QUESTION NO: 1

A customer wants to implement Single Sign-On (SSO) using Kerberos for the Content Platform Engine, In what state should the non-SSO Content Platform Engine be in before starting?

- A. Be able to start the non-SSO IBM Enterprise Records administration desktop and log in with a username and password.
- B. Be able to start the non-SSO IBM Content Search Services administration desktop and log in with a username and password.
- C. Be able to start the non-SSO IBM Content Navigator administration desktop and log in with a username and password.
- D. Be able to start the non-SSO Administration Console for Content Platform Engine (ACCE) and log in with a username and password.

ANSWER: A**QUESTION NO: 2**

The Content Platform Engine uses ODWEK to access which Fixed Content Device?

- A. IBM Content Manager OnDemand
- B. IBM Content Manager
- C. Documentum Content Server
- D. IBM FileNet Content Services

ANSWER: A**Explanation:**

https://www.ibm.com/docs/he/SSNW2F_5.2.1/com.ibm.p8.cfs.admin.doc/cfsod004.htm#:~:text=Content%20Platform%20Engine%20uses%20ODWEK%20to%20access%20the%20Content%20Manager%20OnDemand%20repositories.

QUESTION NO: 3

Which command line utility is used to view information about a configured workflow system in a Content Platform Engine environment?

- A. wftool
- B. petool
- C. vwtool
- D. cpetool

ANSWER: C**QUESTION NO: 4**

A Content Platform Engine environment is installed and configured in a highly available environment using WebSphere Application Server on application servers named myserver1.com and myserver2.com in a cluster named mycluster using the default HTTP transport port. The environment also includes a load balancer with the virtual server name myloadbalancer.

What is the typical URL used to connect to the Content Platform Engine environment using Content Engine Web Services?

- A. <http://myserver2/wsi/FNCEWS40MTOM/>
- B. <http://myloadbalancer/wsi/FNCEWS40MTOM/>
- C. <http://myserver1/wsi/FNCEWS40MTOIW/>
- D. <http://mycluster/wsi/FNCEWS40MTOM/>

ANSWER: C**QUESTION NO: 5**

A Content Platform Engine is installed and configured in a highly available environment using WebSphere Application Server on application servers named myserver1.com and myserver2.com in a cluster named mycluster. The typical URI used to connect to the Content Platform Engine environment using the EJB protocol is:

corbaloc::myserver1.com;:myserver2.com:/cell/clusters/mycluster/FileNet/Engine

What is the default bootstrap port number that would be used in this URI?

- A. 9810
- B. 9180
- C. 2908
- D. 2809

ANSWER: A**Explanation:**

<https://www.ibm.com/docs/en/filenet-p8-platform/5.2.0?topic=chacpe-content-platform-engine-in-application-server-cluster-by-using-ejb-transport>

QUESTION NO: 6

Which type of user is required to install Content Platform Engine on AIX?

- A. LDAP user with UNIX rights

- B. Any user account that has the ability to log onto the server
- C. root user or user with su access to root
- D. Operating system user with appropriate file system permissions

ANSWER: D

Explanation:

<https://www.ibm.com/docs/en/filenet-p8-platform/5.5.x?topic=accounts-content-platform-engine-installer-account>

QUESTION NO: 7

Which account can create, modify, and delete Content Platform Engine P8 domain-level resources?

- A. Workflow system administrator
- B. Content Platform Engine application server installation administrator
- C. GCD Administrator
- D. Content Platform Engine Service User

ANSWER: B

QUESTION NO: 8

To install the Legacy Component Manager on a server upgraded from 5.2.x, which Content Platform Engine installer option needs to be selected?

- A. Process Engine Client
- B. Content Engine Client
- C. Content Platform Engine Client
- D. Tools

ANSWER: C

QUESTION NO: 9

Within a FileNet P8 environment, what is an essential high availability building block?

- A. Preventing single points of failure
- B. Use of LTPA keys for intra-cell communications

- C. One instance of Content Platform Engine
- D. A group of servers where there is only one instance of each ECM component

ANSWER: A

QUESTION NO: 10

Which file is used to determine if there were any issues with the data upgrade of a Content Platform Engine?

- A. cpe_upgrade.log
- B. filenet_data__upgrade.log
- C. p8_upgrade_status.log
- D. p8_server_error.log

ANSWER: C
