**QUESTION NO: 1**

Which IP connection characteristic is unique to file-based storage access?

- A. Link Aggregation
- B. VLAN tagging
- C. Bandwidth throttle
- D. Mirrored writes

**ANSWER: B****QUESTION NO: 2**

A storage administrator is considering adding another application to run on their Unity 300 but they are concerned about the application's performance. They ask what is considered "normal" for CPU utilization. Based on Dell EMC best practices, what should be your response?

- A. Below 50%
- B. 50% - 70%
- C. 70% - 90%
- D. 90% - 95%

**ANSWER: B****Explanation:**

References: <https://www.emc.com/collateral/white-papers/h15093-dell-emc-unity-best-practices-guide.pdf> (p.9)

**QUESTION NO: 3**

You are creating a dynamic pool using 12 drives in the Unisphere GUI. Which RAID stripe width will be set when creating the dynamic pool using RAID 6?

- A. 4+2
- B. 6+2
- C. 8+2

D. 10+2

**ANSWER: D**

**Explanation:**

Reference: <https://www.dellemc.com/en-us/documentation/unity-family/unity-p-pool-config/01-unity-pool-br-intro-to-pools.htm>

#### QUESTION NO: 4

How is a Local LUN Move initiated?

- A. Select the LUN, then select the Pool to move the LUN into, then choose the Move operation
- B. Choose the Move operation, then select a LUN, then select the Pool to move the LUN into
- C. Select a LUN, then choose the Move operation, then select the Pool to move the LUN into
- D. Select the Pool to move the LUN into, then choose the Move operation, then select a LUN

**ANSWER: C**

**Explanation:**

Reference: <https://www.dellemc.com/en-us/documentation/unity-family/unity-p-config-luns/02-configuring-lun-move.htm>

#### QUESTION NO: 5

Which operation can be performed on the General tab of the LUN Properties page?

- A. Extend the LUN
- B. Grant Host access
- C. Replicate the LUN
- D. Set Host I/O limits

**ANSWER: A**

#### QUESTION NO: 6

What is the maximum number of LUNs in a Consistency Group?

- A. 25

- B. 50
- C. 75
- D. 100

**ANSWER: C**

**Explanation:**

The consistency group (CG) term is used for grouping several LUNs together in order to ensure write-order consistency over several volumes. Each LUN can contain up to 2 TB, and the total supported capacity can be up to 150 TB. References: <https://en.wikipedia.org/wiki/RecoverPoint>

**QUESTION NO: 7**

You are initializing a Dell EMC Unity XT system. What are the default user credentials?

- A. admin/password 123#
- B. administrator/password123#
- C. admin/Password123#
- D. administrator/Password123#

**ANSWER: A**

**Explanation:**

Reference: <https://community.emc.com/docs/DOC-63392>

**QUESTION NO: 8**

What is the default file system quota policy on the Dell EMC Unity XT storage array?

- A. File Size
- B. Blocks
- C. User Quotas
- D. Tree Quotas

**ANSWER: A**

**Explanation:**

When using quotas, administrators have the option to calculate file system usage in one of two ways. This option, which is configured on a per file system basis, may be set to File Size or Block based calculation. When using the default setting of File Size, disk usage is calculated based on logical file sizes in 1K increments. Because of this, it is possible that used space may be reported from a quota perspective as more than the actual usage if holes exist in a sparse file. This setting is generally recommended for Windows environments. The Block quota policy calculates disk usage in 8-16KB file system blocks, and is accurate with regard to the actual allocation down to the block level. This setting is recommended for UNIX environments.

## QUESTION NO: 9 - (DRAG DROP)

DRAG DROP

What is the correct order of steps to attach a snapshot to a host?

Select and Place:

Select hosts	Step 1
Select access type	Step 2
Select the snapshot	Step 3
System optionally creates copy of snapshot	Step 4

ANSWER:

Select hosts	Select access type
Select access type	Select hosts
Select the snapshot	Select the snapshot
System optionally creates copy of snapshot	System optionally creates copy of snapshot

Explanation:

Reference: <https://community.emc.com/docs/DOC-66549>

**QUESTION NO: 10**

Asynchronous remote replication is configured for a NAS Server and its associated file systems. What operations can be performed to make data available if the primary site goes down?

- A. Failover operation on the NAS Server session, then a Failover operation on each of the file system sessions
- B. Failover with Sync operation on each of the file system sessions, then a Failover with Sync operation on the NAS Server session.
- C. Failover operation on each of the file system session, then a Failover operation on the NAS Server session.
- D. Failover with Sync operation on the NAS Server session, then a Failover with Sync operation on each of the file system sessions.

**ANSWER: A****QUESTION NO: 11**

What block size do Dell EMC Unity XT systems use to copy highly accessed blocks of data from spinning drives into FAST Cache?

- A. 16 KB
- B. 32 KB
- C. 64 KB
- D. 128 KB

**ANSWER: C****Explanation:**

Reference: <https://www.emc.com/collateral/white-papers/h15086-emc-unity-fast-technology-overview.pdf> (2)

**QUESTION NO: 12**

The LUN Snapshot Attach to Host operation is being performed with Read/Write Access selected. By default, what does the Dell EMC Unity XT system do before beginning the attach process?

- A. Detaches the host from the Snapshot of any other LUN
- B. Creates a Snapshot of the LUN
- C. Detaches existing attached hosts from the LUN Snapshot tree
- D. Creates a copy of the Snapshot

**ANSWER: D**

**Explanation:**

Reference: <https://www.dell.com/resources/en-us/asset/white-papers/products/storage/h15089-dell-emc-unity-snapshots-and-thin-clones.pdf> (25)

**QUESTION NO: 13**

A storage administrator notices that all the configured HOST I/O Limits policies are Globally Paused.

How can the administrator put these policies into the Active state?

- A. Select the Resume option on the Host I/O Limits Settings page
- B. Select the Resume action for each Host I/O limits policy
- C. Select the Active action for each Host I/O Limits policy
- D. Select the Active option on the Host I/O Limits Settings page

**ANSWER: B**

**QUESTION NO: 14**

A user is having difficulty troubleshooting a Unity storage system and the service provider has been contacted for assistance. The service provider needs to run some service commands on the Storage Processors to troubleshoot the issue further.

Which step must be taken to allow the service provider remote access to the storage system?

- A. Enable SSH on the storage system
- B. Set the Unisphere preferences to "Optimize" for remote access
- C. Specify the SMTP configuration
- D. Specify the Remote Logging configuration

**ANSWER: A**

**QUESTION NO: 15**

What component is a hot-pluggable CRU?

- A. DPE BBU
- B. DPE I/O module

- C. 80 drive DAE cooling module
- D. 25 drive DPE cooling module

**ANSWER: C**

**Explanation:**

Reference: <https://www.emc.com/collateral/TechnicalDocument/docu69319.pdf>
