**QUESTION NO: 1**

Which of the following actions are possible when managing roles? There are 3 correct answers to this question.

- A. A role can contain either other roles or privileges but not both together
- B. A role can contain other roles and privileges at the same time
- C. A role can be nested to multiple other roles
- D. A role can contain multiple other roles

**ANSWER: B C D****QUESTION NO: 2**

Which prerequisites of the primary system and the secondary system are mandatory before you can activate the SAP HANA system replication with the read-enabled mode? Note: There are 2 correct answers.

- A. The same number of active hosts and standby hosts must be installed
- B. Both must have the same SAP HANA version
- C. An explicit read-only connection between both systems must be available
- D. The CPU architecture must be identical

**ANSWER: B C****QUESTION NO: 3**

Assume your current partitioning plan of SAP HANA is NOT optimal. Which option of the Manage Table Distribution tool do you use to evaluate if a partitioned table needs to be repartitioned? Please choose the correct answer.

- A. Check the number of partitions
- B. Check the correct location of tables and partitions
- C. Redistribute tables after adding host(s)
- D. Balance table distribution

**ANSWER: A****QUESTION NO: 4**

Which partitioning option distributes rows equally for load balancing in the SAP HANA database?

- A. RoundRobin
- B. Hash
- C. Range-Range
- D. Range

**ANSWER: A**

#### QUESTION NO: 5

How can you minimize the database migration option (DMO) downtime?

- A. Run the benchmarking tool parallel to the DMO to automatically adjust the number of R3load processes
- B. Use the benchmarking tool for a productive database migration with the DMO procedure
- C. Provide the measured table migration duration for table sequencing during benchmarking
- D. Adjust the number of R3load processes during benchmarking and the DMO procedure

**ANSWER: D**

#### QUESTION NO: 6

What is the first node limit for planning an SAP S/4HANA scale-out system? There are 2 correct answers to this question.

- A.  $\geq 6$ TB
- B.  $\geq 8$ TB
- C.  $\geq 8$ cpu
- D.  $\geq 12$ cpu

**ANSWER: A C**

#### QUESTION NO: 7

You need to integrate an existing SAP HANA2.0 SPS05 database system into the SAP HANA cockpit monitor infrastructure. Where do you create the technical user needed for the resource registration?

- A. In the first tenant
- B. In the SYSTEMDB and all tenants

- C. In the SYSTEMDB and the first tenant
- D. In the SYSTEMDB

**ANSWER: B**

#### QUESTION NO: 8

Which system privileges are required for administrating tenant databases when being connected to the system database? There are 2 correct answers to this question.

- A. MONITOR ADMIN
- B. DATA ADMIN
- C. BACKUP ADMIN
- D. DATABASE ADMIN

**ANSWER: A D**

#### QUESTION NO: 9

At the end of the SAP HANA Cockpit 2.0 installations, how can you obtain the URL of the SAP HANA cockpit and the SAP HANA cockpit manager?

- A. Installation log file
- B. COCKPIT\_ADMIN user logs
- C. Installation logs screen
- D. Installation config screen

**ANSWER: C**

#### QUESTION NO: 10

Which user credentials are requested during the initial run of the configuration phase when performing the Database Migration Option (DMO) procedure to an SAP HANA 2.0 database tenant? There are 3 correct answers to this question.

- A. The DBACOCKPIT user of the tenant database
- B. The S-user for the SAP Support Portal connection
- C. The SYSTEM user of the system database
- D. The DDIC user in client 000 of the A BAP system

E. The SAP user in client 000 of the ABAP system

**ANSWER: A C D**

**QUESTION NO: 11**

What are advantages of column store tables? There are 3 correct answers to this question.

- A. Columns can be partitioned
- B. Only the columns required are actually loaded to memory
- C. They are optimized for high-volume read /write transactional processing
- D. Data footprint is automatically reduced through compression

**ANSWER: A B D**

**QUESTION NO: 12**

USER A grants a privilege to USER B, and USER B grants the same to USER C afterwards. What happens if you drop USER B from the HANA database?

- A. The privilege remains assigned to both USER A and USER C.
- B. The privilege is revoked from USER A, but not USER C.
- C. The privilege is revoked from both USER A and USER C.
- D. The privilege is revoked from USER C, but not USER A.

**ANSWER: D**

**QUESTION NO: 13**

Which information can you analyze using the Troubleshoot Unresponsive System application?

- A. System availability
- B. Alerts count
- C. Thread status
- D. CPU utilization

**ANSWER: C**

**QUESTION NO: 14**

Which certificates can you manage in SAP HANA cockpit 2.0? There are 2 correct answers to this question.

- A. Kerberos
- B. SAML
- C. PKCS #12
- D. X.509

**ANSWER: B D****QUESTION NO: 15**

The recovery of your productive SAP HANA database fails during log replay. What is the fastest solution to complete the recovery.

- A. Restart the database and resume the interrupted recovery
- B. Resume the recovery from beginning
- C. Resume the interrupted recovery
- D. Replay the delta backups and log backups

**ANSWER: C**
