- D. allows calls to traverse the firewall
- E. provides phone book search functionality
- F. controls calls to and from multipoint control units

**ANSWER: E F**

**QUESTION NO: 2**

Your client needs a simple, single-screen solution for a small meeting room that supports 1080p video. Which codec should you recommend?

- A. Cisco TelePresence System Quick Set C20
- B. Cisco TelePresence Codec C40
- C. Cisco TelePresence Codec C90
- D. Cisco TelePresence Codec C60

**ANSWER: A**

**QUESTION NO: 3**

An H.323 TelePresence system can successfully call a second H.323 TelePresence system but when connecting to a SIP TelePresence system video does not work. What is a possible reason for this problem?

- A. SIP and H.323 devices must be connected directly using IP addresses to prevent video corruption
- B. SIP and H.323 use different video protocols and cannot exchange video
- C. SIP to H.323 calls need to be routed through an H.320 gateway to support video
- D. The SIP-based device may not share a common video protocol with the H.323 devices

**ANSWER: A****QUESTION NO: 4**

Which protocol negotiates the protocols that are to be used in a SIP call?

- A. BFCP
- B. SIP
- C. H.245
- D. SDP

**ANSWER: D****QUESTION NO: 5**

Which three actions should you take if you are setting up a room to be optimal for the use of Telepresence technology?  
(Choose three.)

- A. Avoid noisy backgrounds
- B. Preset camera positions
- C. Cover up the camera
- D. Keep the doors open
- E. Close the curtains or blinds to eliminate natural light
- F. Turn off the light
- G. Open the curtains or blinds to gain natural light.

**ANSWER: A B E**
