QUESTION NO: 1

Which of the following permission control policies does Object Storage Service (OSS) provide for access to objects stored in a bucket? (Number of correct answers: 4)

- A. ACL
- B. RAM Policy
- C. Bucket Policy
- D. STS authorization
- E. Dynamic blacklist
IntranetAccess
- F. Object Policy

ANSWER: A C D F**QUESTION NO: 2**

Which of the following programming languages are supported by the Alibaba Cloud SDK? (Number of correct answers: 3)

- A. Java
- B. Swift
- C. PHP
- C. Python
- D. Bash shell

ANSWER: A C**Explanation:**

QUESTION NO: 3

Which of the following configurations cannot improve the stability, reliability or availability of an Alibaba Cloud Scaling Group? (Number of correct answers: 3)

- A. Select multiple VPCs when creating the scaling group
- B. When creating the scaling group, select multiple Vswitches in multiple Zone within a Region

- C. Choose a variety of different ECS types when creating your Scaling Configuration
- D. In the process of creating a Scaling Group, associate multiple Server Load Balancers

ANSWER: A C D

QUESTION NO: 4

Which of the following operations can be performed through Log Service sAPI? (Number of correct answers: 3)

- A. Collect logs based on Logtail configuration and Logtail machine group information
- B. Create a Logstore, write and read logs to the Logstore
- C. Access control for different users
- D. Deliver logs to OSS for storage and analysis

ANSWER: A B C

QUESTION NO: 5

To meet data analytics requirements on large datasets, which of these databases can meet the demand for structured and semi-structured storage for almost all types of data, albeit with limited support for strong transactions?

- A. HBase
- B. OceanBase
- C. RDSMariaDB
- D. TSDB

ANSWER: C

QUESTION NO: 6

As more businesses move online and collect more data about their users, databases are beginning to grow very large, affecting table query performance and business operations. In order to solve these problems, in addition to sub-database sub-table transformation, we can also use Data Management Service (DMS)'s archiving function to regularly archive large table data. We can then remove the archived records from the original table to improve query performance. Which of these statements about this feature of DMS is NOT correct?

- A. The supported database types are RDS MySQL and PolarDB MySQL
- B. Before you can use this feature of DMS, you must first enable Alibaba Cloud's Database Backup Service (DBS)
- C. Backup data can be stored In OSS
- D. The user role of this operation must be 'administrator" or "DBA"

ANSWER: D**QUESTION NO: 7**

Which of the following descriptions of Alibaba Cloud ECS storage are correct? (Number of correct answers: 3)

- A.** Alibaba Cloud provides a wealth of block storage products for ECS, including Cloud Disks (virtualized storage) and Local Disks (physically attached to the server(s) that host your ECS Instances).
- B.** Both Local Disks and Cloud Disks use a multi-copy distributed storage mechanism, which has low latency, high performance, durability, and high reliability, and supports creation, expansion and release at any time.
- C.** Cloud Disks come In several different varieties: ESSD (Enhanced Solid State) Cloud Disks. SSD (Solid State) Cloud Disks, and high-efficiency Cloud Disks.
- D.** Two types of Cloud Disks can be attached to an ECS: System Disks and Data Disks. System Disks host the ECS instances operating system.

ANSWER: A B C**QUESTION NO: 8**

Which of the following is NOT a feature of Alibaba Cloud's Cassandra database service?

- A.** Centerless distributed architecture
- B.** Supports both narrow and wide tables, providing flexible schema functions
- C.** Cluster storage, strong expansion of read and write capabilities
- D.** Enterprise-level capabilities such as disaster tolerance, backup and recovery, security, and monitoring across data centers

ANSWER: B**QUESTION NO: 9**

Which of the following statements describes AKs (Access Keys) incorrectly?

- A.** AK can refer to both the AccessKey ID and the AccessKey secret
- B.** You can use AK to construct an API request and the corresponding resources can be manipulated if your request successfully..
- C.** An AccessKey ID and AccessKey Secret cannot be used separately
- D.** AccessKey Secrets for RAM sub-accounts can be queried at any time on the Console Interface after creation

ANSWER: A

QUESTION NO: 10

In Alibaba Cloud RocketMQ, messages are kept for up to _____ days. We recommend configuring a monitoring service to watch the consumption status, and intervene manually when "not consumed but to be deleted" message alarms occur.

- A. 2**
- B. 3**
- C. 4**
- D. 5**

ANSWER: B
