QUESTION NO: 1

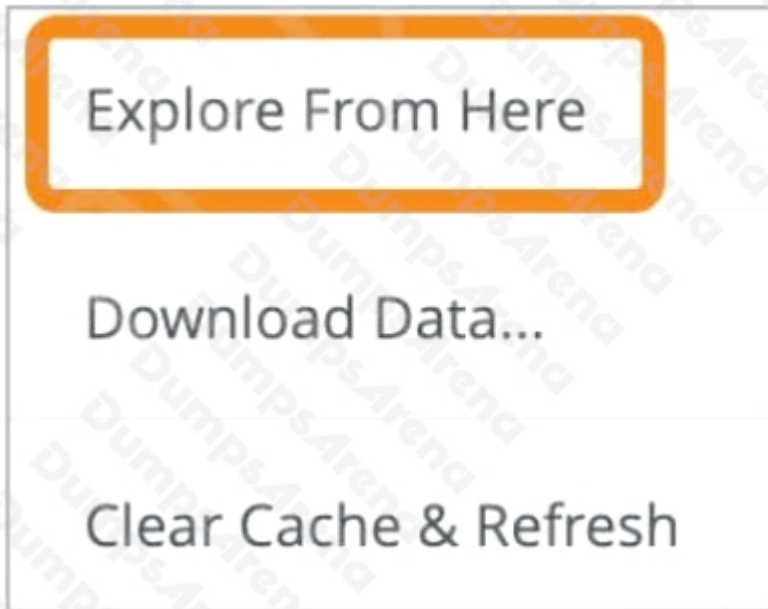

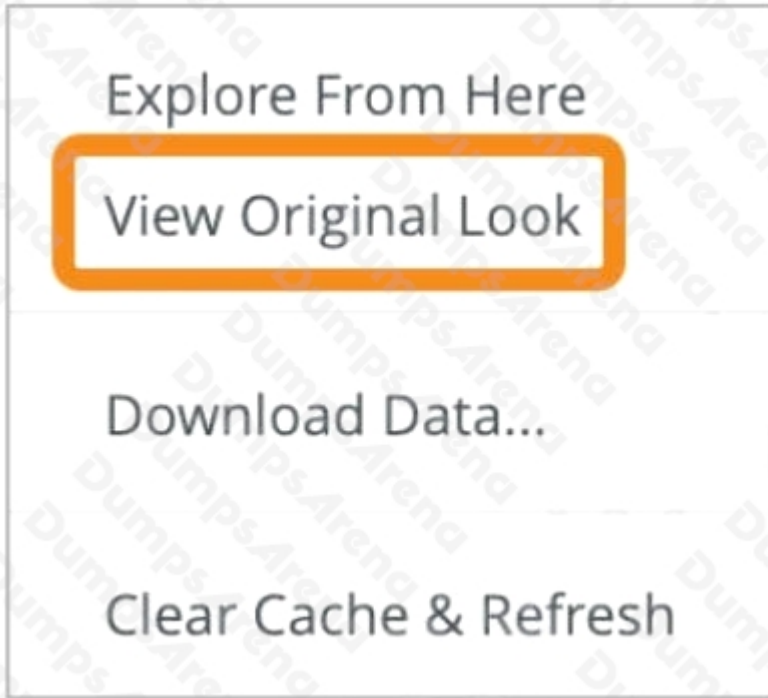

An analyst is building out a company KPI dashboard and creates a blank dashboard. The analyst can either create a new tile or use an existing Look.

What are two use cases for using Look-linked tile instead of building a query tile? (Choose two.)

- A.** The analyst wants to use the Look-linked tile in a separate company performance dashboard.
- B.** The analyst plans on creating a scheduled report of the associated Look.
- C.** The analyst is considering dashboard performance, and Look-linked tiles on dashboards lead to faster performance.
- D.** The analyst wants the flexibility to export the Look-linked tile results to additional file formats not supported by query tiles.

ANSWER: A B**Explanation:**

QUESTION NO: 2

Two users report seeing different results on the same dashboard.

Which three configurations could explain these discrepancies? (Choose three.)

- A. The time zone setting is different for each user.

- B. Looker caching is affecting results.
- C. The dashboard uses separate Explores for each user.
- D. Dashboard filters are being used
- E. The dashboard was accessed via different boards.

ANSWER: C D E

QUESTION NO: 3

The query below shows how many uses purchased an item from each of two clothing departments.

Products Department	Users Count
1 Men	1000
2 Women	858
Total	1,855

Why are the total and sum of the rows unequal?

- A. There is a filter limiting the count in the Total row.
- B. There is a faulty logic in the way users relate to clothing departments.
- C. A user is only counted once in the total even if the user has purchased from both departments.
- D. There are users who have never purchased a clothing item from either department.

