Accounts file [↗](#)

Password parameters that are uploaded to the Vault are stored in a text file as Comma Separated Values (CSV) according to the downloaded template.

The first row in the template file contains the names of the password properties as specified in the [Create bulk upload of accounts API](#). The remaining lines in the file represent account objects and the properties of the account according to the properties in the first row of the file.

In order to add multiple accounts using a file, you need to create a CSV file that contains all the accounts that you want to upload, and the relevant properties for each account.
