QUESTION NO: 1

A Qlik Sense environment has users from Active Directory. A system administrator creates a task to synchronize the users from Active Directory with Qlik Sense.

The system administrator adds a new user to Active Directory, and manually executes the synchronization task in Qlik Sense. The administrator observes that the new user was NOT added to the Qlik Sense environment.

What should the system administrator do to ensure the new user is added?

- A. Look for an LDAP filter on the UDC for users from Active Directory
- B. Ensure the synchronization task has sufficient rights to find new users
- C. Wait 10 minutes for the new user in Active Directory to become visible for Qlik Sense
- D. In the UDC, check Sync user data for existing users and re-run the synchronization task

ANSWER: D**QUESTION NO: 2**

A Qlik Sense environment uses user-based license types. A user, who can typically create new apps in Personal Work, can no longer create new apps. The personal Work area is NOT displayed for this user.

How should the system administrator resolve this issue?

- A. In License Management, verify that Analyzer access rules applies to this user
- B. In License Management, verify that Professional access rules applies to this user
- C. In Users, look up the user and verify that this user is assigned the ContentAdmin role
- D. In Audit, select Audit license rules, and verify there are no rules for this user

ANSWER: D**QUESTION NO: 3**

A Qlik Sense deployment is planned for 200 users initially. Within a year, the number of users will grow to 2000, with over 100 apps. Most of these users will be within the organization's firewall. There are plans to eventually allow access to some apps to users outside the firewall.

Which two deployment models will ensure secure access to Qlik Sense apps by authorized users outside the firewall? (Choose two.)

- A. Deploy a reverse proxy in the DMZ and configure it to forward all Qlik Sense traffic to the Qlik Sense servers on the corporate network.
- B. Enable all external users to connect to the corporate network via a secure VPN to access Qlik Sense apps.
- C. Deploy Qlik Sense in the DMZ and open all required ports to internal and external users.
- D. Deploy Qlik Sense in the corporate network, open all required firewall ports, and allow external users to access apps directly.
- E. Configure Qlik Sense in “off-line mode” for external users and allow them to access apps locally.

ANSWER: B D

QUESTION NO: 4

A system administrator must set up a backup strategy for a Qlik Sense shared persistence environment. This multi-node environment consists of one node and two consumer nodes.

Which three steps are required? (Choose three.)

- A. Back up the repository database on the central node
- B. Back up the certificate of the central node using MMC
- C. Back up the log and app data on the nodes
- D. Back up the certificates on the consumer nodes using MMC
- E. Back up the log and app data in the file share

ANSWER: A B E

QUESTION NO: 5

A company decides to move servers from on premise to a cloud. A system administrator performs a backup, restore, and brings the server online. When users open the app on the hub, they get an error message indicating the app could not be found.

The system administrator confirms that apps are present in the required location and NO changes have been made.

What could be causing the issue?

- A. Shared persistence path is NOT reachable
- B. Synchronized persistence is in place
- C. The app has been moved from one stream to another

D. The security rules were broken when the servers were migrated

ANSWER: A

QUESTION NO: 6

The sales department in an organization is consolidating from three regional sales groups to one global sales group. The department still has three different streams in the hub, one for each region. The organization needs the stream structure to match the department structure.

What should the administrator create to meet this requirement?

- A. A global sales group stream and three regional streams
- B. A custom property named "global" and bind it to all three streams
- C. A global sales group login security run
- D. A global sales group stream for all three regions

ANSWER: A

QUESTION NO: 7

A system administrator needs to troubleshoot an issue reported with Qlik Sense. The administrator confirms the following: NO hardware issues exist

- NO other processes are affecting Qlik Sense
- NO other systems report any issues
- The network team reports optimal performance

The system administrator decides to check the task execution details and token allocations.

Which two tools should the system administrator use? (Choose two.)

- A. Log Monitor
- B. Sessions Monitor
- C. Operations Monitor
- D. Reloads Monitor
- E. License Monitor

ANSWER: D E

QUESTION NO: 8

A system administrator needs to upgrade the environment to the latest version of Qlik Sense Enterprise and decides to create a backup.

Which three items should the administrator back up? (Choose three.)

- A. Qlik Sense certificates
- B. Qlik Sense Repository Database
- C. Qlik Sense ProgramData files
- D. Shared persistence file share
- E. Qlik Sense apps

ANSWER: A B D**QUESTION NO: 9****BASIC**

Resource filter

App.Object_*

Actions

- Create
- Read
- Update
- Delete
- Publish
- Change owner

ADVANCED

```
!resource.App.stream.Empty()  
and resource.App.HasPrivilege("read")  
and (  
  resource.objectType = "userstate"  
  or (  
    resource.objectType = "sheet"  
    or resource.objectType = "story"  
    or resource.objectType = "bookmark"  
    or resource.objectType = "hiddenbookmark"  
    or resource.objectType = "snapshot"  
    or resource.objectType = "embeddedsnapshot"  
    and user.group != "AAACConsumer"  
  )  
)  
and !user.IsAnonymous()
```

Context Only in hub

Refer to the exhibit.

A system administrator creates the security rule shown. No other custom security rules exist.

What effect will the security rule have when applied to a user?

- A. If the user is in AAACConsumer group, the user can create app objects in published apps
- B. If the user is NOT in AAACConsumer group, the user cannot create sheets
- C. If the user is NOT in AAACConsumer group, the user can create app objects in published apps
- D. If the user is NOT in AAACConsumer group, the user can create app objects in non-published apps

ANSWER: A
