**QUESTION NO: 1**

In the Hadoop platform, to view information about an application in the YARN service, what command is usually used?

- A. container
- B. application attempt
- C. jar
- D. application

**ANSWER: D****QUESTION NO: 2**

Are the main features of big data understood and described correctly? "Multiple choices"

- A. many sources, many formats
- B. grows fast and processing speed is fast
- C. has a large amount of storage and a large amount of calculation
- D. Low value density of data

**ANSWER: A B C D****QUESTION NO: 3**

In the FusionInsightHDI product, what is the correct understanding of Kafka component deployment planning? "Multiple choices"

- A. Kafka's Producer can specify which consumer the message is consumed by when sending a message
- B. When creating a topic, the number of copies must not be greater than the number of currently alive Broker instances, otherwise the topic creation will fail
- C. Kafka cannot be configured with data storage directories after installation
- D. Kafka will store metadata information in ZooKeeper

**ANSWER: B D**

**QUESTION NO: 4**

Which option in the Spark component is not a transformation operation?

- A. join
- B. distinct
- C. reduceByKey
- D. reduce

**ANSWER: D**

**QUESTION NO: 5**

During Fusioninsight HD deployment, what are the following statements about installing a cluster correct? (Multiple choices)

- A. Support template installation and manual installation
- B. No need to change admin account password for the first login
- C. For the network isolation scenario, in the IP input box of the node discovery step, the service IP of each node should be entered
- D. When selecting a service, the system will choose the underlying service that it depends on from an early age

**ANSWER: A D**

**QUESTION NO: 6**

FusionInsight Manager's service management operations. What is wrong with the following statement?

- A. The service can be restarted
- B. Services can be added and uninstalled
- C. Can be set to hide or show infrequently used services
- D. You can view the current status of the service

**ANSWER: C**

**QUESTION NO: 7**

Which of the following operations cannot be completed through Fusioninsight Manager?

- A. Installation and deployment
- B. Performance monitoring
- C. Rights Management
- D. Virtual machine allocation

**ANSWER: D**

**QUESTION NO: 8**

In the Fusioninsight HD system, use the Streaming client shell command to view the topology or submit the topology failure. Which of the following positioning methods is correct? (Multiple choices)

- A. Check the client exception stack to determine whether the client is using the problem
- B. Check the operation log of the main Nimbus to determine whether the Nimbus server is abnormal
- C. Check the Supervisor running log to determine whether the Supervisor is abnormal
- D. View Worker line log

**ANSWER: A B**

**QUESTION NO: 9**

What are the main features of big data analysis related technologies? (Multiple choices)

- A. Machine learning, full features
- B. Analysis of the relevance of events behind the data
- C. Based on massive data
- D. based on exact samples

**ANSWER: A B C**

**QUESTION NO: 10**

When planning a FusionInsight HD cluster, if customers use it for functional testing, there is no performance requirement, and in the case of cost savings, the management node, control node, and data node can be deployed in one.

- A. 2**
- B. 3**
- C. 6**
- D. 8**

**ANSWER: B**
