**QUESTION NO: 1**

The main customer groups included in the medical industry include.

- A. Hospitals and others
- B. Health Commission
- C. Medical Insurance Bureau

**ANSWER: A B C****QUESTION NO: 2**

What are the manageability and safety features of Taishan200 series products?

- A. Support the server chassis security panel with lock to protect the security of the server's local data
- B. Integrated on the serverThe iBMC management module can be used to monitor the running status of the system and provide remote management functions
- C. Single server supports slave processor, the largest128 cores, which can maximize the concurrent execution of multi-threaded applications Ability
- D. Integrated industry standard unified and scalable firmware interface(UEFI), so it can improve the efficiency of setup, configuration and update, and simplify the error handling process

**ANSWER: A B C D****QUESTION NO: 3**

Regarding the medical industry in the field of computing products, the following statement is incorrect.

- A. which encourages ISV integration of white-brand all-in-one computers in the hospital scenario
- B. In the medical insurance information platform project, the Lipeng server has completed the docking with Huawei Cloud, Alibaba Cloud, Tencent Cloud, etc
- C. The Kunpeng adaptation and docking of the hospital scene, it is recommended to extend from the core to the non-core
- D. There are many ISVs in the medical industry, and a joint ISV output solution is required

**ANSWER: C**

**QUESTION NO: 4**

Is the description of Lipin Cloud mobile phone solution correct?

- A. Isomorphic computing power refers to Xenpeng compatibilityARM instruction set, mobile APP is developed based on AM instruction set
- B. 5G accelerates the application of cloud phones
- C. mobile applications need to be migrated
- D. No instruction translation and performance loss

**ANSWER: A B D**

**QUESTION NO: 5**

The reason why Kunpeng architecture can perfectly match big data parallel computing is.

- A. Kunpeng has high multi-core concurrency capabilities
- B. Massive small data set computing tasks
- C. More energy efficient
- D. RISC instruction set,

**ANSWER: A B C D**

**QUESTION NO: 6**

Which of the following RAID levels is not commonly used?

- A. RAID 10
- B. RAID 60
- C. RAID
- D. RAID 0

**ANSWER: C**

**QUESTION NO: 7**

TaiShan5280 server is a 4U2-channel storage server.

- A. True
- B. False

**ANSWER: A**

**QUESTION NO: 8**

The Kunpeng processor's multi-core architecture perfectly fits distributed parallel computing. In financial operation analysis scenarios, the offline query scenarios of big data are improved by 10%.

- A. True
- B. False

**ANSWER: A**

**QUESTION NO: 9**

Kunpeng big data supports open sourceThe Kunpeng of HDP software is mixed with x86 server, but there are related constraints. Which of the following are the constraints of the mixing?

- A. All components support mixed
- B. The operating system version must be consistent
- C. The hardware configuration must be consistent
- D. The JDK version must be consistent

**ANSWER: B C D**

**QUESTION NO: 10**

If the server is classified according to its appearance, which of the following servers is not included.

- A. Tower server
- B. Blade server
- C. Rack server
- D. Balanced server

**ANSWER: D**
