QUESTION NO: 3

A customer needs to implement CHAP on an IBM Storwize V7000.

What does CHAP provide?

- A. It provides the mechanism for LUN masking
- B. It provides authentication using username and password
- C. It manages multipathing and load balancing
- D. It manages the IQN for a group of hosts

ANSWER: B**QUESTION NO: 4**

A customer wants to know the advantage of DRAID over traditional RAID

What should the technical specialist explain?

- A. The hot spare space moves around the RAID array
- B. No rebuild area capacity is required
- C. All drives participate in application I/O
- D. _____ It is a dynamic form of RAID that automatically adjusts the RAID level to performance needs

ANSWER: C**QUESTION NO: 5**

A customer has a single, non-IBM storage system with 100 drives of the same capacity. The storage administrators spend most of their time trying to eliminate hot spots. The customer is considering an IBM Storwize V5020 purchase with approximately the same number of drives.

Which IBM Storwize feature helps resolve these issues?

- A. A single storage pool
- B. Volume migration
- C. HyperSwap

D. Auto-storage pool balancing

ANSWER: B

QUESTION NO: 6

A customer wants to do application testing in the disaster recovery site located ten kilometers away over fiber and wants to use IBM Spectrum Protect Snapshot to create the application-aware clones of the database volumes.

Which two additional features are needed to create these clones? (Choose two.)

- A. Full System Replication Manager
- B. IBM Copy Services Manager
- C. Volume mirroring
- D. FlashCopy
- E. Remote Mirror

ANSWER: D E
