QUESTION NO: 1

What are three examples of hypervisors? (Choose three.)

- A. VMware ESXi
- B. Juniper vSRX
- C. KVM
- D. OpenStack Nova
- E. Microsoft Hyper-V

ANSWER: A C E

QUESTION NO: 2

Which SDN solution allows the control plane to remain on legacy hardware as a stop-gap measure until you are ready to replace the current hardware?

- A. SDN using NVGRE
- B. SDN as an overlay
- C. SDN using an API
- D. open SDN

ANSWER: B

QUESTION NO: 3

Click the Exhibit button.

```
{
  BgpPeerInfoData: {
    state_info: {
      last_state: "Idle",
      state: "Idle",
      last_state_at: 1394778927107639
    },
    families: [
      "IPv4:Unicast"
    ],
    peer_type: "external",
    local_asn: 54321,
    configured_families: [
      "inet-vpn"
    ],
    event_info: {
      last_event_at: 1394778927107880,
      last_event: "fsm::EvStart"
    },
    local_id: 181196816,
    send_state: "not advertising",
    peer-address: "10.204.216.253",
    peer-id:181197053,
    hold_tine: 90,
    peer_asn: 12345
  }
}
```

Within your Contrail cluster, a BGP peer is not advertising routes as expected. After issuing the curl <http://:8081/analytics/uves/bgp-peers> command, you receive the output show in the exhibit.

What is causing this problem?

- A. an incorrect local ID
- B. an incorrect peer type
- C. an incorrect IP address
- D. an incorrect family

ANSWER: D

QUESTION NO: 4

Which Kubernetes resource defines the traffic allowed to reach the pod?

- A. SecurityGroup
- B. NetworkPolicy
- C. Ingress
- D. IPAM

ANSWER: B

Explanation:

Reference: https://www.juniper.net/documentation/en_US/contrail19/topics/concept/k8s-network-policy.html

QUESTION NO: 5

Which two statements about Kubernetes clusters are correct? (Choose two.)

- A. The master coordinates the cluster.
- B. The minions are responsible for running the applications.
- C. The nodes are responsible for running the applications.
- D. The pod controller coordinates the cluster.

ANSWER: A B

Explanation:

Reference: https://www.juniper.net/documentation/en_US/contrail19/topics/task/installation/provisioning-k8s-cluster.html

QUESTION NO: 6

What are two supported methods to add a new Contrail compute node using Contrail Command? (Choose two.)

- A. From the Web UI, add a new server and assign it as a compute node to the existing cluster.
- B. From the CLI on the Contrail Command server, edit the instances.yml file and add the new node information.
- C. From the CLI on the Contrail Command server, edit the command_servers.yml file and add the new node information.

D. From the CLI on the Contrail Command server, edit the testbed.py file and add the new node information.

ANSWER: A B

Explanation:

Reference: https://www.juniper.net/documentation/en_US/contrail19/topics/task/configuration/adding-new-compute-node-cc.html

QUESTION NO: 7

Which endpoint type in Contrail Security provides multidimensional segmentation such as application, tier, deployment or site parameters?

- A. domain
- B. virtual network
- C. tag
- D. address group

ANSWER: C

Explanation:

Reference: https://www.juniper.net/documentation/en_US/contrail20/topics/concept/security-policy-enhancements.html

QUESTION NO: 8

You are creating an AppFormix dynamic alarm definition with a dynamic threshold.

In this scenario, which three parameters are available? (Choose three.)

- A. baseline analysis algorithm
- B. state
- C. owner
- D. sensitivity
- E. learning period duration

ANSWER: A D E

Explanation:

Reference: https://www.juniper.net/documentation/en_US/appformix/topics/concept/appformix-alarms.html

QUESTION NO: 9

You are asked to create a connection between a VM and two ports on a QFX leaf device in the fabric.

Which Contrail feature must you configure to accomplish this task?

- A. virtual network policy
- B. floating IP
- C. virtual port group
- D. virtual network with route leaking

ANSWER: C**Explanation:**

Reference: https://www.juniper.net/documentation/en_US/contrail19/information-products/pathway-pages/contrail-fabric-lifecycle-management-feature-guide.pdf#page=113&zoom=100,100,712

QUESTION NO: 10

Which three encapsulations does Contrail support for overlay networking? (Choose three.)

- A. MPLS over GRE
- B. EVPN
- C. VXLAN
- D. MPLS over UDP
- E. MPLS over IPsec

ANSWER: A C D**Explanation:**

Reference: <https://www.juniper.net/us/en/local/pdf/whitepapers/2000535-en.pdf>
