**QUESTION NO: 1**

What can the DatabaseInput node be configured to do?

- A. Insert data in a database.
- B. Update data in a database.
- C. Update the local environment tree.
- D. Retrieve data from a database.

**ANSWER: D****Explanation:**

Use the DatabaseInput node to detect events recorded in a database, and to retrieve the data affected by those events.

**QUESTION NO: 2**

What tool can be used to create a new configurable service?

- A. Web User Interface
- B. IBM Integration Toolkit
- C. IBM Integration Explorer
- D. IBM Integration Admin Tool

**ANSWER: A****QUESTION NO: 3**

How should a Developer move an IBM Integration Bus installation and its components to another physical location?

- A. Uninstall and reinstall in the required location.
- B. Copy and paste the associated files to required location.
- C. Use the mqsigratecomponents command.
- D. Use the mqsibbackupbroker and mqsirestorebroker command.

**ANSWER: D****Explanation:**

The mqsirestorebroker command restores the broker configuration from a backup file that you have created by using the mqsibackupbroker command. You can restore a broker only on a computer that has an identical configuration; the operating system must be at the same level, and the broker and queue manager names must be identical.

**QUESTION NO: 4**

How is a secured and trusted communication link between IBM Integration Bus (IIB) and Business Process Manager (BPM) built.

- A. Enable WS-Security on both BPM and IIB.
- B. Programmatically encrypt the outgoing messages
- C. Add a certificate to the truststore to set up the SSL communication between BPM and IIB.
- D. There is no need to build a security link because BPM and IIB should always be deployed on the same network behind the firewall.

**ANSWER: C****QUESTION NO: 5**

What are two options for creating an MQEndpoint policy? (Select 2.)

- A. Use the BAR file editor.
- B. Use Integration Bus Explorer.
- C. Use the mqsicreatepolicy command.
- D. Use the mqsiattachpolicy command.
- E. Use the Integration Bus web user interface.

**ANSWER: C E****Explanation:**

You can use the following tools to create, attach, and manage MQEndpoint policies:

- Command line

To create a policy, use the mqsicreatepolicy command. For more information, see [Creating and importing policies](#).

- Web user interface (UI)

- IBM Integration Toolkit

- Representational State Transfer (REST) application programming interface (API)

## QUESTION NO: 6

When using the RegistryLookup Node to submit queries to WebSphere Service Registry and Repository, where are the entities returned by the query stored?

- A. In a predefined variable of the Array type
- B. In the ServiceRegistry field in the LocalEnvironment
- C. In one of the output terminal of the RegistryLookup Node
- D. In a shared variable that makes the data available to subsequent nodes

**ANSWER: B**

## QUESTION NO: 7

Which of the following are available in IBM Integration Bus for administration? (Choose two.)

- A. IBM Integration API
- B. MQ Administration Client
- C. IBM Integration Bus Explorer
- D. Web Services Administration Client
- E. IBM Integration Web User Interface

**ANSWER: A E**
