Topic Break Down

Topic	No. of Questions
Topic 1, Exam Pool A	99
Topic 2, Exam Pool B	100
Topic 3, Exam Pool C	186
Total	385

QUESTION NO: 1

A VMware vSphere 6.x Administrator is tasked with expanding a current vRealize Log Insight Deployment.

What two steps will accomplish this task? (Choose two.)

- A. Run the startup wizard and select Join Existing Deployment.
- B. Login to the vRealize Log Insight Management UI and select Add New Node.
- C. Deploy another vRealize Log Insight server from the OVF.
- D. Deploy and install vRealize Log Insight on a new Linux virtual machine.

ANSWER: A B**QUESTION NO: 2**

An administrator attempts to install vCenter Single Sign-On Server. The installer returns an error message indicating that the installation failed. Prior to the installation, all setup prerequisites were met. The administrator has generated a vCenter Server Single Sign-On support bundle.

Which two files should the administrator analyze to determine the cause of the failure? (Choose two.)

- A. Server\utils\logs\imsTrace.log
- B. Server\utils\logs\install.txt
- C. %TEMP%\utils\logs\vminst.log
- D. %TEMP%\vminst.log

ANSWER: A D**Explanation:**

QUESTION NO: 3

What three types of host bus adapters are supported for connecting to shared storage on an ESXi hosts? (Choose three.)

- A. Software SATA
- B. Software iSCSI
- C. Hardware HBA
- D. Software FCoE

ANSWER: B C D

QUESTION NO: 4

Which three features can be configured during the initial creation of a cluster? (Choose three.)

- A. Proactive HA
- B. EVC
- C. DRS
- D. vSAN

ANSWER: B C D

QUESTION NO: 5

Which two actions are prerequisites to adding ESXi 6.x hosts to a vSphere Distributed Switch? (Choose two.)

- A. Verify that there is at least one Distributed Port Group on the Distributed Switch.
- B. Verify that the Distributed Port Group have active uplinks configured in its teaming and failover policy.
- C. Verify that the Distributed Switch has been configured with a Network Profile.
- D. Verify that Network I/O control for Management Traffic is configured for the highest share value.

ANSWER: A B

QUESTION NO: 6

An administrator is attempting to restore a number of files in a directory within the Operating System of a virtual machine. How can the administrator restore the files from a previous backup?

- A. Use the File Level Restore option from the selected backup of the virtual machine in the vSphere Web Client.
- B. Connect to the File Level Restore tool from a web browser in the virtual machine.
- C. Connect to the File Level Restore tool from the VMware Data Protection appliance.
- D. Use the File Level Restore option from the selected backup of the virtual machine in the vSphere Client.

ANSWER: B

QUESTION NO: 7

What may be a cause for failure to unmount an NFS datastore?

- A. It has active snapshot files.
- B. It is being used for High Availability (HA) heartbeat.
- C. It is part of a Cluster.
- D. It is managed by Distributed Resource Scheduler (DRS).

ANSWER: A

QUESTION NO: 8

Which two configurable options apply to both virtual machine CPU and memory allocation? (Choose two.)

- A. Reservation
- B. Shares
- C. Resource Pool
- D. Reserve All

ANSWER: A B

QUESTION NO: 9

A vSphere Administrator has an unresponsive ESXi 6.x host and only has access to the Direct Console User Interface. Which option would allow the Administrator to review live VMkernel logging? (Choose the best answer.)

- A. Alt + F8
- B. Alt + F7
- C. Alt + F11
- D. Alt + F12

ANSWER: D

QUESTION NO: 10

What is true about a virtual machine with (orphaned) appended to the display name?

- A. The virtual machine has been cloned and removed from vCenter Server's inventory.
- B. The template that the virtual machine was created from no longer exists.
- C. The virtual machine creator no longer wants the virtual machine and has marked it for deletion.
- D. The virtual machine exists in the vCenter Server database, but the ESXi hosts no longer recognize it.

ANSWER: D

QUESTION NO: 11

Which two choices are VMware-recommended ESXi syslog configurations? (Choose two.)

- A. Remote logging to a central host.
- B. Store logs in the in-memory filesystem.
- C. Configure persistent logging to a datastore.
- D. Configure logging to the vCenter Server.

ANSWER: A C

Explanation:

Take the following measures to increase the security of the host.

Configure persistent logging to a datastore. By default, the logs on ESXi hosts are stored in the in-memory file system. Therefore, they are lost when you reboot the host, and only 24 hours of log data is stored. When you enable persistent logging, you have a dedicated record of server activity available for the host.

Remote logging to a central host allows you to gather log files onto a central host, where you can monitor all hosts with a single tool. You can also do aggregate analysis and searching of log data, which might reveal information about things like coordinated attacks on multiple hosts.

Configure remote secure syslog on ESXi hosts using a remote command line such as vCLI or PowerCLI, or using an API client.

Query the syslog configuration to make sure that a valid syslog server has been configured, including the correct port.

QUESTION NO: 12

Which Memory Performance Solution requires VMware Tools to be installed on the guest operating system of the VM?

- A. Memory swapping to storage
- B. Host Cache
- C. Memory Ballooning
- D. VM swap file

ANSWER: C**QUESTION NO: 13**

An administrator is monitoring a High Availability (HA) and Distributed Resource Scheduler (DRS) enabled cluster and has noticed that virtual machines in the cluster are being migrated without user intervention.

Why is this happening?

- A. The DRS Automation level is set to Fully Automated.
- B. The Automation level is set to Automatic.
- C. The DPM Threshold is set to Aggressive.
- D. The Power Management feature is configured.

ANSWER: A**QUESTION NO: 14**

How are ports scaled on vSphere Standard Switches (vSS)?

- A. Ports on a vSS can be dynamically scaled up and down.

- B.** Ports on a vSS can only be statically scaled up or down.
- C.** Ports on a vSS can only be dynamically scaled down.
- D.** Ports on a vSS can only be dynamically scaled up.

ANSWER: A

QUESTION NO: 15

In the vSphere Web Client, what are the records of user actions or system actions that occur on objects in vCenter Server or on a host? (Choose the best answer.)

- A.** Events
- B.** Alarm Actions
- C.** System Logs
- D.** Alarms

ANSWER: A
