QUESTION NO: 1

Martin has Create Attachments permission in a software project, but he cannot attach anything to issues in Approved status.

What is the problem?

- A. There is a workflow step property configured.
- B. He is not a member of a security level.
- C. There is a workflow condition configured.
- D. The Attachment field is missing from the screen for that issue type.
- E. He does not have the correct project permission.

ANSWER: E**QUESTION NO: 2**

Beehive Bank wants to implement Jira with the following requirements:

- Enforce the strictest possible security measures for user logins.
- Allow external users to create their own user logins.
- Use the Jira Internal Directory.

Which two login security options can you offer them? (Choose two.)

- A. Set Login Mode to Secure.
- B. Require character variety for the user name.
- C. Require that a password is not too similar to another user's password.
- D. Require a certain length for passwords.
- E. Require that a password is not too similar to the user name or email address.

ANSWER: A D**QUESTION NO: 3**

A project has hundreds of old completed issues which are cluttering up the reports, searches, and

dashboards.

The project administrator has the following requirements:

1. He wants to hide the old issues.
2. He wants to unhide issues, if needed.
3. He wants to control whether he himself sees the hidden issues, so they do not clutter his own daily work.

Which three configurations, when combined, will meet these requirements? (Choose three.)

- A. security level
- B. project permission
- C. workflow condition
- D. project role
- E. global permission
- F. group

ANSWER: B D F

QUESTION NO: 4

You have two issue types in your HR project: Hire and Fire.

Which two requirements can be met through changes only to field configurations? (Choose two.)

- A. For the Fire issue type, the Description field should have a default value of "Termination".
- B. For both issue types, the Employee Name custom field must be required upon creation and must never be blank.
- C. For the Hire issue type, the field description for the Due Date field should read "First day of work".
- D. For both issue types, the Resolution should be set once the issues are being resolved.
- E. For both issue types, the Assignee field should be hidden when creating but not when viewing an issue.
- F. For the Fire issue type, the default value for the Priority field should be Blocker.

ANSWER: D E

QUESTION NO: 5

You are designing a complex new workflow. Two of the requirements are listed below:

1. Any user should be able to trigger the Put On Hold transition from any status in the workflow.
2. Only users with the Close Issues permission should be able to Close the issue at any point in the flow.

Based only on these requirements, which two workflow elements should you use? (Choose two.)

- A. Global Transitions
- B. Conditions
- C. Triggers
- D. Validators
- E. Common Transitions

ANSWER: B C

QUESTION NO: 6

A team requests updates to the behavior of some fields in the project. The project uses three issue types: Problem, Incident, and Change.

The desired configuration is shown below:

Issue Type	Severity (custom field)	Impact (custom field)	Priority (system field)
Problem	Required	Required	Hidden
Incident	Required	Required	Shown and optional
Change	Hidden	Hidden	Required

Which configuration update will meet the requirements?

- A. Configure individual screens for each issue type and update the priority scheme.
- B. Configure individual field configuration for each custom field and update the priority scheme.
- C. Create unique field contexts for each issue type for the desired fields.
- D. Configure individual field configurations for each issue type.
- E. Configure individual field contexts for each custom field and update the priority scheme.
- F. Configure individual screens for any combination of issue operation and issue type.

ANSWER: E

QUESTION NO: 7

Jon is a new Jira user. He reports that adding comments to Jira isn't working as expected. When he attempts to @mention a user, no list of available users is provided. Because he does not know everyone's username, he is unable to target comments to specific users.

What is the cause of this problem?

- A. Jon does not have the Browse Users global permission.
- B. Jon does not have the View Users project permission.
- C. Jon does not have the correct field security permission for the Comment field.
- D. The field configuration for the Comment field is not set to Autocomplete Renderer.

ANSWER: D

QUESTION NO: 8

You have a project with several issue types, associated unique workflows, and a number of components.

The decision has been made to have all new issues assigned automatically.

To that end, you've set default assignee(s) for the project lead, component leads, and removed the Assignee field from the screens associated with the Create Issue operation.

One of the issue types is still being created without an Assignee. What is the most likely cause of the problem?

- A. The issue type's field configuration for Component/s is not set to Required.
- B. The default assignee for the issues' component is still set to Unassigned.
- C. The post function Assign to Lead Developer is missing in the create transition.
- D. Users creating this issue type do not have the Assign Issue permission.
- E. The assignee is being set to Unassigned in the first post-function of the create transition.

ANSWER: E

QUESTION NO: 9

Max wants you to change the way the system fields Created or Updated are being displayed when viewing an issue.

How can this be achieved?

- A. Adjust the Day Format in the Jira look and Feel configuration.
- B. Adjust the `jira.date.time.picker.java.format` in the advanced settings configuration.
- C. Adjust the `jira.date.picker.java.format` in the advanced settings configuration.
- D. Adjust the Complete Date/Time Format in the Jira Look and Feel configuration.
- E. Adjust the language and time zone preferences in Max's user profile.

ANSWER: E

QUESTION NO: 10

A medical clinic has decided to use Jira. Their project will allow patients to file medical complaints.

The requirements for the project are as follows:

➤ Members of the group (jira-patients) must be able to see only their own complaints. ➤ Members of the group (medical-board) must be able to see all complaints.

Based only on these two requirements, which two configurations used together will satisfy them? (Choose two.)

- A. Implement an issue security scheme with three levels: (#1) Group (jira-patients), (#2) Reporter, and (#3) Group (medical-board).
- B. Implement an issue security scheme with two levels: (#1) Reporter and (#2) Group (medical-board).
- C. In the permission scheme, add Reporter and Group (anonymous) to Browse Projects and Create Issues.
- D. In the permission scheme, add Group (jira-patients) and Group (medical-board) to Browse Projects and Create Issues permissions.
- E. Implement an issue security scheme with one level: Reporter and Group (medical-board).

ANSWER: B D
