QUESTION NO: 1

You created a new PDB in a VM DB system and while creating a tablespace in the PDB an error is returned: ORA-28374: typed master key not found in wallet.

Which three options would resolve this problem?

A. Delete the encryption wallet entry from the sqlnet.ora.

Storage for the VM DB system can be scaled up.

B. Change the location of the auto-login wallet.

Storage for the bare metal DB system can be scaled up.

C. Activate the master encryption key for the newly created PDB.

CPU cores for the VM DB system can be scaled up.

D. Disable the auto-login wallet and convert the wallet to password wallet.

CPU cores for the baremetal DB system can be scaled up.

E. Re-enable the auto-login wallet.

ANSWER: A D**Explanation:**

QUESTIONNO: 63

Which two statements are true about scaling up the DB systems?

A. Storage for the VM DB system can be scaled up.

B. Storage for the bare metal DB system can be scaled up.

C. CPU cores for the VM DB system can be scaled up.

D. CPU cores for the baremetal DB system can be scaled up.

Answer: AD

QUESTION NO: 2

Which two are the minimum prerequisites to launch a DB system?

- A. Virtual Cloud Network with default security list
- B. Private key in OpenSSH format
- C. Public key in OpenSSH format
- D. Dynamic Routing Gateway
- E. Virtual Cloud Network with default service gateway

ANSWER: B E

QUESTION NO: 3

Examine the exhibit:

The screenshot shows the 'Examine the exhibit:' section of the Oracle Cloud console. It displays the configuration for a database shape with the following settings:

- SHAPE TYPE:** VIRTUAL MACHINE (selected), BARE METAL, EXADATA
- SHAPE:** VM.Standard2.24
- TOTAL NODE COUNT:** 1
- ORACLE DATABASE SOFTWARE EDITION:** Enterprise Edition Extreme Performance
- AVAILABLE STORAGE SIZE (GB):** 256

How many CPU cores and memory would a DB system would get after successful creation?

- A. 16 CPU cores and 320 GB of memory
- B. 32 CPU cores and 256 GB of memory
- C. 2 CPU cores and 256 GB of memory
- D. 24 CPU cores and 320 GB of memory

ANSWER: D

QUESTION NO: 4

You want to migrate the Oracle workload along with the third party apps to OCI without re-architecting.

Which method enables the migration of environment from on-premises to OCI?

- A. Lift and shift
- B. Infrastructure heavy workloads
- C. Backup and recovery
- D. Cloud native workloads

ANSWER: A

QUESTION NO: 5

Which two statements are true about a Virtual Cloud Network (VCN)?

- A. A subnet for a VCN can be defined in different availability domains (AD).
- B. A VCN can be used with only one DB system.
- C. A VCN cannot connect to another VCN,
- D. A VCN can reside only in a single region but can cross multiple ADs.

ANSWER: A D

QUESTION NO: 6

Examine the steps to create a backup using CLI:

Identify the required steps in correct order.

- A. 2,3,4,5,6,7
- B. 1,3,4,5,6,7
- C. 2,4,3,5,6,7
- D. 1,4,3,5,6,7

ANSWER: D

QUESTION NO: 7

You want to create a 2-node RAC with block storage and there is a requirement to scale up the storage in future. Which DB system would you use to meet this requirement?

- A. VM DB system with any database edition except standard edition
- B. VM DB system with extreme performance database edition
- C. Bare metal DB system with extreme performance database edition only
- D. Bare metal DB system with any database edition except standard edition

ANSWER: C**QUESTION NO: 8**

You want to launch a DB system that is less expensive and can be used for test and dev environments. Which type of DB system would satisfy the requirement?

- A. VM DB system
- B. Bare metal DB system
- C. Exadata DB system
- D. Autonomous transaction processing

ANSWER: A**QUESTION NO: 9**

Which three components are created along with the creation of a Virtual Cloud Network (VCN)?

- A. Internet Gateway
- B. Dynamic Routing Gateway
- C. NAT Gateway
- D. Default Security List
- E. Route Table

ANSWER: A D E

QUESTION NO: 10

Which two statements are true about the regions and availability domains (AD)?

- A. A region can have only one AD for disaster recovery capability.
- B. OCI is hosted in one region with multiple availability domains.
- C. OCI is hosted in multiple regions and multiple availability domains.
- D. Regions provide disaster recovery capability.

ANSWER: A B
