**QUESTION NO: 1**

The Client wants to have a flash sale on a few products every day. These products are sold through B2C Commerce as well as an in store Point of Sale system that it tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed will continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product's inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers

- A.** The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.
- B.** If the external hosted web-service is unreliable. It could be a point of failure in the site's order placement flow.
- C.** If the product Inventory threshold that triggers the web service calls is reached too often. It will have a negative impact on site performance.
- D.** Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods

**ANSWER: B C****QUESTION NO: 2**

A B2C Commerce developer has recently completed a tax service link cartridge integration into a new SHU site. During review, the Architect notices the basket calculation hook is being run multiple times during a single tax call.

What is the reason for the duplicate calculations being run?

- A.** The tax cartridge is being called multiple times.
- B.** The LINK cartridge is included multiple times in the cartridge path.
- C.** There are multiple hook.js files referring to the same hook.
- D.** The checkout is designed to recursively refer to the same hook.

**ANSWER: A****QUESTION NO: 3**

A B2C Commerce Developer has just finished implementing a new promotion code form on checkout. During review, an Architect notes that the form is not using CSRF validation correctly.

```
<form action="{URLUtils.continueURL()}" method="GET">
  <!-- ... the form input elements ... -->
  <input type="hidden"
    name="{dw.web.CSRFProtection.getTokenName()}"
    value="{dw.web.CSRFProtection.generateToken()}" />
  <input type="submit" value="Apply Promotion Code" />
</form>

formResult = cartForm.handleAction({
  'addPromoCode': function (formgroup) {
    var CSRFProtection = require('dw/web/CSRFProtection');
    var status;
    var result = {
      cart: cart,
      EnableCheckout: true,
      dontRedirect: true
    };
    status = cart.addCoupon(formgroup.couponCode.htmlValue);
    /* ... some error handling code, based on the returned status ... */
    return result;
  }
});
```

Which two options are best practice recommendations for dealing with CSRF validation? Choose 2 answers

- A. Ensure the CSRF protection is validated on form submission.
- B. Only use GET methods over HTTPS.
- C. Automatically renew the CSRF Token if expired.
- D. Only use POST methods over HTTPS.

**ANSWER: A D**

#### QUESTION NO: 4

An Architect is documenting the technical design for a single B2C Commerce storefront. The Client has a business requirement to provide pricing that is customized to specific groups:

- 50 different pricing groups of customers
- 30 different pricing groups of employees
- 10 different pricing groups of vendors

Which items should the Architect include in the design in order to set applicable price books based on these requirements"

Choose 2 answers

- A.** - 50 customer groups for customers  
- 30 customer groups for employees  
- 10 customer groups for vendors
  
- B.** - One customer group and 50 subgroups for customers  
- One customer group and 30 subgroups for employees  
- One customer group and 10 subgroups for vendors
  
- C.** - One campaign and multiple promotions for each customer group
  
- D.** - One promotion and 50 campaigns for customers  
- One promotion and 30 campaigns for employees  
- One promotion and 10 campaigns for vendors

**ANSWER: A B**

#### QUESTION NO: 5

The Client is Crowding and decided to migrate its ecommerce website to B2C Commerce. The Client provided the Architect with the f metrics for its existing website over the past 12 months and forecasted into the next year:

Average visits per hour	500
Peak visits per hour	1000
Average page views per hour	10000
Peak page views per hour	20000
Average orders per hour	100
Peak orders per hour	250
Average items per order	2.1
Average order value	300 USD
Expected growth percentage	300

Noting these historical metrics and the forecasted growth of 300%, which load test targets meet best practices for testing the new B2C Commerce site?

- A.** 15000 visits per hour, 300000 page views per hour, and 3750 orders per hour
- B.** 150000 visits per hour, 3000000 page views per hour, and 37500 orders per hour
- C.** 1500 visits per hour, 30000 page views per hour, and 375 orders per hour
- D.** 3000 visits per hour, 60000 page views per hour, and 750 orders per hour

**ANSWER: C**

#### QUESTION NO: 6

There is an issue with the site when the domain is opened from Google search results. After researching the problem, it turns out that the site returns a 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add dynamic catch-all rule to redirect to home page.
- B. Add this snippet to the aliases configuration for the domain:

```
"pipeline": "Home-Show",  
"apply-to-host-only-request-with-params": "true"
```

- C. Add this snippet to the aliases configuration for the domain

```
"controller": "Home-Show",  
"apply-to-host-only-request-with-params": "true"
```

- C. Add dynamic redirect if the URL contains parameter to Home Show.  
Add this snippet to the aliases configuration for the domain

**ANSWER: B**

#### QUESTION NO: 7

A business wants to migrate its customer service provider from provider A to provider B. Provider B offers a LINK cartridge to integrate with its commerce solution.

Which three artifacts need to be created by the Architect? Choose 3 answers

- A. Document the design of implementing a new B2C Commerce cartridge following the industry standard best practices
- B. Document the data objects, the interface, and data synchronization frequency between the systems.
- C. Document the data mapping between commerce and customer service provider.
- D. Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs.
- E. Document how the customer online journey flows from landing on the page to placing of the order

**ANSWER: B C D**

#### QUESTION NO: 8

Northern Trail Outfitters (NTO) operate 200 physical stores. NTO has products that are available in some of the physical stores and not available in others. The closest physical store is determined based on customer's post zip code when they are shopping online. Only the products that are available in the customer's closest physical store should be presented to the customer to the search results.

What are the two feasible technical approaches to meet these requirements?

Choose 2 answers

- A.** Create a separate shipping method per physical store. Use post/zip code to determine the applicable shipping method. Show only the products that are not excluded from the shipping method.
- B.** Create a separate category per physical store use post/Zip code with a mapping to determine the relevant category. Show only the products from this category.
- C.** Create a separate site per physical store. Use post/zip code to redirect the customer to the relevant site. Show the products from the site navigation catalog.
- D.** Create a separate pricebook per physical store. Use post/zip code to activate this pricebook through a customer group. Show only the products with price by applying price refinement.

**ANSWER: A D**

#### QUESTION NO: 9

An Architect has been asked by the Business to integrate a new payment LINK cartridge. As part of the integration, the Architect has created four new services to access various endpoints in the integration.

How can the Architect move the new services to Production when the integration is ready for launch?

- A.** The new services will be moved to Production with a Data Replication.
- B.** The new services will be moved to production with a Site Import.
- C.** The new services must be manually exported from staging and Imported into Production.
- D.** The new services will be moved to Production with a Code Replication.

**ANSWER: C**

#### QUESTION NO: 10

The client provided these business requirements:

- The B2C Commerce platform will integrate with the client's Order Management System (OMS).
- The OMS supports Integration us-no legacy RPC style SOAP services.
- The OMS is hosted on client s infrastructure.

What is the right cartridge folder to place the WSDL provided for the OMS service?

- A.** /cartridge/webreferences2
- B.** /cartridge/webreferences
- C.** /cartridge

D. /cartridge/services

**ANSWER: B**
