QUESTION NO: 2

You plan to use Power Automate to perform data-management tasks when users interact with sales opportunities in Dynamics 365.

You need to identify the three types of events that can generate a trigger for the tasks.

Which three types of events should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. when a record is displayed in a view
- B. when a record is deleted
- C. when a record is created
- D. when a record is updated
- E. when a record is read

ANSWER: B C D

Explanation:

Triggers like When a record is created, When a record is updated, and When a record is deleted initiate your flow within a few minutes of the event occurring. In rare cases, your flow can take up to 2 hours to trigger.

QUESTION NO: 12

A company runs a call center to handle customer support inquiries.

The company tracks metrics including the number of incoming calls and call resolution rates. The company wants to display the metrics on a shared screen that is visible to all call center staff.

You need to recommend a visualization solution for the company.

Which Power Platform feature should you recommend?

- A. AI Builder
- B. Power Automate

- C. Power Apps
- D. Power BI

ANSWER: D

QUESTION NO: 13

You are creating a canvas app to enable users to order tickets. You create an input field for users to input the number of tickets to order.

Users must order a maximum of four tickets and a minimum of two tickets. If a user enters a number except 2, 3, or 4, the input field must display in red. If a user enters the numbers 2, 3, or 4, the input field must display in green.

You need to color the input field based on the user input.

What should you use?

- A. formula
- B. calculated column
- C. gallery
- D. connector

ANSWER: A

QUESTION NO: 14

A company uses Microsoft 365, Power Platform, and Dynamics 365. You do not assign permissions to any licensed users.

Users are able to create and edit Power Apps canvas apps.

In which environment are users creating and editing the apps?

- A. Production
- B. Default
- C. Sandbox

ANSWER: B

QUESTION NO: 15

A company performs on-site inspections and services for air industrial equipment.

Field technicians must perform a series of maintenance checks every time they visit a customer site. Every technician performs maintenance tasks in a different order. Some technicians miss steps.

You need to ensure that all technicians perform the same steps in the same order.

What should you use?

- A. Business process flow
- B. AI Builder
- C. Business rule
- D. Virtual Agent

ANSWER: A**Explanation:**

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.
