Topic 1, Platform Features	10
Topic 2, Commerce and Accelerator	11
Topic 3, Data Modeling	8
Topic 4, Platform Basics	8
Topic 5, Customer Experience	9
Topic 6, Search and Navigation	8
Topic 7, Orders	9
Topic 8, Backoffice and Backoffice Cockpits Modifications	4
Topic 9, User Management	4
Topic 10, PCM Basics and Price Modeling	4
Topic 11, Commerce Cloud and Cloud Portal Basics	5
Total	80

QUESTION NO: 1

How can CronJobs be started? (Choose three.)

- A. CronJobs can be started and aborted only if implemented as abortable.
- B. CronJobs can be started manually via the command line by running "ant runcronjob".
- C. CronJobs can be started and aborted automatically if a configurable time threshold is exceeded.
- D. CronJobs can be started manually using flexible search.
- E. CronJobs can be started manually via the Backoffice administration perspective.

ANSWER: B C E**Explanation:**

QUESTION NO: 2

How many category items will the following ImpEx create?

```
$prodCat=electronicsProductCatalog
```

```
$version=Staged
```

```
$catVersion=catalogVersion(catalog(id[default=$prodCat]),version[default=$version])
```

```
INSERT_UPDATE Category;code[unique=true];$catVersion[unique=true]
```

```
;test_category;electronicsProductCatalog
```

```
;test_category;apparelProductCatalog;$version
```

```
;test_category;:Online
```

```
;test_category;
```

- A. 2
- B. 3
- C. 1
- D. 4

ANSWER: C**QUESTION NO: 3**

Your solution has been live for a significant period of time and you now need to update project data across multiple environments.

What is the recommended approach for updating the project data?

- A.** With each deployment, manually import the ImpEx files via the hybris Admin Console or via the ant importimpex target.
- B.** Create a class that extends AbstractSystemSetup and use the @SystemSetup annotation with TYPE.PROJECT, which can run an import of your ImpEx files during an update.
- C.** Extract a SQL script of all the changes in a single environment, which a DBA can then run directly against the database for all remaining environments.
- D.** Create a class that extends AbstractPatchesSystemSetup and configure any data patches, which can run an import of your ImpEx files during an update.

ANSWER: B**Explanation:**

QUESTION NO: 4

You need to create a CronJob for an automated task that will be performed every day at midnight. Which steps would you follow? (Choose three.)

- A.** Register the JobPerformable bean in your extension's Spring configuration file.
- B.** Create a CronJob item and a trigger for midnight using ImpEx or Backoffice.
- C.** Perform a system update for essential data.
- D.** Perform a system update for sample data.
- E.** Define the Cronjob logic in a class that implements the JobPerformable interface.

ANSWER: A B C**Explanation:**

Reference: <https://help.sap.com/viewer/50c996852b32456c96d3161a95544cdb/2105/en-US/e384c5a25b9a4f57af1fb9c2d2afb0c3.html>

QUESTION NO: 5

When are consignments created for an order?

- A. After the order is placed and after it has been sourced successfully
- B. After the order is placed, but before it is sourced successfully
- C. When the user adds items to the cart
- D. When an administrator approves the order

ANSWER: A**Explanation:**

QUESTION NO: 6

You are asked to define a new business process.

What steps do you perform? (Choose three.)

- A. Define the process in BPMN format within Backoffice.
- B. Define the actions as Spring beans.
- C. Define actions as new item types.
- D. Create actions in Java code.
- E. Define the process in XML format and import it via ImpEx.

ANSWER: A B D**Explanation:**

QUESTION NO: 7

Which interface would you inject into your class to allow you to trigger an indexing operation via API?

- A. IndexerListener
- B. IndexerQueryContext
- C. IndexerService

D. IndexerStrategy

ANSWER: C

Explanation:

Reference: <https://help.sap.com/viewer/d0224eca81e249cb821f2cdf45a82ace/1811/en-US/8bf44e1b8669101491d0e9f1d50c5eed.html>

QUESTION NO: 8

You are creating a new SolrIndexProperty as a facet and want to define it using facet ranges.

What do you need to do to achieve that?

- A.** • Define a list of upper range boundaries in the SolrIndexProperty.
• Trigger the generation of SolrValueRange items from the Backoffice.
- B.** • Define the cadence of the ranges in the SolrIndexProperty.
• Provide the sample data that is used to generate the SolrValueRangeSet.
- C.** • Define the number of ranges in the SolrIndexProperty.
• Provide sample data that is used to generate the SolrValueRange items.
- D.** • Create SolrValueRange items to define the range boundaries.
• Create a SolrValueRangeSet, add SolrValueRange items, and add to the SolrIndexProperty.

ANSWER: C

QUESTION NO: 9

What are the advantages of using classification attributes? (Choose two.)

- A.** Changes can be made without loss of classification attribute data.
- B.** Classification attributes can be applied to any type.
- C.** Business users can create or modify classification attributes using the Backoffice.
- D.** Rebuilding and redeployment are NOT required.

ANSWER: A D

QUESTION NO: 10

How are relationships modeled in the database? (Choose three.)

- A. Many-to-many relationships are defined as a table.
- B. One-to-many relationships are defined on a column.
- C. One-to-many relationships are stored in the links table.
- D. One-to-many relationships have an order column when ordered="true".
- E. One-to-many relationships are binary objects.

ANSWER: A B D**Explanation:**
