**QUESTION NO: 1**

Identify the statement that applies to parent accounts.

- A. A parent account is limited to 3 children or less.
- B. Parent accounts should have more than one child account but it is not required.
- C. Parent accounts can have a single child only if the currency is changing.
- D. The number of children under a parent account has no performance impact.
- E. Parent accounts inherit the properties of their children.

**ANSWER: B**

**QUESTION NO: 2**

Identify the two true statements about rule types in FM. (Choose two.)

- A. The Dynamic rule type allows you to calculate both parent and base accounts.
- B. The NolInput rule type prevents users from entering data into specific cells or slices of cells using Hs.NolInput.
- C. Calculate, Dynamic, Allocation, Input, No Input, Translate, Consolidate, Transactions, and Equity pickup are all valid rule types.
- D. If you need to calculate Gross Margin %, use the Translate rule type.
- E. Calculation rules are run only with FM specific calculation commands in Financial Management; no general VB commands.

**ANSWER: B C**

**QUESTION NO: 3**

Identify the three true statements about ERP Integrator (ERPI). (Choose three.)

- A. ERPI supports PeopleSoft, Oracle E-Business Suite and SAP.
- B. ERPI integrates metadata and data from ERP source system into an Oracle Hyperion EPM target application.
- C. ERPI provides drill through from Financial Management data forms, Smart View, and Financial Reporting.
- D. ERPI provides drill through to BI Dashboards.

E. ERPI under the covers is Oracle Data Integrator.

**ANSWER: A B D**

#### QUESTION NO: 4

Life Cycle Management moves artifacts in which two ways? (Choose two.)

- A. From one application to another application, moving Security, Dimensions, Phased Submissions, Rules, Documents, Forms, and Member Lists
- B. From Hyperion Enterprise into FM
- C. It does not move artifacts; it just verifies that artifacts are valid.
- D. From FM into various document management suites
- E. From one application to a file system, moving Security, Dimensions, Phased Submissions, Rules Documents, Forms, and Member Lists

**ANSWER: A E**

#### QUESTION NO: 5

The Audit Intersection link in Data Grid menus takes the user to:

- A. The Data Audit listing for the cell
- B. The FDM location used to load the data
- C. The database log for the data storage table
- D. The Task Audit page
- E. Line item details

**ANSWER: D**

#### QUESTION NO: 6

Marcela will only approve and post Journals. What two Shared Services roles/rights should be assigned to meet this requirement? (Choose two.)

- A. Journals Administrator
- B. Approve Journals

- C. Create Journals
- D. Post Journals
- E. Reviewer 1

**ANSWER: B D**

#### QUESTION NO: 7

Custom dimensions may be used to perform

- A. Cash Flows
- B. Roll forwards
- C. Historical Overrides
- D. B and C
- E. A, B, and C

**ANSWER: E**

#### QUESTION NO: 8

The Value dimension stores detail from child to parent for which dimension?

- A. View
- B. Entity
- C. Account
- D. Currency
- E. Scenario

**ANSWER: B**

#### Explanation:

The Value dimension represents the different types of values stored in your application, and can include the input currency, parent currency, adjustments, and consolidation detail such as proportion, elimination, and contribution detail. For example, the Entity Currency member stores the value for an entity in its local currency. The Parent Currency member stores the value for an entity translated to the currency of its parent entity. The Value dimension is useful for providing an audit trail of the transactions applied to data.

**QUESTION NO: 9**

You are loading data to FM under Load Tasks> Load Data. What are the four valid options for how data should be loaded into the application? (Choose four.)

- A. Merge
- B. Clear and Load
- C. Replace
- D. Replace by Security
- E. Accumulate within File
- F. Append

**ANSWER: A C D E****QUESTION NO: 10**

Which is the rule function used to notify the following year that a consolidation is needed due to recalculation of the current year?

- A. Exp
- B. ImpactStatus
- C. OpenDataUnit
- D. A rule function is not used; input subroutine is used.

**ANSWER: B**
