QUESTION NO: 1

How does static code analysis help reduce technical debt?

- A. It can identify inefficiencies, complexities and insecure code which can then be fixed by the developer
- B. It can improve the efficiency of the developer as they are writing the code
- C. It can remove the need for code reviews and speed up the development process
- D. It can remove the need for unit tests and will help improve the efficiency of the build process

ANSWER: A

QUESTION NO: 2

“As the leader of the marketing department, I want to have a content management system so that my employees can edit and provide quality content to the readers”

Which of the following requirements engineering techniques would be the MOST effective for identifying and prioritizing user stories for the given Epic?

- A. Storyboarding
- B. Story mapping
- C. Defining Personas
- D. Class Diagrams
- E. Use Cases

ANSWER: A B

QUESTION NO: 3

You have been working to define acceptance tests for a story. You think this will help tailor your testing. You have asked the product owner to be involved as well. You are currently looking at this story:

As a pet owner

I want to purchase food online

So that it can be delivered to my house when I need it

Which of the following is the preferred way to solicit information from the product owner to better understand what will be "acceptable?"

A. Propose the following acceptance criteria

- Purchase below the limit for free delivery
- Purchase above the limit for free delivery
- Request store pickup

B. Explain boundary value analysis to the product owner and have them indicate the appropriate boundaries to test

C. Work with the product owner to elicit examples of how they would use the software Combine their examples with testing techniques to flesh out the set of acceptance criteria

D. Create the following acceptance criteria and review them with the product owner

- Login
- Verify password reset
- Verify account details
- Update account details
- Browse and select food
- Add to cart
- Remove from cart
- Add more items to cart
- Select delivery
- Remove items from cart until delivery is no longer free
- Checkout and verify the deliver charge is added
- Browse again and select food
- Select delivery and verify it is free
- Checkout and verify no delivery charge is added

ANSWER: C

QUESTION NO: 4

When using a process-compliant approach to testing a safety-critical project what is an important aspect of test automation?

- A.** It must provide exhaustive regression testing
- B.** It must provide traceability back to the requirements and results documentation
- C.** It must implement automated checklists
- D.** It must incorporate model-based testing

ANSWER: B
