QUESTION NO: 1

As part of a health check, it is determined that the statistics feedback should be externalized more frequently. Optimizer statistics recommendations can be immediately externalized to the DB2 catalog by performing what action?

- A. Issue the ACCESS command with appropriate keywords.
- B. Issue the ARCHIVE command with the appropriate keywords.
- C. Issue the STOP command for the appropriate set of statistics.
- D. Issue the ALTER command with the appropriate memory location.

ANSWER: A**QUESTION NO: 2**

Which DB2-supplied stored procedure captures statistics and DDL for DB2 objects, extracts subsystem parameters and explain information for queries and applications, and returns the results in a data set or as a result set?

- A. ADMIN_INFO_SQL
- B. ADMIN_JOB_QUERY
- C. ADMIN_INFO_SYSPARM
- D. ADMIN_UPDATESYSPARM

ANSWER: C**QUESTION NO: 3**

You analyze an accounting report. You see a high "NOT ACCOUNTED" time. Which two events can contribute to this high value?

- A. CPU wait time.
- B. I/O read wait time.
- C. Log write wait time.
- D. Real storage paging wait time.
- E. Execution unit switch wait time.

ANSWER: C E

QUESTION NO: 4

What subsystem parameter in DDF specifies the maximum number of inactive or new connections queued that can be waiting for a DBAT to process the request?

- A. IDTHTOIN
- B. MAXDBAT
- C. CONDBAT
- D. MAXCONQN

ANSWER: D**QUESTION NO: 5**

Which statement is true if a table space is created using the "FOR UPDATE nn" (where nn is a number) clause?

- A. The first nn UPDATE operation(s) will use an indirect reference.
- B. Only the first nn UPDATE operation(s) on the table will be processed.
- C. nn% space is reserved per page for future UPDATE operations to reduce indirect reference.
- D. nn row locations per page are kept for future UPDATE operations to reduce indirect reference.

ANSWER: A**QUESTION NO: 6**

Which technique can be utilized for the reporting of real-time statistics?

- A. Call stored procedure SYSPROC. DSNACCOX.
- B. Call stored procedure SYSPROC. ADMINJNFOJHOST.
- C. Query the SYSIBM.SYSTABSTATS system catalog table.
- D. Query the SYSIBM.SYSTABLES_PROFILES system catalog table.

ANSWER: D**QUESTION NO: 7**

Which two options can be specified in order to access a system-period temporal table for a specific point in time guaranteeing accurate results?

- A. A period-specification placed in the FROM clause of a subselect.

- B.** A period-specification placed in the WHERE clause of a subselect
- C.** A SELECT statement predicate against the transaction start ID of the base table.
- D.** A predicate against the start and end columns of the base table placed in the WHERE clause of a subselect.
- E.** A SET of the CURRENT TEMPORAL SYSTEM_TIME special register to a non-null value prior to a SELECT against the temporal tabl

ANSWER: C E
