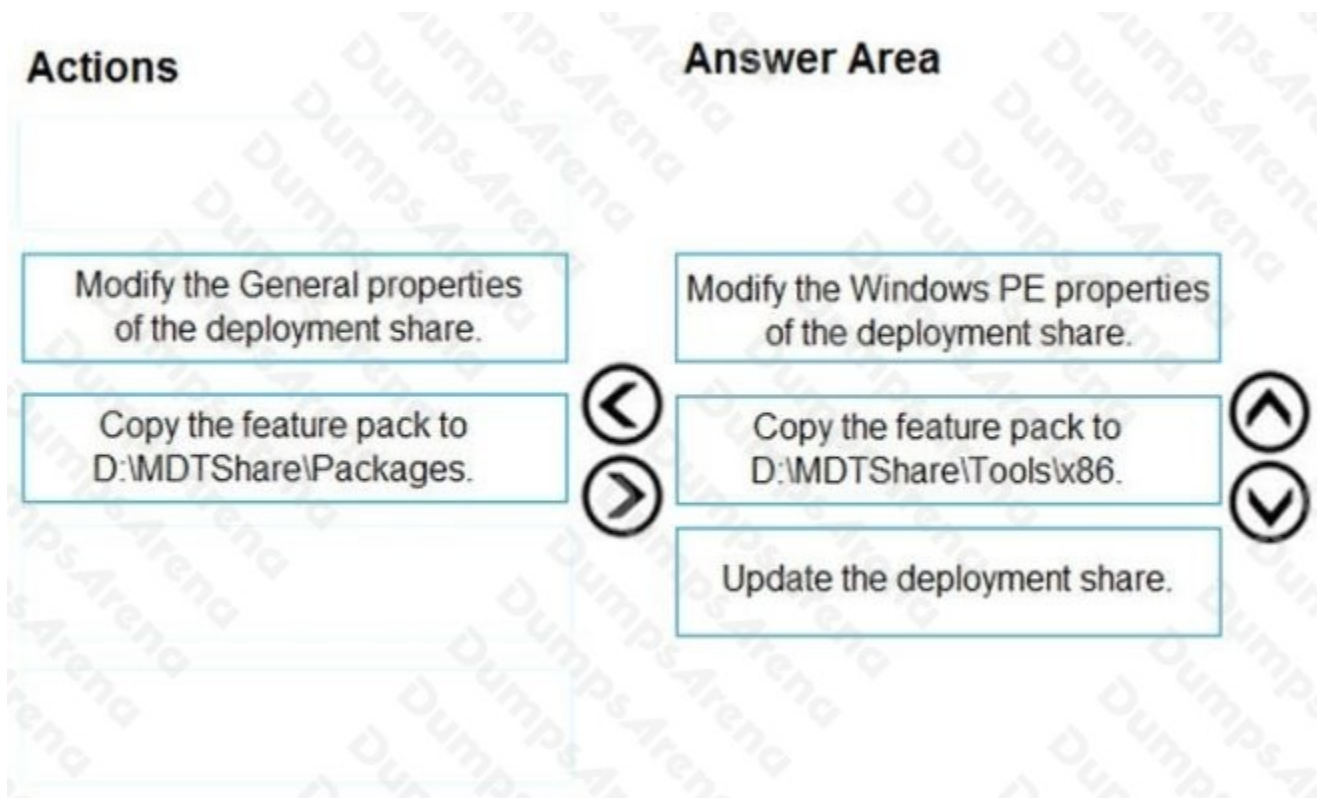

Copy the feature pack to D:\MDTShare\Tools\x86.

Update the deployment share.

Answer Area

ANSWER:

**Explanation:**

Reference: <https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-image-using-mdt>

QUESTION NO: 11

You have a Microsoft 365 tenant that uses Microsoft Intune.

You use the Company Portal app to access and install published apps to enrolled devices.

From the Microsoft Endpoint Manager admin center, you add a Microsoft Store app.

Which two App information types are visible in the Company Portal?

NOTE: Each correct selection is worth one point.

- A. Information URL
- B. Owner
- C. Privacy URL
- D. Developer

ANSWER: C D

QUESTION NO: 12

You have a Microsoft 365 subscription.

You need provide a user the ability to disable Security defaults and create Conditional Access policies. The solution must use the principle of least privilege.

Which role should you assign to the user?

- A. Global Administrator
- B. Conditional Access Administrator
- C. Security Administrator
- D. Intune Administrator

ANSWER: B**Explanation:**

To enable or disable security defaults in your directory, sign in to the Azure portal as a security administrator, Conditional Access administrator, or global administrator.

Note: Conditional Access Administrator

Users with this role have the ability to manage Azure Active Directory Conditional Access settings.

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/concept-fundamentals-security-defaults>

QUESTION NO: 13

Your network contains an Active Directory domain. The domain contains computers that run Windows 10.

All users use Roaming User Profiles.

You have a user named Public1 that is used to sign-in to a public computer.

You need to prevent changes to the user settings of Public1 from being saved to the user profile.

What should you do?

- A. Rename the Roaming User Profile folder to Public1.man
- B. Rename Ntuser.dat to Ntuser.v6
- C. Rename Ntuser.dat to Ntuser.man
- D. Rename the Roaming User Profile folder to Public1.v1

ANSWER: C**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/answers/questions/168551/set-roaming-profile-download-from-server-to-pcbut.html>

<https://docs.microsoft.com/en-us/windows/client-management/mandatory-user-profile>

QUESTION NO: 14

You have Windows 10 devices that are managed by using Microsoft Intune. Intune and the Microsoft Store for Business are integrated.

