**QUESTION NO: 1**

Which two statements regarding hybrid drives are correct? (Choose two.)

- A. Flash memory stores frequently accessed content.
- B. Flash memory is located on the motherboard of the server
- C. Flash memory is located on the HDD circuit board.
- D. Flash memory is not used with a hybrid drive.

**ANSWER: B C****QUESTION NO: 2**

What are three iSCSI configuration optimization techniques? (Choose three.)

- A. Combine iSCSI data traffic with management IP traffic for maximum efficiency.
- B. Enable jumbo frames
- C. Isolate iSCSI traffic from other IP frames.
- D. Place a firewall between initiators and targets for security
- E. Enable flow control on switches.

**ANSWER: B C E****QUESTION NO: 3**

Software Defined Storage (SDS) uses which type of technology to function?

- A. Application
- B. replication
- C. virtualization
- D. authentication

**ANSWER: C**

**QUESTION NO: 4**

Which two technologies use NAND flash memory (non-volatile) technology to store data? (Choose two.)

- A. quad-level cell (QLC)
- B. single-level cell (SLC)
- C. interim-level cell (ILC)
- D. mufti -level cell (MLC)

**ANSWER: B D****QUESTION NO: 5**

What is a SNIA standard that defines an interface used by applications to create, retrieve, update and delete elements from the cloud?

- A. FTP
- B. CDMI
- C. S3
- SFTP

**ANSWER: B****QUESTION NO: 6**

What are two reasons for using a full backup? (Choose two.)

- A. When a host needs to have all of the data available to be restored.
- B. When a host restore can be accomplished across multiple jobs and sessions.
- C. When a backup requires minimal space consumption.
- D. When a backup must be available in one backup image.

**ANSWER: A D****QUESTION NO: 7**

According to SNIA, what is the term that describes a mechanism allocating the physical capacity of a volume or file system as applications write data?

- A. thick provisioning
- B. thin provisioning
- C. hybrid provisioning
- D. static provisioning

**ANSWER: B**

#### **QUESTION NO: 8**

Which technology uses lossless Ethernet?

- A. FC
- B. FcoE
- C. FCIP
- D. iFCP

**ANSWER: B**

#### **QUESTION NO: 9**

What describes the process of moving data between different classes of disks and storage, based on policy?

- A. data clustering
- B. IOPS monitoring
- C. storage tiering
- D. LUN migration

**ANSWER: C**

#### **QUESTION NO: 10**

What are two characteristics of Challenge-Handshake Authentication Protocol (CHAP)? (Choose two.)

- A. CHAP uses a hash mechanism so the clear text authentication piece is never sent.

- B.** CHAP uses a parity algorithm to jumble the credentials for security.
- C.** CHAP uses a Point-to-Point Protocol (PPP) method.
- D.** CHAP is required for iSCSI initiator authentication

**ANSWER: C D**
