QUESTION NO: 1

Is there a need for a separate Permission Set Licence for an Analytics app?

- A. Yes
- B. No

ANSWER: A**QUESTION NO: 2**

Universal Containers reports that any selection in the List widget is not affecting the Pie chart in one of their Einstein Analytics dashboards. The step options associated with the List widget and Pie chart are shown in the graphic.

Given that the steps are using different datasets, which two changes can an Einstein Consultant make to solve this issue? Choose 2 answers

- A. Use 'Connect Data Sources' and create a connection to connect the two datasets.
- B. Use selection binding in the filters section of the step "Step_pie_2."
- C. Use "Connect Data Sources" and create a connection to connect the two widgets.
- D. Use selection binding in the filters section of the step "Type_1."

ANSWER: A B**QUESTION NO: 3**

What can you do in a dataset recipe?

- A. Extract external data into Analytics
- B. Build a dashboard
- C. Combine data from different datasets
- D. Make a data chili

ANSWER: C

QUESTION NO: 4

A consultant wants to optimize data loads by extracting Salesforce objects using independent Tableau CRM dataflows ahead of time.

Which construct should be used to accomplish this?

- A. Clone
- B. Dataflow
- C. Data Sync (Replication)
- D. Augment

ANSWER: C

QUESTION NO: 5

What are the two main parts of a lens/exploration?

- A. Query
- B. Visualization
- C. Dataset
- D. Measure
- E. Grouping

ANSWER: B E

QUESTION NO: 6

The Vice President of Sales wants to create a "Pipeline Trending" dashboard in Tableau CRM that displays specific colors depending on the values of the fields. Which two techniques should a consultant use to help address this requirement? (Choose two.)

- A. Assign conditional formatting on a dashboard widget.
- B. Use a Recipe and assign colors to each field value with the Color transformation.
- C. Use a computeRelative to calculate a color field and assign it to each field value.
- D. Choose the "Show Fields Panel" option when exploring the dataset and then assign colors to each field value.

ANSWER: B D

QUESTION NO: 7

Why would you use a merge key in a dataset recipe?

- A. To find out what the merge icons represent in a dataset
- B. To schedule when a dataset recipe runs
- C. To join related data from different sources
- D. To deal with duplicate records

ANSWER: C

QUESTION NO: 8

A company wants to allow users who belong to an account team to see all the Opportunities associated with that Account in Einstein Analytics.

Which two actions accomplish this requirement? Choose 2 answers

- A. Apply sharing inheritance.
- B. Create a master-detail relationship between the Salesforce Account and Opportunity objects.
- C. In the dataflow, extract the AccountTeamMember object and augment it with the Opportunity object using 'AccountId' as the join field and apply following security predicate: 'AccountTeamMember.UserId' == "\$User.Id".
- D. In the dataflow, extract the OpportunityTeamMember object and augment it with the Opportunity object using 'OpportunityId' as the join field and apply the following security predicate: 'OpportunityTeamMember.UserId' == "\$User.Id".

ANSWER: A C

QUESTION NO: 9

What are two benefits of designing using the "Progressive Disclosure" principle? (Choose two.)

- A. Improved ease of use for end users
- B. Discounted EA licenses when growth is achieved
- C. Better dashboard performance
- D. Automatic conditional formatting

ANSWER: A B

Explanation:

Reference: <https://www.toptal.com/designers/data-visualization/dashboard-design-best-practices>

Advantages of using progressive disclosure in dashboards:

- Reducing user uncertainty and anxiety (by displaying signs of progress, the users are assured that everything is working as intended)
- Providing users with something to look at (partial display of data) rather than make them wait
- Providing users with a clear expectation of the upcoming steps, and creating an understanding of the way information is presented hierarchically

QUESTION NO: 10

A large company has a single dataset that contains the attainment and commission fields for all sales reps. Each sales rep should be able to view the attainment data for each rep in their division. Each rep should only be able to see their own commission data.

Which option should be used to enforce this requirement?

- A. Create separate datasets for attainment and commission and apply security predicates and/or sharing inheritance.
- B. Apply a security predicate on the existing single dataset.
- C. Use sharing inheritance.
- D. Add the sales organization to the attainment dataset access list.

ANSWER: A

QUESTION NO: 11

Max of objects that can be enabled for Data Sync

- A. 200
- B. 100
- C. 150
- D. 50

ANSWER: B**QUESTION NO: 12**

What are two benefits of designing using the "Progressive Disclosure" principle? Choose 2 answers

- A. improved ease of use for end users
- B. Discounted EA licenses when growth is achieved
- C. Automatic conditional formatting
- D. Better dashboard performance

ANSWER: A D**QUESTION NO: 13**

A dataset for building the Einstein Discovery story contains 72 fields that are potentially relevant predictors.

Which approach is considered best practice to assess the top predictors in order to get to a meaningful and robust model?

- A. This dataset is too big and cannot be used in Einstein Discovery. Request a new dataset with fewer predictors.
- B. Build the story with all the predictors and indicate that Einstein Discovery should show the top predictors.
- C. Go back to the data preparation and reduce the number of fields to less than 30 in order to produce a story.
- D. Build a story with a first set of predictors and assess which predictors are important to the story. Then drop the less important ones and add the predictors that were omitted in the first run and assess their impact.

ANSWER: D**QUESTION NO: 14**

What are two core design principles to consider when building Analytics apps or dashboards? Choose 2 answers

- A. Emphasis: make sure they have space for important information, such as headlines and key charts.
- B. Clarity: make sure they are uncluttered and easy to interpret.
- C. Consistency: make sure they have a sense of familiarity to strengthen your users' ease of use.
- D. Balance: make sure they have a balance of different charts to get a more interesting design.

ANSWER: B C

QUESTION NO: 15

Universal Containers (UC) is a multinational company that utilizes Salesforce and has a variety of internal systems. UC uses Einstein Analytics for their data analysis platform and they want to automate their weekly manual process to create a dataset from their on-premise data warehouse. Which solution should a consultant recommend to meet this requirement?

- A. Utilize a Salesforce weekly export feature
- B. Utilize Analytics Connector.
- C. Utilize middleware with Analytics External Data API
- D. Utilize a dataflow

ANSWER: C
