## QUESTION NO: 1

You have an Operations Center architecture as pictured in the exhibit above, where there are:

- Three folders: F1, F2, and F3
- Three shared agents: S1, S2, and S3
- Four client masters: M1, M2, M3, and M4

Which statements are true?

Choose 2 answers

- A.** M1 can only perform builds on S1.
- B.** M3 can only perform builds on S2.
- C.** M4 can perform builds on any shared agent.

D. M3 can only perform builds on S2 and S3.

E. M4 can only perform builds on S3.

**ANSWER: C D**

### QUESTION NO: 2

Cluster Operations Jobs can be configured to have a sequence of operations. When one of these operations fails, how do you control the effect of that failure on the rest of the Ouster

Operations flow?

**A.** It is not possible to control the effect of an operation failure. The build fails immediately. **B.** Set the "Failure Mode" in the advanced options in a Ouster Operations Job configuration.

**B.** Create a Freestyle Job that listens to the build result of a Ouster Operations build and then dynamically sets the "Failure Mode".

**C.** With the CloudBees Monitoring plugin installed, configure an "Alert" In Jenkins global configuration (Manage Jenkins -> Configure System).

**ANSWER: A**

### QUESTION NO: 3

Which are commonly tuned Items to run Jenkins or CloudBees Jenkins Distribution Choose

2 answers

**A.** Operating system buffer cache size and limits on open files. **B.** Operating system limits on open files and forked processes.

**B.** Database query performance parameters.

**C.** Java memory heap size and garbage collector for heap.

**D.** Operating system limits on network packet size and interrupt latency.

**ANSWER: A D**

**QUESTION NO: 4**

What is the purpose of Pipeline checkpoints?

- A. To allow continuing the build on another agent.
- B. To avoid having to rerun the entire Pipeline If a transient error occurs.
- C. To visually separate stages.
- D. To run additional tests.
- E. To configure pipelines to send a progress report by email when a checkpoint is reached.

**ANSWER: A**

**QUESTION NO: 5**

In a Pipeline, the stage step\_\_\_\_\_.

- A. transfers artifacts to a staging server for testing
- B. can be used to group a number of other steps into a logical unit for display
- C. prepares a test environment in Jenkins
- D. collects a set of artifacts that can be referenced in a later Pipeline step

**ANSWER: A**

**QUESTION NO: 6**

Which are ways to influence the number of build artifacts that can be archived? Choose 2 answers

- A. unit build data using the job setting "Discard old builds".
- B. Change the order of jobs in the pipeline.
- C. Gear the Jenkins cache.
- D. Increase the size of the JENKINS.HOME partition/logical volume.
- E. Make sure you regularly delete unused views.

**ANSWER: A D**

**QUESTION NO: 7**

Which of these tasks are ONLY available from the "Manage Jenkins" page?

Choose 2 answers

- A. Manage plugins
- B. Open Blue Ocean
- C. Define views
- D. Configure credentials
- E. Configure Global Security

**ANSWER: D E****QUESTION NO: 8**

You are working with a CloudBees Core instance that has a working Internet connection to the CloudBees Update Centers. The Instance is enrolled In the ClouddBees Assurance Program, but It is not connected to an Operations Center and no custom Update Centers have been configured. Which statement is TRUE about your instance?

- A. In the Updates tab of the Plugin Manager, offered updates of plugins outside the CAP Collection are always the latest version.
- B. Plugins in the CAP Collection can only be installed In the Initial Setup Wizard.
- C. In the Updates tab of the Plugin Manager, no updates are offered for plugins In the CAP Collection.
- D. In the Available tab of the Plugin Manager, only the plugins in the CAP Collection are offered.

**ANSWER: C****QUESTION NO: 9**

Which is an element that CANNOT be promoted from a Custom Update Center?

- A. Custom-developed plugins.
- B. Jenkins core.
- C. Build tool installers.
- D. Open source plugins.

**ANSWER: A**

**QUESTION NO: 10**

When a Cloud Bees Core instance is enrolled in the CloudBees Assurance Program, which functions do the Beekeeper Upgrade Assistant perform?

Choose 2 answers

- A.** Perform automatic upgrades to new CloudBees Core releases as soon as they are available.
- B.** Configure, under certain circumstances, CAP-specific Update Centers.
- C.** Monitor the plugins installed in the instance.
- D.** Delete every Update Center configured in the instance.
- E.** Prevent any upgrades of plugins.

**ANSWER: A D**
