## Topic Break Down

Topic	No. of Questions
Topic 1, Volume A	99
Topic 2, Volume B	100
Topic 3, Volume C	100
Topic 4, Volume D	266
<b>Total</b>	<b>565</b>

**QUESTION NO: 1**

Engineers are preparing to move guests to new compute and storage infrastructure. Basic network and SAN connectivity have been established. Which of the following options are valid NEXT steps to prepare for guest migration to the new infrastructure? (Select two.)

- A. Tag the live migration VLAN on the trunk to the new servers
- B. Correctly size and provision NFS LUNs on the new storage
- C. Zone HBAs
- D. Prep mirror VMs on new hosts for data migration
- E. Tag the SAN trunks with the correct guest network VLANs

**ANSWER: A D****QUESTION NO: 2**

Which of the following would a company implement to provide authentication to multiple websites that are delivered through PaaS?

- A. Federation services
- B. MAC
- C. Multi-factor authentication
- D. RBAC

**ANSWER: D****QUESTION NO: 3**

Which of the following is the BEST process to provide data access control to only the hosts authorized to access the LUN?

- A. RAID Masking
- B. LUN Masking
- C. RAID Mirroring

D. LUN Binding

**ANSWER: B**

**QUESTION NO: 4**

Which of the following are benefits of virtualization in a cloud environment? (Select two.)

- A. Application virtualization
- B. Presentation Virtualization
- C. Rapid deployment
- D. Server virtualization
- E. Reduce number of physical servers

**ANSWER: A E**

**QUESTION NO: 5**

Which of the following are SAN protocols? (Select TWO).

- A. Fibre Channel
- B. iSNS
- C. NFS
- D. iSCSI
- E. TCP/IP
- F. CIFS

**ANSWER: A D**

**QUESTION NO: 6**

Which of the following only uses Fibre Channel to implement a storage infrastructure?

- A. NFS

- B. SAN
- C. NAS
- D. SMB

**ANSWER: B**

#### QUESTION NO: 7

Several servers are connected to a SAN using three storage devices and FCoE for transmissions. These servers only need to access one SAN device. All servers, the SAN, and the HBA are virtualized. Which of the following should be used to ensure access is controlled appropriately between devices? (Select TWO).

- A. LUN Masking
- B. Hard Zoning
- C. Supernetting
- D. Soft Zoning
- E. Subnetting

**ANSWER: A D**

#### QUESTION NO: 8

Which of the following factors yields cost savings in cloud computing? (Select TWO).

- A. Shared resources
- B. Availability
- C. Ubiquitous access
- D. Multi-tenancy
- E. On premises

**ANSWER: A D**

#### QUESTION NO: 9

An administrator is tasked with ensuring that any new virtual server deployed will meet the minimum requirements for the environment. Which of the following items would be included in a baseline for a VM template? (Select TWO).

- A. Database
- B. CPU
- C. Encryption keys
- D. Security patches
- E. IP address

**ANSWER: B D**

#### QUESTION NO: 10

A company has multiple guest operating systems running in a virtual environment. An administrator would like to ensure all servers consistently receive the same IP addresses.

Which of the following should be implemented?

- A. Soft limit quotas
- B. Reservations
- C. Resource pooling
- D. Entitlement allocations

**ANSWER: B**

#### QUESTION NO: 11

In which of the following situations would an administrator use VLANs on a network?

(Select TWO).

- A. Create distinct broadcast domains
- B. Reduce network traffic on the WAN
- C. Reduce network traffic on the MAN
- D. Optimize traffic for an IaaS provider

E. Group related servers together on the same subnet

**ANSWER: A E**

#### QUESTION NO: 12

Students in a virtual lab must be able to upload and download homework assignments from personal external storage devices to their virtual desktops. Which of the following should the lab administrator implement to allow students to upload files?

- A. Resource pooling
- B. Secure FTP
- C. Storage quotas
- D. Port mapping

**ANSWER: D**

#### QUESTION NO: 13

The network administrator creates a DNS A record. Which of the following tools can identify which IP has been assigned to a FQDN?

- A. arp
- B. ipconfig
- C. nslookup
- D. tracert

**ANSWER: C**

#### QUESTION NO: 14

An administrator needs to add more guests in a virtual environment. Which of the following **MUST** the administrator take into account before adding additional VMs to a host? (Select TWO).

- A. Amount of RAM
- B. Number of virtual CPUs
- C. Number of CPU cores
- D. Number of power supplies
- E. Number of network cards

**ANSWER: A C**

**QUESTION NO: 15**

A system administrator is planning storage infrastructure to store backup copies of virtual machines that are at least 5GB in size. Which of the following file systems can be used in this scenario? (Select TWO).

- A. SMB
- B. RAW
- C. EXT
- D. FAT
- E. NTFS

**ANSWER: C E**

**QUESTION NO: 16**

A company wants to ensure their website, which allows customers to purchase products, is in a cluster at another geographical location. Which of the following solutions does this represent?

- A. Differential backups
- B. Data deduplication
- C. Cold site
- D. High availability

**ANSWER: C**

**QUESTION NO: 17**

The IT department of a company has received many calls concerning slow response time from a common application. The administrator can develop a solution after diagnosing the symptoms by using:

- A. New virtual resources.
- B. Customer surveys.
- C. Performance and monitoring tools.
- D. Scheduled maintenance time.

**ANSWER: C****QUESTION NO: 18**

An administrator, who operates a public cloud, has been tasked with implementing a secondary datacenter for failover purposes. Immediate replication has too much of an impact on the WAN link during production hours. Which of the following is the BEST option?

- A. Asynchronous replication
- B. Storage deduplication
- C. Cold site failover with offsite archiving
- D. Site mirroring

**ANSWER: A****QUESTION NO: 19**

An administrator is called in to determine why a virtual desktop has been unable to connect to the corporate network. Which of the following should be run to determine if the adapter is enabled? (Select TWO).

- A. ipconfig
- B. netstat
- C. ping
- D. ifconfig
- E. iwconfig

**ANSWER: A D**

**QUESTION NO: 20**

A company has just established a new branch office that needs to connect back to centrally hosted applications for day to day operations. The branch office has noted that access to many company services are slow and causing a drop in productivity. The company IT department has investigated a plan to improve performance across the link to the branch office without having to pay for more bandwidth from the Internet Service Provider. This plan includes hardware that after installation will allow for much faster access to day to day business applications. Which of the following terms BEST describes the action taken by the

IT department?

- A.** LAN optimization
- B.** WAN optimization
- C.** Load balancing
- D.** Bandwidth compression

**ANSWER: B**
