QUESTION NO: 1

Which three steps are required to enable east/west firewall in VMware Cloud Director Tenant Portal? (Choose three.)

- A. Click on Data Center Group and create a new Data Center Group
- B. Go to Edge Gateways and enable firewall on one of the Edge Gateways
- C. Go to Networking and enable Distributed Firewall for one of the Network inside the Network section
- D. Activate Distributed Firewall inside the Data Center Group
- E. Login to Customer Organization and go to Networking Section of Tenant Portal
- F. Enable the firewall in NSX-T

ANSWER: A C D**Explanation:**

Reference:https://docs.vmware.com/en/VMware-Cloud-Director/10.2/VMware_Cloud_Director_Tenant_Portal_Guide.pdf

QUESTION NO: 2

Due to multiple hardware failures, several virtual machines were corrupted and are being restored from a recent backup. One of the corrupted virtual machines was the primary replica node of a large production vRealize Operations Manager cluster.

How should the system administrator resolve this availability issue within vRealize Operations Manager?

- A. Remove the corrupted node, and then disable and re-enable vRealize Operations Manager High Availability to reassign the primary replica role to another existing node in the cluster.
- B. Deploy a new vRealize Operations Manager node, and then add it to the existing cluster.
- C. Clone an existing primary vRealize Operations Manager node, and then add it into the vRealize Operations Manager cluster.
- D. Ask the backup administrator to restore the corrupted primary replica node, and then refresh the nodes from the vRealize Operations Manager administrator interface.

ANSWER: A**QUESTION NO: 3**

Which two are supported Cloud Account types in vRealize Operations? (Choose two.)

- A. Microsoft Azure

- B. Horizon Connection Server
- C. Google Cloud Platform
- D. vRealize Automation
- E. vCenter Server

ANSWER: C D

QUESTION NO: 4

The VMware Cloud Director administrator wants to make sure that the system is able to collect log bundles from all cells at once.

How should the administrator accomplish this goal?

- A. Install vRealize Log Insight agent on each cell to redirect logs to a centralized location.
- B. Configure a syslog server on each of the cells, and request the logs from the syslog server.
- C. Map the log location on the primary cell to a shared folder on each of the other cells in the server group, ensuring they all have read/write rights on the primary.
- D. Make sure the NFS server allows read-write access to the shared location by the root system account on each cell.

ANSWER: D

QUESTION NO: 5

An administrator deployed vRealize Operations and has been tasked with ensuring that the VMware SDDC remains compliant to the VMware vSphere Security Configuration Guide. The compliance benchmark is showing that the VMware SDDC is not completely compliant to the standards.

Which three symptoms could have triggered a compliance alert? (Choose three.)

- A. The lockdown mode on a vSphere ESXi host is set to Disabled.
- B. Transparent Page Sharing is Disabled on a virtual machine.
- C. The SNMP service on a vSphere ESXi host is set to Disabled.
- D. The Enable 3D Support setting for the Virtual Machine is set to FALSE.
- E. The Disable console copy operation for a Virtual Machine is set to FALSE.
- F. The Forged Transmit policy is set to allow on a Distributed Port Group.

ANSWER: A C F

QUESTION NO: 6

An administrator has been tasked with making sure that the existing vRealize Operations Manager instance can monitor a newly deployed vSAN cluster within an existing vCenter Server.

Which action should the administrator take to accomplish this goal?

- A. Add vSAN cluster under Other Accounts.
- B. Enable vSAN monitoring under existing vCenter Server Cloud Account.
- C. Download and install vRealize Operations Management Pack for vSAN.
- D. Add vSAN cluster under Cloud Accounts.

ANSWER: B**QUESTION NO: 7**

An administrator needs to manage a vRealize Operations cluster using the Admin UI.

Which two actions are possible? (Choose two.)

- A. Deploying a new vRealize Operations node OVA
- B. Uploading and installing vRealize Operations PAK files
- C. Activating a vRealize Operations native management pack
- D. Enabling or disabling high availability for the vRealize Operations cluster
- E. Configuring a DNS server on the vRealize Operations nodes

ANSWER: A D**QUESTION NO: 8**

A vRealize Operations Manager administrator has the following requirement:

Whenever any object is selected in Widget-1 of Dashboard-A, then ONLY Widget-2 of Dashboard-B should be populated with the information.

Which setting of Widget-2 in Dashboard-B can help the administrator satisfy this requirement?

- A. Keep Refresh Content Off
- B. Keep Self-Provider Mode Off
- C. Keep Refresh Content ON
- D. Keep Self-Provider Mode ON

ANSWER: D

QUESTION NO: 9

An administrator has been tasked with configuring service discovery to identify which virtual machines are running Active Directory services. All virtual machines are running on vSphere 6.5.

Which credentials, if any, are needed for the administrator to complete this task?

- A. No credentials are needed since credential-less service discovery can be used.
- B. Local Windows administrator account and password.
- C. Active Directory domain administrator account and password.
- D. Active Directory domain user account and password.

ANSWER: C

QUESTION NO: 10

What are the two required components of an alert definition? (Choose two.)

- A. Symptom
- B. Version
- C. Node
- D. Action
- E. Recommendation

ANSWER: A D
