Topic Break Down

Topic	No. of Questions
Topic 1, Exam Pool A	197
Topic 2, Exam Pool B	200
Topic 3, Exam Pool C	257
Total	654

QUESTION NO: 1

Regarding the overload capacity of UPS5000-E, which of the following statements is correct ()

- A. Inverter 110% overload for 60 minutes
- B. Inverter 110% overload for 120 minutes
- C. Bypass 135% overload for 120 minutes
- D. Bypass 135% overload long-term operation

ANSWER: A D**QUESTION NO: 2**

When configuring the battery, regardless of the brand of the battery, as long as the capacity is the same, it can meet customer requirements.

- A. True
- B. False

ANSWER: B**QUESTION NO: 3**

What kind of access control can the rear door of the FusionModule2000 cabinet support? A Mechanical code lock B IC card swipe access control C Three-in-one access control D None of the above Answers: D 216. The NetEco6000 management system can provide energy efficiency management functions. Which of the following functions are supported? (multiple choice)

- A. The PUE of the computer room can be monitored to understand the current energy efficiency level
- B. You can understand the energy expenditure cost of the computer room according to the electricity cost of the computer room with the stepped electricity price
- C. The pPUE of each micro-module can be monitored to understand the energy efficiency level of each micro-module
- D. The electricity consumption report of each cabinet can be generated, which is convenient for customers to count the electricity consumption of each department.

ANSWER: A B C D

QUESTION NO: 4

UPS2000-G adopts high power density design, 6k/10k is only 2U high, 15K/20K is only 3U high, reducing installation space.

- A. True
- B. False

ANSWER: A**QUESTION NO: 5**

Is the description of the iPower function of the intelligent micro-module of FusionModule2000 V3.0 correct? ()

- A. Power Distribution Link Visualization
- B. With alarm convergence function (mains power failure scenario, alarm information convergence).
- C. Intelligent rPDU can monitor the power consumption information of each outlet
- D. Can monitor battery information.

ANSWER: A B C**QUESTION NO: 6**

FusionModule2000 can be configured with inter-column temperature control products ().

- A. Full cabinet 36KW
- B. Full cabinet 46KW
- C. Half cabinet 46KW
- D. Half cabinet 25KW

ANSWER: B D**QUESTION NO: 7**

Which of the following UPS models supports bypass hot swap?

- A. APM series
- B. UPS5000-A
- C. PX250 series
- D. UPS5000-E

ANSWER: A C D

QUESTION NO: 8

FusionModule1000A V2R3 version 40-foot IT scene can provide the number of cabinets (multiple choice)

- A. 5
- B. 6
- C. 7
- D. 8
- E. 9

ANSWER: A B C D

QUESTION NO: 9

Which of the following statements about micromodules is true? ()

- A. ECC800 can access no more than 4 external gates
- B. ECC800 can connect no more than 4 cameras
- C. ECC800 can be connected to iBattery battery management system
- D. ECC800 can provide SNMP northbound interface

ANSWER: A B C D

QUESTION NO: 10

UPS5000-E can maintain high efficiency in a wide load range and effectively reduce losses. Among them, the efficiency can reach 96% at 40% load, and the efficiency can reach 95% at 20% load. What is the efficiency in ECO mode? ()

- A. 97%
- B. 99%
- C. 96%
- D. 98%

ANSWER: B

QUESTION NO: 11

When the operating temperature of the UPS2000-A is too high ().

- A. Switch to bypass mode
- B. Switch battery mode
- C. Stop output, load power off
- D. no action

ANSWER: A**QUESTION NO: 12**

Which of the following humidification forms consumes the least energy (

- A. Wet film humidification
- B. Electrode humidification
- C. Infrared humidification

ANSWER: A**QUESTION NO: 13**

UPS2000-G 6~20kVA maximum support () parallel, good scalability.

- A. 0
- B. 2
- C. 3
- D. 4

ANSWER: D**QUESTION NO: 14**

Which modules can be hot-replaced online in UPS5000-E (50kVA power module)? ()

- A. Power Module
- B. Control Module
- C. Bypass Module

D. Power distribution module:

ANSWER: A B C

QUESTION NO: 15

Huawei 25KW half-cabinet inverter air-cooled air conditioner, the following description is correct (multiple choice)

- A. The capacity algorithm for a single air conditioner with UPS is $1.2 * 1.732 * \text{full load current} * 380 * 0.8 / 0.9$
If you configure UPS5000E, you need to configure at least one 25kVA power module
If you configure UPS5000E, you need to configure at least two 40kVA power modules
- B. The capacity algorithm for a single air conditioner with UPS is $1.2 * 5 * 1.732 * \text{full load current} * 380 * 0.8 / 0.9$
- C. The UPS capacity requirement of a single air conditioner is 15.8kV
- D. The UPS capacity requirement of a single air conditioner is 79.0kV
- E. If a group of air conditioners is connected to a set of UPS systems, then it is necessary to multiply the number of air conditioners running at the same time on the basis of a single UPS, such as 5+1 cold backup configuration, then it needs to be based on the capacity requirement of a single air conditioner UPS Multiply by 5 to get total UPS capacity requirement, configure

ANSWER: A C E

QUESTION NO: 16

One card of UPS2000-G monitors the entire parallel system, and the parallel system only needs one communication option card to monitor the entire parallel system

- A. True
- B. False

ANSWER: A

QUESTION NO: 17

Huawei Netcol air-cooled air conditioner requires low temperature components when the outdoor temperature is lower than -20°C ()

- A. True
- B. False

ANSWER: A

QUESTION NO: 18

What certifications do Huawei precision column cabinets have (multiple choice)

- A. Earthquake resistance
- B. CE
- C. UL
- D. Thiel

ANSWER: A B C D**QUESTION NO: 19**

The controller (ECC800) of Fusionmodule2000 can be linked with the building fire protection system ()

- A. True
- B. False

ANSWER: A**QUESTION NO: 20**

NetEco management system can automatically pay electricity bills for computer rooms according to the tiered electricity price strategy.

- A. True
- B. False

ANSWER: A