You need to deploy the Remote Desktop modern app as an automatic install to the Windows 10 devices without user interaction.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create an Azure Active Directory group that contains all users.
- B. From the Intune portal, create a Microsoft Store app for the Remote Desktop modern app.
- C. From the Intune portal assign the app to the Azure Active Directory group.
- D. Create an Azure Active Directory group that contains the Windows 10 devices.
- E. From the Microsoft Store for Business portal, assign a license for the app to all the users in the Azure Active Directory group.
- F. For your organization, make the app available in the Microsoft Store for Business.

ANSWER: B C D**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy>

<https://docs.microsoft.com/en-us/mem/intune/apps/windows-store-for-business>

QUESTION NO: 15

Your network contains an Active Directory domain. The functional level of the forest and the domain is Windows Server 2012 R2.

The domain contains 500 computers that run Windows 10. All the computers are managed by using Microsoft System Center 2012 R2 Configuration Manager.

You need to enable co-management.

What should you do first?

- A. Deploy the Microsoft Intune client.
- B. Raise the forest functional level.
- C. Upgrade Configuration Manager to Current Branch.
- D. Raise the domain functional level.

ANSWER: C

Explanation:

Co-management requires Configuration Manager version 1710 or later.

Reference: <https://docs.microsoft.com/en-us/sccm/comanage/overview#prerequisites>

QUESTION NO: 16 - (HOTSPOT)

HOTSPOT

What is the maximum number of devices that User1 and User2 can enroll in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

User1 can enroll a maximum of:

<input type="checkbox"/>	5 devices
<input type="checkbox"/>	10 devices
<input type="checkbox"/>	15 devices
<input type="checkbox"/>	1,000 devices
<input type="checkbox"/>	An unlimited number of devices

User2 can enroll a maximum of:

<input type="checkbox"/>	5 devices
<input type="checkbox"/>	10 devices
<input type="checkbox"/>	15 devices
<input type="checkbox"/>	1,000 devices
<input type="checkbox"/>	An unlimited number of devices

ANSWER:

Answer Area

User1 can enroll a maximum of:

5 devices	<input type="checkbox"/>
10 devices	<input checked="" type="checkbox"/>
15 devices	<input type="checkbox"/>
1,000 devices	<input type="checkbox"/>
An unlimited number of devices	<input type="checkbox"/>

User2 can enroll a maximum of:

5 devices	<input type="checkbox"/>
10 devices	<input type="checkbox"/>
15 devices	<input checked="" type="checkbox"/>
1,000 devices	<input type="checkbox"/>
An unlimited number of devices	<input type="checkbox"/>

Explanation:**QUESTION NO: 17 - (HOTSPOT)****HOTSPOT**

You have 100 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to configure the following device restrictions:

- Block users from browsing to suspicious websites.
- Scan all scripts loaded into Microsoft Edge.

Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Device restrictions
Windows 10 and later

- ∨ Microsoft Edge Browser
- ∨ Network proxy
- ∨ Password
- ∨ Per-app privacy exceptions
- ∨ Personalization
- ∨ Printer
- ∨ Privacy
- ∨ Projection
- ∨ Reporting and Telemetry
- ∨ Search
- ∨ Start
- ∨ Windows Defender SmartScreen
- ∨ Windows Spotlight
- ∨ Windows Defender Antivirus

Previous [Next](#)

ANSWER:

Answer Area

Device restrictions
Windows 10 and later

- Microsoft Edge Browser
- Network proxy
- Password
- Per-app privacy exceptions
- Personalization
- Printer
- Privacy
- Projection
- Reporting and Telemetry
- Search
- Start
- Windows Defender SmartScreen
- Windows Spotlight
- Windows Defender Antivirus

Explanation:

QUESTION NO: 18

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: From the Microsoft Endpoint Manager admin center, you create a device compliance policy and assign the policy to the computers. After 24 hours, you view the Device compliance report in Intune.

Does this meet the goal?

A. Yes

B. No

ANSWER: B

QUESTION NO: 19

Your network contains an Active Directory domain named contoso.com. The domain contains 200 computers that run Windows 10.

Folder Redirection for the Desktop folder is configured as shown in the following exhibit.

Desktop Properties ? X

Target **Settings**

Select the redirection settings for Desktop.

Grant the user exclusive rights to Desktop.

Move the contents of Desktop to the new location.

Also apply redirection policy to Windows 2000, Windows 2000 Server, Windows XP, and Windows Server 2003 operating systems.

Policy Removal

Leave the folder in the new location when policy is removed.

Redirect the folder back to the local userprofile location when policy is removed.

OK Cancel Apply

The target is set to Server1.

You plan to use known folder redirection in Microsoft OneDrive for Business.

You need to ensure that the desktop content of users remains on their desktop when you implement known folder redirection.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Clear the Grant the user exclusive rights to Desktop check box.
- B. Change the Policy Removal setting.
- C. Disable Folder Redirection.
- D. Clear the Move the contents of Desktop to the new location check box.

ANSWER: A B

Explanation:

Reference: <https://docs.microsoft.com/en-us/onedrive/redirect-known-folders>

QUESTION NO: 20

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What two configurations should you perform from Microsoft 365 Device Management? Each correct answer is a complete solution.

NOTE: Each correct selection is worth one point.

- A. a device restrictions device configuration profile
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 security baseline
- E. a Windows 10 update ring

ANSWER: B E
