**QUESTION NO: 1**

Which NetApp Cloud Manager feature would be enabled to support Immutability of the data?

- A. NetApp Cloud WORM
- B. NetApp Storage Encryption
- C. NetApp Snapshot
- D. NetApp Volume Encryption

**ANSWER: B****QUESTION NO: 2**

A customer wants to design a solution that provides unique persistent storage when scaling a StatefulSet application. The customer proposes using a volume claim template in the StatefulSet definition to generate a unique persistent volume and use NetApp Trident to automate the provisioning of the persistent volume.

Which Kubernetes object would be used in this scenario?

- A. HorizontalPodAutoscaler
- B. CronJob
- C. StorageClass
- D. ConfigMap

**ANSWER: A****QUESTION NO: 3**

Which two domain service providers are supported for authentication of Azure NetApp Files

SMB shares? (Choose two.)

- A. Active Directory Domain Services (ADDS)
- B. Azure Active Directory (Azure AD)
- C. Azure Active Directory External Identities

D. Azure Active Directory Domain Services (AADDS)

**ANSWER: B C**

#### QUESTION NO: 4

You are using Cloud Volumes ONTAP to store persistent data In a multi-tiered Web application on AWS. In this scenario, which two architectures would improve application availability? (Choose two.)

- A. deployment of the Cloud Volumes ONTAP High Availability instances In a private subnet
- B. deployment of a AWS CloudHSM cluster in the same Availability Zone as a Cloud Volumes ONTAP single-node instance
- C. deployment of a Cloud Volumes ONTAP single-node instance on a single dedicated compute host
- D. deployment of Web servers behind a network load balancer

**ANSWER: B D**

#### QUESTION NO: 5

A customer has an on-premises data center with NetApp ONTAP storage. They have a Snapshot policy set up for their volumes to create periodic Snapshot copies so that they can recover from those in case they lose their data. However, their IT architect wants to implement a solution that will enable them to restore volumes or individual files to their storage on-premises or in the cloud.

In this scenario, which NetApp cloud service should be used to satisfy the requirement?

- A. Cloud Backup service
- B. Cloud Sync service
- C. SaaS Backup
- D. Cloud Volumes Service

**ANSWER: B**

#### QUESTION NO: 6

Your organization requires you to consolidate your branch office Microsoft Windows file servers into the cloud with the objective to centralize all Microsoft Windows file shares (SMB) into your Active Directory domain. Your organization requires you to extend file shares from your Azure NetApp Files central data sources to your branch office workforce with support for file locking.

In this scenario, which NetApp cloud service provides the desired outcome?

- A. Global File Cache
- B. ONTAP Select software
- C. Cloud Tiering
- D. FlexCache technology

**ANSWER: C**

#### **QUESTION NO: 7**

You are designing a highly available solution based on NetApp Cloud Volumes ONTAP that will be deployed in Google Cloud. The solution will need to grow over time to meet demand.

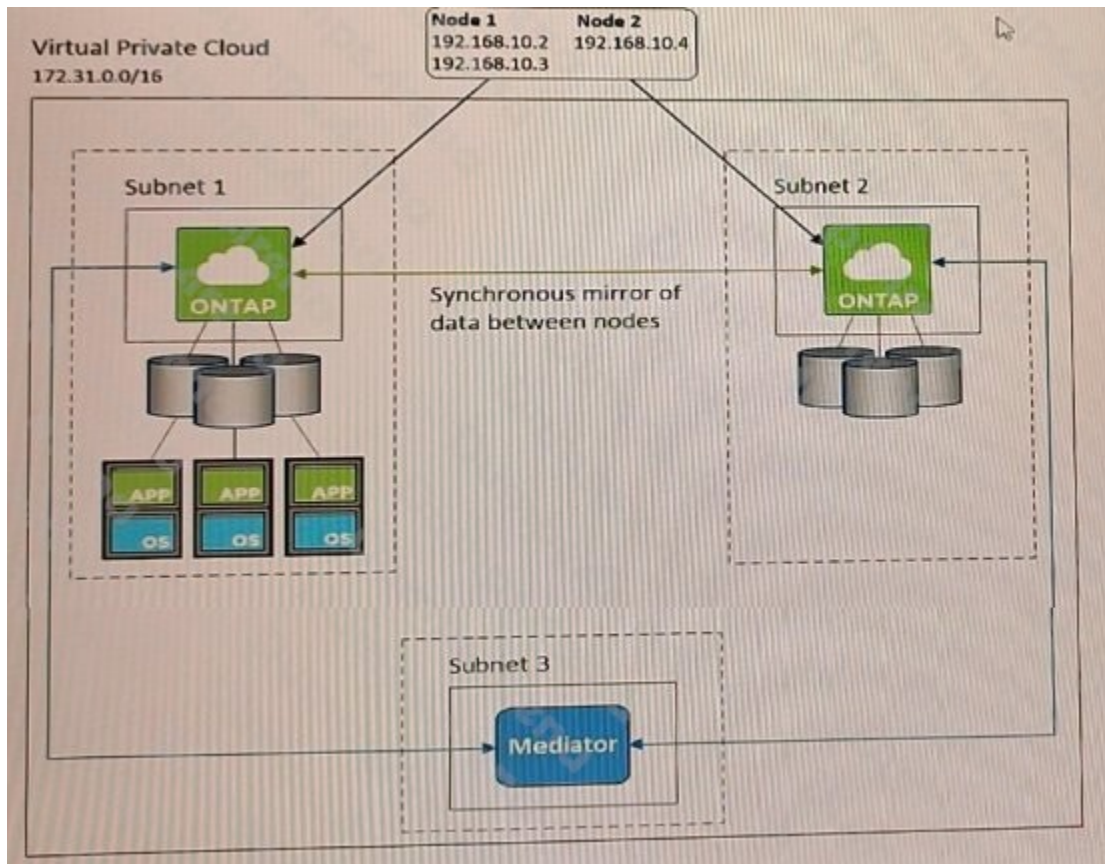

In this scenario, when adding disks, which two statements are true? (Choose two.)

- A. Cloud Manager creates a mirrored aggregate.
- B. Cloud Manager adds a new Cloud Volumes ONTAP instance.
- C. Cloud Manager allocates disks to both nodes.
- D. Cloud Manager allocates disks to one node.

**ANSWER: B C**

#### **QUESTION NO: 8**

Exhibit.

Which deployment model for NetApp Cloud Volumes ONTAP in AWS would use the networking topology as shown in the exhibit?

- A. single node, multiple availability zones
- B. HA nodes, single availability zone
- C. single node, single availability zone
- D. HA nodes, multiple availability zone

**ANSWER: B**

### QUESTION NO: 9

You want to manage access to your hybrid cloud resources centrally. You want to use single sign-on (SSO) to access your NetApp Cloud Central accounts using credentials from your corporate directory.

Which two open standards would you use to federate your identity to the company's SSO?

(Choose two.)

- A. Security Assertion Markup Language 2.0 (SAML)

- B. Windows Active Directory (AD) authentication protocols
- C. Lightweight Directory Access Protocol (LDAP)
- D. OpenID Connect (OIDC)

**ANSWER: B C**

**QUESTION NO: 10**

Your customer needs assistance developing a cloud storage solution that allows access from both NFSv3 and SMBv3 clients. You recommend Azure NetApp Files.

In this scenario, which two satisfy the requirements? (Choose two.)

- A. Azure Active Directory Domain Services (AADDS) I
- B. Azure Active Directory (AAD)
- C. Active Directory Domain Services (ADDS)
- D. DNS servers that are reachable from the Azure NetApp files delegated subnet

**ANSWER: B C**
