QUESTION NO: 1

An organization has implemented loyalty points as a payment currency by creating a payment gateway extension with loyaltyPoints as one of the paymentMethodTypes and configuring the Custom Currency Payment webhook.

What additional step does the organization need to do to add loyalty points as a payment option on the Payments Method widget?

- A.** Create a custom widget extension called Loyalty Payment and add it to the checkout layout
- B.** Create a new checkout layout with custom widgets for payment
- C.** Nothing. The Payments Method widget already includes loyalty points as a payment option
- D.** Add the baseline Loyalty Payment widget to the checkout layout on the Design page

ANSWER: A**Explanation:**

Reference: https://docs.oracle.com/cd/E91846_01/Cloud.12-17/ExtendingCC/html/s1907useloyaltywidgets01.html

QUESTION NO: 2

What are two use cases for employing widget configuration settings? (Choose two.)

- A.** to expose parameters that may vary between widget instances
- B.** to provide an increased level of merchandiser control over widget behavior and display
- C.** to determine whether a widget can be placed on a layout
- D.** to provide links to 3rd party JavaScript libraries

ANSWER: B C**QUESTION NO: 3**

After a year running their sites on Commerce Cloud, an international company has changed the URL patterns for both the product and collection pages across multiple languages. The product page URL pattern has been

updated to use a queryable URL slug. The collection page URL pattern has been updated by translating the string 'category' into each language, but retained the same structure with no queryable URL slug.

Which set of actions should the company take on the URL Patterns tab to complete the process?

- A. Deselect Auto Redirect and click the Build URL Slugs button for the collection page
- B. Deselect Auto Redirect and click the Build URL Slugs button for the product page
- C. Select Auto Redirect and click the Build URL Slugs button for the product page
- D. Select Auto Redirect for collections, deselect it for products, and click the Build URL Slugs buttons

ANSWER: D

QUESTION NO: 4

Consider the following code snippet from the config.json file for a custom payment gateway extension's properties:

```
"properties": [
  {
    "id": "paymentMethodTypes",
    "type": "multiSelectOptionType",
    "name": "paymentMethodTypes",
    "required": false,
    "helpTextResourceId": "paymentMethodsHelpText",
    "labelResourceId": "paymentMethodsLabel",
    "defaultValue": "generic",
    "displayAsCheckboxes": true,
    "options": [
      {
        "id": "generic",
        "value": "generic",
        "labelResourceId": "genericLabel"
      }
    ]
  }
]
```

Which two statements describe the paymentMethodTypes property configuration? (Choose two.)

- A. The generic option will appear as a checkbox in the Administration UI

- B. The default value is set to generic, which means that option will be selected in the Administration UI
- C. Other paymentMethodTypes options defined in the gateway.json file will appear in the Administration UI, even though not explicitly defined in config.json
- D. The property is public by default and can be used in a custom widget

ANSWER: C D

QUESTION NO: 5

Which four statements describe the Commerce Cloud payment webhooks? (Choose four.)

- A. Webhooks can be created for your custom integration
- B. The Credit Card Payment webhook is used for most credit cards, except 3D Secure cards and stored cards
- C. The Secure Credit Card Payment webhook is used for 3D Secure cards and stored cards
- D. The Generic Payment webhook is used for most payment types
- E. Webhooks can be configured in the Administration UI or using REST APIs
- F. The Custom Currency Payment webhook is used for loyalty points

ANSWER: A B E F

Explanation:

Reference: https://docs.oracle.com/cd/E95861_01/Cloud.18B/ExtendingCC/html/s2901createacreditcardpaymentgatewayi01.html

QUESTION NO: 6

Given the example custom widget Javascript:

```
widget.cartMsg = ko.computed(function() {
  return widget.translate('cartMsg',
    {currencySymbol: widget.site().currency.symbol,
     cartTotal: widget.cart().subTotal(), minSpend: minSpend,
     coupon: coupon});
});
```

In order to employ the Cart view model, what should the custom widget's widget.json descriptor contain for the imports attribute?

- A. The imports attribute should contain the value "user" because the cart view model belongs to the user
- B. The imports attribute is only valid for global widgets and is not relevant

- C. The imports attribute can be empty because the Cart view model is global
- D. The imports attribute should contain the value "cart"

ANSWER: B

QUESTION NO: 7

Consider the widget template snippet, which uses Knockout's containerless control flow syntax based on comment tags:

```
<ul>
  <li>Item #1</li>
  <!--ko if: product -->
    <li>Item #2</li>
  <!-- /ko -->
</ul>
```

Under what condition will

Item #2
be displayed?

- A. Item #2 will never be displayed
- B. if the Product view model is available on the page
- C. Item #2 will always be displayed
- D. If the shopper has a product in his/her cart

ANSWER: D

Explanation:

Reference: <https://knockoutjs.com/documentation/if-binding.html>

QUESTION NO: 8

Why is it a best practice to use the ccLink binding in your custom widgets?

- A. for ensuring the correct layout is displayed
- B. for ensuring a link does not cause a full page reload
- C. for ensuring that your URL is correctly formatted
- D. for ensuring images are sized for the current viewport

ANSWER: C

QUESTION NO: 9

The business team has decided to add order approvals into the B2B storefront.

What three things do you need to configure in order to implement this functionality? (Choose three.)

- A. Add order approval functionality into the B2B Checkout Layout
- B. Specify a Price Hold Period for an approved order
- C. Set the frequency of the Order Cancellation service
- D. Ensure that an invoice payment type is configured in the Payment Methods widget instance
- E. Configure B2B Storefront administrative privileges for account shoppers to request an order approval

ANSWER: A C E

QUESTION NO: 10

Which two statements describe benefits of the custom payment framework for merchants? (Choose two.)

- A. Merchants can leverage the provided payment webhooks or create their own custom webhooks
- B. Merchants can change the underlying payment service provider without affecting their integration
- C. Merchants can store credit cards on the Commerce Cloud server in its PCI-compliant zone
- D. Merchants can apply their own business rules on top of each transaction

ANSWER: A D
