QUESTION NO: 1

What data sources can be connected to Veeam One? (Choose2) +

- A. Amazon Web Services EC2 instances
- B. Veeam Backup & Replication agents
- C. Microsoft Hyper-V servers
- D. Veeam Backup&Replication servers
- E. Microsoft Azure VMs

ANSWER: C D

QUESTION NO: 2

Which of the following best describes the Snapshot Hunter feature?

- A. A Veeam technology used to detect and remove orphaned VMware vSphere snapshots that may remain after backup or replication job sessions
- B. A Veeam CBT filter driver used for Instant VM Recovery in the Microsoft Hyper-V environments
- C. A part of Veeam Explorer for Storage Snapshots used to locate the required snapshot for restore
- D. A Veeam ONE, dashboard used to detect orphaned VMware vSphere snapshots that may remain after backup or replication job sessions

ANSWER: A

QUESTION NO: 3

25 VMs are running on a Hyper-V platform at a remote office (ROBO) . The administrator has been tasked with setting up replication to the main office (H1) so it can act as the disaster recovery site. The available bandwidth is 20 Mbps and the data generated for the interval is 100GB.Which of the following will achieve the RPO? +

- A. Use replication jobs with copy mode set to “periodic copy” and copy every four hours
- B. Configure the replication jobs to use WAN acceleration. Set the schedule to run every four hours.
- C. Use replication jobs with copy mode set to “interval copy” Schedule to run every four hours.
- D. Configure the replication jobs with traffic throttling to 10Mbps to limit the impact. Schedule to run every four hours

ANSWER: B

QUESTION NO: 4

Veeam Explorer for Microsoft SQL Server offers which of the following capabilities? Choose Three options.

- A. Restore SQL user accounts
- B. Export an SQL database to an .sql file
- C. Send SQL tables as attachments via email
- D. Publish an SQL database without having to restore them
- E. Restore an SQL table to the original server or different server
- F. Export an SQL database to a local folder or network drive

ANSWER: D E F

QUESTION NO: 5

which actions can be used to locate the exact extent of a scale-out backup repository containing a particular VM's backup data? Choose two options.

- A. Check scale out backup repository settings
- B. Check the specific VM in the job statistics
- C. Check the inventory view for the specific VM
- D. Open the extent repositories manually
- E. Check backup proxy settings

ANSWER: A B

QUESTION NO: 6

An Availability engineer has configured Veeam Backup & Replication to replicate a mission critical VM to a DR site on an hourly basis and with 24 restore points. The production site has suffered a storage failure and needs to bring up the mission critical machine as soon as possible. Which step should the Availability engineer do next?

- A. Create a failover plan
- B. Failover to the replica VM
- C. Failback of the replica VM
- D. Planned failover to me replica VM

ANSWER: B

QUESTION NO: 7

Which recovery verification tests can be executed when verifying both backups and replicas? Choose three options.

- A. Heartbeat test
- B. Ping test
- C. Application test
- D. Memory test
- E. Operating System test
- F. CRC check

ANSWER: A B C

QUESTION NO: 8

Which procedure is used to finalize replica failback?

- A. Migrate to production
- B. VMware Storage vMotion
- C. Replica failback does not need to be finalized
- D. Commit failback
- E. Quick Migration

ANSWER: D

QUESTION NO: 9

The administrator of a VMware environment backed up by Veeam Backup & Replication has a critical server that has crashed and will not reboot. They were able to bring it back online quickly using Instant VM recovery so people continue to work. What else is required to complete the recovery?

- A. Commit failback
- B. Migrate to production
- C. Merge delta file

D. Commit failover

ANSWER: B

QUESTION NO: 10

In the war against ransomware, a company decided to implement tape backup for the first time. The infrastructure contains VMware VMs and Hyper-V VMs. What is the correct approach to getting all the servers onto tape?

- A. Create backup to tape jobs and write directly to tape.
- B. Create backup jobs, then create backup to tape jobs.
- C. Create backup copy jobs, then create backup to tape jobs.
- D. Create file to tape jobs and write directly to tape.

ANSWER: B

QUESTION NO: 11

In the event a VMware VM configuration file (VMX) is missing and a restore is needed, what Veeam restore process is the best choice for this situation?

- A. VM file restore
- B. Instant disk recovery
- C. Instant VM recovery
- D. Virtual disk restore

ANSWER: A

QUESTION NO: 12

An administrator needs to create a strategy in advance of a disaster to ensure the applications can be started in a specific order. How can this be accomplished? -

- A. Failover plan
- B. Attach XML file to existing job with the VM start order
- C. Application group
- D. Veeam One migration script

ANSWER: C**QUESTION NO: 13**

Which of the following options describe the Veeam Data Mover Service function most accurately? Choose two options.

- A. Analyzes the system and installs and upgrades necessary components and services, depending on the role selected for the server
- B. Copies VM files
- C. Reduces load on the network and helps speed up restores
- D. Performs data compression, deduplication and data transfer

ANSWER: B D**QUESTION NO: 14**

Which of the following statements is true regarding the Veeam Backup & Replication integration with supported Storage Systems for VMware vSphere are true? (Choose three).

- A. On storage accesses through NFS, VMs with snapshots will be skipped from Backup from Storage Snapshots
- B. Veeam Backup & Replication can backup virtual machines from a supported secondary storage array
- C. On storage accessed through NFS, VMs with snapshots can be protected with Backup from Storage Snapshots
- D. When Backup from Storage Snapshots is performed, VMware snapshot is never utilized
- E. Enabling Backup from Storage Snapshots for all backup jobs are not recommended

ANSWER: A B E**QUESTION NO: 15**

When restoring Linux or Unix guest OS files, which components can be used to mount the volume containing files to be restored? (CHOOSE 2) -

- A. Enterprise Manager Server
- B. Helper Host
- C. NFS Mount
- D. Guest interaction proxy
- E. Helper appliance

ANSWER: B E
