QUESTION NO: 1

A revision was made to an existing sales order in Order Management Cloud. But it did not trigger a change order.

Identify the attribute that was modified during the revision of the sales order.

- A. Requested Ship Date
- B. Customer PO
- C. Unit Selling Price
- D. Ordered UOM
- E. Ordered Quantity

ANSWER: B**QUESTION NO: 2**

Select the two principle elements of the pack functionality in shipping execution. (Choose two)

- A. Trip
- B. Delivery
- C. Trip stop
- D. Delivery line
- E. License plate number

ANSWER: D E**QUESTION NO: 3**

You have deployed the Extensible Flexfield (EFF) successfully but it is not visible in the order capture additional information section.

Identify the two reasons for this behavior. (Choose two.)

- A. The EFF definition is not frozen.
- B. The EFF segments are not defined correctly.
- C. The EFF compilation is not done.
- D. The custom extensible flexfields are not published.

E. The EFF context is not associated with the page.

ANSWER: D E

QUESTION NO: 4

You want to perform Internal Material Transfer across Business Units and want to capture internal margin as part of revenue for the selling Business Unit.

Which mandatory task would you perform for this requirement?

- A. Configure Oracle Fusion Global Order Promising
- B. Manage Consumption Rules
- C. Manage Supply Execution Documentation Creation Rules
- D. Manage Supply Chain Financial Orchestration Transfer Pricing Rules
- E. Manage Supply Order Defaulting and Enrichment Rules

ANSWER: D

Explanation:

Sourcing tools enable you to manually create internal material transfer requisition lines in Self Service Procurement and create supply requests from the Manage Item Quantity page. These sourcing tools provide a default source organization and allow access to source organization rankings and available to promise quantities. Oracle Fusion Supply Chain Orchestration works with Oracle Fusion Global Order Promising and Oracle Fusion Inventory Management to identify the source organization rankings based on pre-established rules

QUESTION NO: 5

Your customer is concerned about not having access to schedule orders and check availability when the Global Order Promising server is down. Which two statements are true? (Choose two.)

- A. Affected orders can be rescheduled based on supply chain availability search after server recovery.
- B. Global Order Promising continues promising orders based on supply chain availability search until the server or backup server can be restarted.
- C. Global Order Promising cannot continue promising orders, but the server or backup server is usually restarted quickly.
- D. Affected orders cannot be rescheduled based on supply chain availability search after server recovery.
- E. Global Order Promising continues promising orders based on lead-time availability until the server or backup server can be restarted.

ANSWER: A B

QUESTION NO: 6

You are using the Check Availability feature to explore alternative ways of promising a batch of five fulfillment lines in simulation mode.

Which three attributes can you change to explore other promising options? (Choose three.)

- A. Requested Quantity
- B. Requested Ship-from warehouse
- C. Requested shipping method
- D. Allow substitute items
- E. Requested ship date
- F. Scheduled ship date

ANSWER: B C D**Explanation:**

The values for the attributes that begin with requested, such as the Requested Item attribute and the Requested Ship-from Warehouse attribute, are initially determined by what the values are when you select the line in the Order Orchestration work area. You cannot change the values for many of the requested attributes, such as the Requested Item attribute, the Requested Quantity attribute, and the Requested Ship Date attribute. You can change or clear the values for the Requested Ship-from Warehouse attribute and the Requested Shipping Method attribute. There are also some additional attributes you can change, such as whether substitutions are allowed, to influence the results when you explore other promising option.

QUESTION NO: 7

You are importing sales order data from a source system. You want to delete the imported sales orders from interface tables to save storage space. How would you do this?

- A. Delete the orders from Oracle Content Server.
- B. Run the ESS job "Delete Orders from Interface Tables."
- C. You must request the system administrator to delete orders from interface tables.
- D. Delete the orders from the Order Management work area.
- E. You cannot delete orders from interface tables.
- F. Run the ESS job Purge Interface Tables.

ANSWER: D**Explanation:**

QUESTION NO: 8

Your customer wants to include externally managed manufacturing supplies in Global Order Promising results. What are the four steps that you perform to meet this requirement?

- A. Ensure that the organizations in your external systems are modeled in Oracle SCM Cloud as item organizations.
- B. Enable each external system as a collection source by using the Manage Planning Source Systems page.
- C. In the Planning Central work area, select the Collect Planning Data task to complete the process of uploading your data.
- D. Load all of the data you require from your external system by using standard file uploads.
- E. In the Planning Central work area, select the "Load Planning Data from Flat Files" task to complete the process of uploading your data.

ANSWER: B**QUESTION NO: 9**

What flow is depicted in the diagram below?

A. Drop Ship

B. Back-to-back

- C. Configure to order
- D. Consignment order
- E. Internal Transfer

ANSWER: A

QUESTION NO: 10

Which two statements describe Net Change Collection? (Choose two.)

- A. Data for the selected entities is replaced in the planning data repository.
- B. It completely refreshes the planning data repository.
- C. Data for the selected entities is deleted from the planning data repository.
- D. It collects only changed data to the planning data repository.
- E. It collects data only incrementally to the planning data repository.

ANSWER: B E