ANSWER: C

QUESTION NO: 4

An analyst has a dashboard with table visualizations that display the first few results, and the user can scroll down to see the remaining results. The analyst wants to download a PDF of the dashboard.

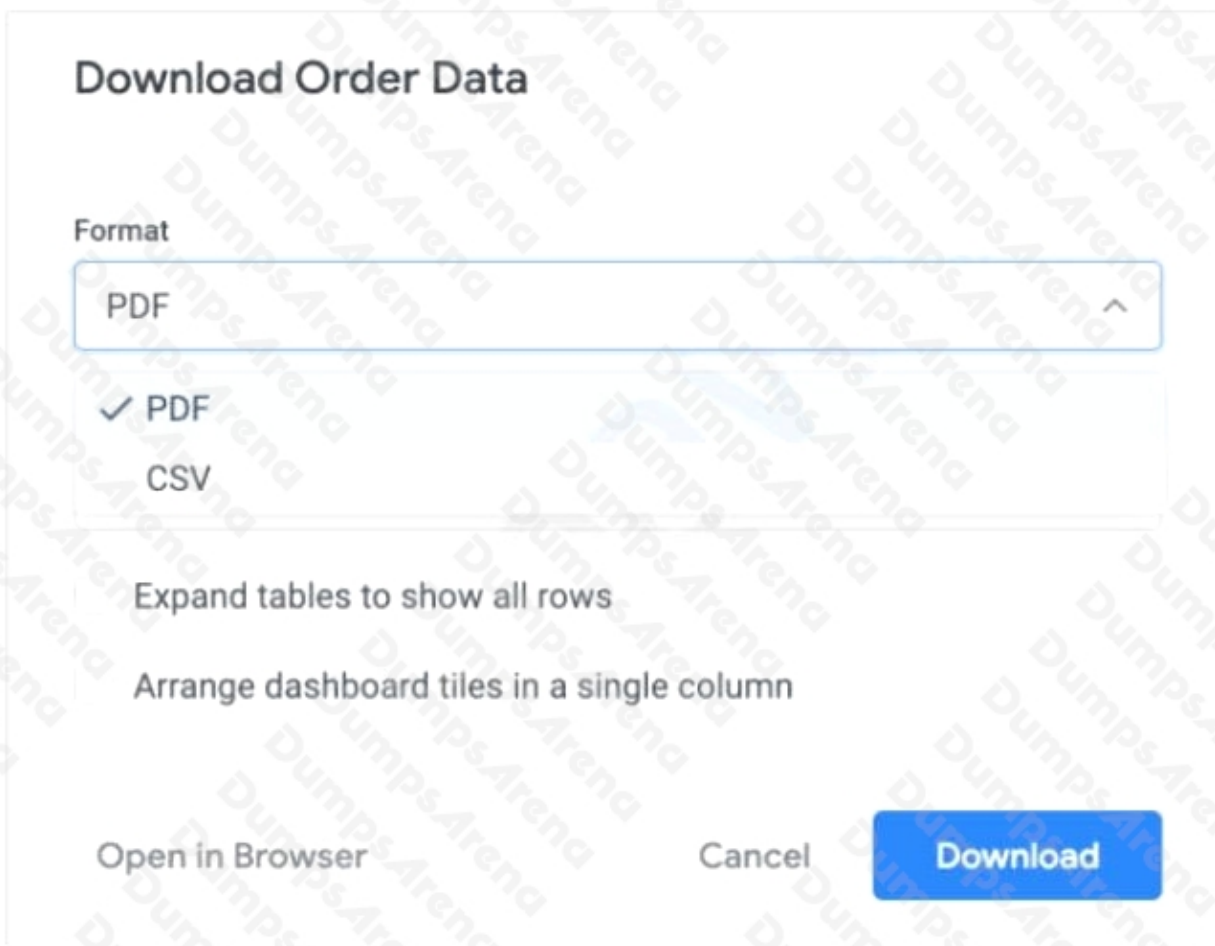

How should the analyst ensure that the PDF shows all available results in the UI dashboard?

- A. Select the Expand Tables option.
- B. Select the All Results option
- C. Select the Allow Scroll option and specify each table.
- D. Select the Paper Size option and specify a large size.

ANSWER: A

QUESTION NO: 5

An analyst needs to send a daily PDF to three different stores and wants it to contain five visualizations of KPI data. Each store's users must receive only the data filtered for that store. The analyst needs to see all store data in Looker.

What should the analyst build to accommodate these requirements?

- A. Three dashboards, one for each store
- B. Three schedules filtered by store
- C. Five schedules, one for each visualization
- D. A dashboard with three filters, one for each store

ANSWER: D
