QUESTION NO: 1

Failover is the capacity to switch, often automatically, to another system or resource in the event of a failure. How does failover assist in the provision of cloud services?

- A. It assists providers in ensuring continuity of service when there is a problem.
- B. It automatically restarts the system in case of a failure.
- C. It builds a back-up while the system is active.
- D. It provides hidden storage to be used when needed.

ANSWER: A**QUESTION NO: 2**

What is the most important feature of a virtualized environment?

- A. Multiple applications can be used by a single user.
- B. Multiple computers can be connected to a single network.
- C. Multiple operating systems can be used on a single hardware platform
- D. Multiple users can be active on a single network.

ANSWER: C**QUESTION NO: 3**

What is a key advantage of a content management system?

- A. It distributes content to users.
- B. It is a management system for distributed computer environments.
- C. It provides the possibility to connect to multiple web-sites without using a password.
- D. It reduces repetitive duplicate input.

ANSWER: D**QUESTION NO: 4**

What is not an operational benefit of Cloud Computing?

- A. Instant server deployment
- B. Less IT staff
- C. Managed services
- D. Possibility of back-ups as a service

ANSWER: B

QUESTION NO: 5

How might moving to Cloud computing enhance user's ongoing experience of software applications?

- A. by accomplishing quick and efficient application updates
- B. by increasing the access to information available on the Internet
- C. by moving internal systems with performance problems to the Cloud
- D. by passing problems with applications to the Cloud provider

ANSWER: A

QUESTION NO: 6

Where does the abbreviation SOA stand for?

- A. Service Oriented Architecture
- B. Service Oriented Application
- C. Service Organized Architecture
- D. Service Organization Agency

ANSWER: A

QUESTION NO: 7

What might be considered an advantage for someone storing valuables in a bank in comparison to someone storing data in the Cloud?

- A. The bank customer knows where the bank is located and which locker is used to store valuables.
- B. The bank uses physical measures to protect your valuables.

- C. The bank has better protection against fires and floods.
- D. The bank has better opening hours.

ANSWER: A

QUESTION NO: 8

The Total Cost of Ownership (TCO) of a Cloud solution may change and in the worst case increase.

How can this happen?

- A. In certain cases the TCO is intentionally shortened by lack of vision on future developments.
- B. In certain cases the TCO is just not the right measure for calculating relevant costs and expenditures.
- C. In some cases customers have not acted upon a good business case.
- D. In some cases only the distribution of different components that add up to the TCO may change.

ANSWER: D

QUESTION NO: 9

What is the generally accepted communication protocol on the Internet?

- A. Net BIOS
- B. OSI
- C. SNA
- D. TCP/IP

ANSWER: D

QUESTION NO: 10

What is the major benefit for software developers with regard to Cloud platforms?

- A. Connectivity with other platforms makes it easier for users to connect to the Cloud.
- B. Software developers can design, build and test their solutions faster.
- C. Software developers do not benefit from Cloud platforms.
- D. Solutions may be marketed on any platform.

ANSWER: B
