**QUESTION NO: 1**

A network engineer wants to enable remote beacon management so that an Aruba AP can manage battery-powered beacons. Which device can be plugged into an Aruba AP to enable this management?

- A. battery-powered beacon
- B. USB Wi-Fi adapter
- C. sensor
- D. USB beacon

**ANSWER: A****QUESTION NO: 2**

A network engineer must decide between USB beacons or an Aruba Sensor for an Aruba Beacon Management deployment. How do the features of USB beacons compare to an Aruba Sensor? (Select two.)

- A. An Aruba Sensor can act as a Wi-Fi client and a USB beacon cannot.
- B. An Aruba Sensor can support beacon management and a USB beacon cannot.
- C. A USB Beacon can be used for Indoor positioning and an Aruba Sensor cannot.
- D. A Wi-Fi Sensor can support proximity push notifications and a USB beacon cannot.
- E. A USB beacon can support remote beacon management and an Aruba Sensor cannot.

**ANSWER: A B****QUESTION NO: 3**

A network engineer troubleshoots an ALE server and tries to identify the client information in ALE. What does ALE interact with to gather client information? (Select three.)

- A. AirWave
- B. Aruba instant
- C. Meridian Editor

- D. BLE Beacons
- E. Aruba Controller

**ANSWER: B C E**

#### QUESTION NO: 4

A customer uses a Meridian-powered app to get directions from one location to another in a venue. The customer does not see a blue dot on the map to indicate the location of the device. Which method will be used to provide directions?

- A. USB beacon"
- B. self-guided wayfinding
- C. location-enabled app
- D. battery-powered beacon

**ANSWER: A**

#### QUESTION NO: 5

A WLAN engineer needs to design a remote beacon management solution to support firmware updates to Aruba beacons. The WLAN engineer tries to determine the correct beacon type for the deployment.

What is accurate and useful information to help with this determination? (Select two.)

- A. USB-enabled APs use the controller network infrastructure to upload beacon management data to the Meridian Editor.
- B. AP-325S have a built-in Bluetooth radio to enable remote beacon management.
- C. Battery-powered beacons have both Bluetooth and Wi-Fi radios for remote beacon management.
- D. USB beacons have only WLAN radios, to be used for both location and remote beacon management.
- E. Battery-powered beacons use the built-in Wi-Fi radio to enable remote beacon management.

**ANSWER: A B**

#### QUESTION NO: 6

>> Textbox end

An administrator has been assigned a task to improve the accuracy of the asset tracking. What are two recommendations that can help to improve the accuracy? (Select two.)

- A. Deploy Control Tags
- B. Three Control Tags per AP
- C. Two Beacons per AP
- D. Deploy more Beacons

**ANSWER: A D**

#### **QUESTION NO: 7**

ALE can provide Information about which type of connections? (Select two.)

- A. associated clients
- B. unassociated clients
- C. only clients that run the Venue App
- D. only clients that run the Beacons App

**ANSWER: A C**

#### **QUESTION NO: 8**

A network engineer accesses the Meridian Editor and notices there is no access to pages, events, and themes. The engineer can access maps, placemarks, and notifications. What could be the reason?

- A. The pages, events, and themes are not enabled for the app.
- B. The Meridian Editor needs the license installed.
- C. The app is an SDK app.
- D. The app is a location-based app.

**ANSWER: C**

#### **QUESTION NO: 9**

A network engineer plans to deploy proximity beacons for a venue. What is helpful for the network engineer to know about these beacons?

- A. They are used to enable push notifications on mobile devices.
- B. They are associated with a placemark for push notifications on mobile devices.
- C. Their power level is configurable to enable blue dot on a mobile device.
- D. They are used for blue dot location tracking on a mobile device.

**ANSWER: D**

**QUESTION NO: 10**

An app developer uses the Beacons App to place Beacons on a map and receives the error message Error Loading Beacons. How can the app developer resolve this issue?

- A. Move the beacon to another location on the map.
- B. Close the Beacons App and open it again.
- C. Delete the beacon and try to add it again to the map.
- D. Delete the Beacons App and reinstall it.

**ANSWER: D**
