QUESTION NO: 16

A system administrator has limited security rights in a Dynamics 365 for Finance and Operations environment that has multiple legal entities. You have a service-level agreement (SLA) of 30 minutes for support requests.

The organizational administrator set up the printers for the organization.

A printer fails. The system administrator deletes the printer instance. Sensitive print jobs remain in the printer queue and must be purged. Existing permissions do not allow the system administrator to purge the print queue because the printer is attached to multiple legal entities.

You need to purge the documents from the print queue.

What should you do?

- A. Wait for the organizational administrator to return to purge the documents._
- B. Use the system administration utility to purge the documents.
- C. Use an account with administrative permissions on the network printer to purge the queue.
- D. Contact Microsoft technical support-

ANSWER: C

QUESTION NO: 17

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 for Finance and Operations security administrator.

When testing security setups, users report that certain roles are gaining access to sensitive information via a form in the system.

You must investigate which user roles have what visibility and access level to system objects, and then send a report to the implementation team to address security compliance concerns.

You need to report the information from the system.

Solution: Generate the User role assignments report.

Does the solution meet the goal?

A. Yes

B. No
